

17 Solving Absolute Value Equations And Inequalities

CliffsQuickReview course guides cover the essentials of your toughest classes. Get a firm grip on core concepts and key material, and test your newfound knowledge with review questions. Whether you're brushing up on pre-Algebra concepts or on your way toward mastering algebraic fractions, factoring, and functions, CliffsQuickReview Algebra I can help. This guide introduces each topic, defines key terms, and carefully walks you through each sample problem step-by-step. In no time, you'll be ready to tackle other inequalities, graphing, and absolute value Coordinate Geometry Roots and radicals Quadratic equations CliffsQuickReview Algebra I acts as a supplement to your textbook and to classroom lectures. Use this reference in any way that fits your personal style for study and review—you decide what works best with your needs. Here are just a few ways you can search for topics: Use the free Pocket Guide full of essential information Get a glimpse of what you'll gain from a chapter by reading through the Chapter Check end of each chapter to gauge your grasp of the important information you need to know Test your knowledge more completely in the COR Review and look for additional sources of information in the COR Resource Center Use the glossary to find key terms fast. With titles available for all the most popular high school and college courses, CliffsQuickReview guides can help you get the best possible grades.

If **Study Now to Know It!** is in This Book This book develops the math skills of 10th graders. It fosters skill mastery that helps them succeed both in school and on the California High School Exit Exam. Why The Princeton Review? We have more than 20 years of experience helping students master the skills needed to excel on standardized tests. Each year we help more than 2 million students score higher and earn better grades. We know the California High School Exit Exam (CAHSEE). Our experts at the Princeton Review have researched practice possible. We break down the test into its individual skills to familiarize students with the test's structure while increasing their overall skill level. We Get Results We know what it takes to succeed in the classroom and on tests. This book includes strategies that are proven to improve student performance. We provide Content review based on California standards and objectives Detailed lessons, complete with skill-specific activities -2 complete practice CAHSEE math problems for school and home, call 1-800-REVIEW or visit k12.prcincetonreview.com.

Essentials of Precalculus with Calculus Reviews, Sixth Edition is an ideal undergraduate text to help students successfully transition into a future course in calculus. The Sixth Edition of this best-selling text presents the fundamental mathematics used in a typical calculus sequence in a focused and readable format. Dennis G. Zillæ(tm)s concise, yet eloquent, writing style allows instructors to cover the entire text in one semester. Essentials of Precalculus with Calculus Reviews, Sixth Edition uses a vibrant full-color of graphs and figures. This text also includes a valuable collection of student and instructor resources, making it a complete teaching and learning package. Key Updates to the Sixth Edition: æ New section on implicitly defined functions in Chapter 2 æ New section on the Product-to-Sum and Sum-to-Product trigonometric identities in Chapter 4 æ Expanded discussion of applications of right triangles, including the addition of new problems designed to pique student interest æ The discussion of the Laws of Sine and Cosine is expanded and increased student comprehension æ Increased emphasis on solving equations involving exponential and logarithmic functions æ Updated and expanded WebAssign Online Homework and Grading System with comprehensive questions that facilitate learning æ Provides a complete teaching and learning program with numerous student and instructor resources, including a Student Resource Manual, WebAssign, Complete Instructor Solutions Manual, and Image Bank

BEGINNING AND INTERMEDIATE ALGEBRA: CONNECTING CONCEPTS THROUGH APPLICATIONS, shows students how to apply traditional mathematical skills in real-world contexts. The emphasis on skill building and applications engages students as they master algebraic concepts, problem solving, and communication skills. Students develop sound mathematical skills by learning how to solve problems generated from realistic applications. Instead of learning techniques without conceptual understanding, Authors Mark Clark and Mark Zions use math concepts real and vivid for students. First, the authors place an emphasis on developing strong algebra skills that support the applications, enhancing student comprehension and developing their problem-solving abilities. Second, applications are integrated throughout, drawing on realistic and numerically appropriate data to show students how to apply math and to understand why they need to know it. These applications require students to think critically and develop the skills needed to explain an idea as developed as students progress through the course and overlapping elementary and intermediate content in kept to a minimum. Chapter 8 sets the stage for the intermediate material where students explore the eyeball best-fit approach to modeling and understand the importance of graphs and graphing including graphing by hand. Fourth, Mark and Cynthia's approach prepares students for a range of courses including college algebra and statistics. In short, **BEGINNING AND INTERMEDIATE ALGEBRA: CONNECTING CONCEPTS THROUGH APPLICATIONS** is a strong mathematical skills using an engaging, application-driven and problem solving-focused approach to algebra. Algebra II For Dummies

Barron's Math 360: Pre-Calculus is your complete go-to guide for everything pre-calculus This comprehensive guide is an essential resource for: High school and college courses Homeschooling Virtual Learning Learning pods Inside you'll find: Comprehensive Content Review: Begin your study with the basic building blocks of pre-calculus and build as you go. Topics include, algebraic methods, functions and graphs, complex numbers, polynomial and rational functions, and much more. Effective Organization: Topic organization and simple lesson formats break down the subject matter into manageable learning modules that help guide a successful study plan customized to your needs. Clear Examples and Illustrations: Easy-to-follow explanations, hundreds of helpful illustrations, and numerous step-by-step examples make this book ideal for self-study and rapid learning. Practice Exercises: Each chapter ends with practice exercises designed to reinforce and extend key skills and concepts. These checkup exercises, along with the answers and solutions, will help you assess your understanding and monitor your progress. Access to Online Practice: Take your learning online for 50 practice questions designed to test your knowledge with automated scoring to show you how far you have come.

As in previous editions, the focus in **ALGEBRA: INTRODUCTORY & INTERMEDIATE** remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. Student engagement is crucial to success. Presenting students with worked examples, and then providing them with the opportunity to immediately solve similar problems, helps them build their confidence and eventually master the concepts. Simplicity is key in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective, which helps to reinforce key concepts and promote skill building. This clear, objective-based approach allows students to organize their thoughts around the content, and supports instructors as they work to design syllabi, lesson plans, and other administrative documents. New features like Focus on Success, Apply the Concept, and Concept Check add an increased emphasis on study skills and conceptual understanding to strengthen the foundation of student success. The Sixth Edition also features a new design, enhancing the Aufmann Interactive Method and making the pages easier for both students and instructors to follow. Available with InfoTrac Student Collections http://goengage.com/infotrac.

Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. *Larson's PRECALCULUS WITH LIMITS is known for delivering the same sound, consistently structured explanations and exercises of mathematical concepts as the market-leading PRECALCULUS, with a laser focus on preparing students for calculus. In LIMITS, the author includes a brief algebra review of core precalculus topics along with coverage of analytic geometry in three dimensions and an introduction to concepts covered in calculus. With the Fourth Edition, Larson continues to revolutionize the way students learn material by incorporating more real-world applications, ongoing review, and innovative technology. How Do You See It? exercises give students practice applying the concepts, and new Summarize features, and Checkpoint problems reinforce understanding of the skill sets to help students better prepare for tests. The companion website LarsonPrecalculus.com offers free access to multiple tools and resources to supplement students' learning. Stepped-out solution videos with instruction are available at CalcView.com for selected exercises throughout the text. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.*

The purpose of this book is to introduce and explain research at the boundary between two fields that view problem solving from different perspectives. Researchers in operations research and artificial intelligence have traditionally remained separate in their activities. Recently, there has been an explosion of work at the border of the two fields, as members of both communities seek to leverage their activities and resolve problems that remain intractable to pure operations research or artificial intelligence techniques. This book presents representative results from this current flurry of activity and provides insights into promising directions for continued exploration. This book should be of special interest to researchers in artificial intelligence and operations research because it exposes a number of applications and techniques, which have benefited from the integration of problem solving strategies. Even researchers working on different applications or with different techniques can benefit from the descriptions contained here, because they provide insight into effective methods for combining approaches from the two fields. Additionally, researchers in both communities will find a wealth of pointers to challenging new problems and potential opportunities that exist at the interface between operations research and artificial intelligence. In addition to the obvious interest the book should have for members of the operations research and artificial intelligence communities, the papers here are also relevant to members of other research communities and development activities that can benefit from improvements to fundamental problem solving approaches.

The Humongous Book of Algebra Problems

Introductory and Intermediate Algebra: An Applied Approach

Algebra I Essentials For Dummies (9781119590965) was previously published as Algebra I Essentials For Dummies (9780470618349). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. With its use of multiple variables, functions, and formulas algebra can be confusing and overwhelming to learn and easy to forget. Perfect for students who need to review or reference critical concepts, Algebra I Essentials For Dummies provides content focused on key topics only, with discrete explanations of critical concepts taught in a typical Algebra I course, from functions and FOILs to quadratic and linear equations. This guide is also a perfect reference for parents who need to review critical algebra concepts as they help students with homework assignments, as well as for adult learners headed back into the classroom who just need a refresher of the core concepts. The Essentials For Dummies Series Dummies is proud to present our new series, The Essentials For Dummies. Now students who are prepping for exams, preparing to study new material, or who just want a refresher can have a concise, easy-to-understand review guide that covers an entire course by concentrating solely on the most important concepts. From algebra and chemistry to grammar and Spanish, our expert authors focus on the skills students most need to succeed in a subject.

Algebra II For Dummies, 2nd Edition (9781119543145) was previously published as Algebra II For Dummies, 2nd Edition (9781119099625). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. Your complete guide to acing Algebra II Do quadratic equations make you queasy? Does the mere thought of logarithms make you feel lethargic? You're not alone! Algebra can induce anxiety in the best of us, especially for the masses that have never counted math as their forte. But here's the good news: you no longer have to suffer through statistics, sequences, and series alone. Algebra II For Dummies takes the fear out of this math course and gives you easy-to-follow, friendly guidance on everything you'll encounter in the classroom and arms you with the skills and confidence you need to score high at exam time. Gone are the days that Algebra II is a subject that only the serious 'math' students need to worry about. Now, as the concepts and material covered in a typical Algebra II course are consistently popping up on standardized tests like the SAT and ACT, the demand for advanced guidance on this subject has never been more urgent. Thankfully, this new edition of Algebra II For Dummies answers the call with a friendly and accessible approach to this often-intimidating subject, offering you a closer look at exponentials, graphing inequalities, and other topics in a way you can understand. Examine exponentials like a pro Find out how to graph inequalities Go beyond your Algebra I knowledge Ace your Algebra II exams with ease Whether you're looking to increase your score on a standardized test or simply succeed in your Algebra II course, this friendly guide makes it possible.

Written by David Cohen and co-authors Theodore B. Lee and David Sklar, PRECALCULUS, Seventh Edition, focuses on the use of a graphical perspective to provide a visual understanding of college algebra and trigonometry. Cohen's texts are known for their clear writing style and outstanding, graded exercises and applications, including many examples and exercises involving applications and real-life data. Graphs, visualization of data, and functions are introduced and emphasized early on to aid student understanding. Although the text provides thorough treatment of the graphing calculator, the material is arranged to allow instructors to teach the course with or as little graphing utility work as they wish. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

College Algebra provides a comprehensive exploration of algebraic principles and meets scope and sequence requirements for a typical introductory algebra course. The modular approach and richness of content ensure that the book meets the needs of a variety of courses. College Algebra offers a wealth of examples with detailed, conceptual explanations, building a strong foundation in the material before asking students to apply what they've learned. Coverage and Scope In determining the concepts, skills, and topics to cover, we engaged dozens of highly experienced instructors with a range of student audiences. The resulting scope and sequence proceeds logically while allowing for a significant amount of flexibility in instruction. Chapters 1 and 2 provide both a review and foundation for study of functions that begins in Chapter 3. The authors recognize that while some institutions may find this material a prerequisite, other institutions have told us that they have a cohort that need the prerequisite skills built into the course. Chapter 1: Prerequisites Chapter 2: Equations and Inequalities Chapters 3-6: The Algebraic Functions Chapter 3: Functions Chapter 4: Linear Functions Chapter 5: Polynomial and Rational Functions Chapter 6: Exponential and Logarithm Functions Chapters 7-9: Further Study in College Algebra Chapter 7: Systems of Equations and Inequalities Chapter 8: Analytic Geometry Chapter 9: Sequences, Probability and Counting Theory

Precalculus: A Functional Approach to Graphing and Problem Solving

Beginning and Intermediate Algebra: Connecting Concepts Through Applications

MATH FOR THE AUTOMOTIVE TRADE, 6th Edition, is the practical workbook that can jumpstart automotive repair careers! Starting with beginner math and a review of automobile systems, this book walks students through hands-on problems and exercises, completing repair orders and documents according to manufacturer specs, and checking their work against industry data in the appendices. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Every new copy of **Practical Approach to Graphing and Problem Solving** Includes Access to the Student Companion Website! Precalculus: A Functional Approach to Graphing and Problem Solving prepares students for the concepts and applications they will encounter in future calculus courses. In far too many texts, process is stressed over insight and understanding, and students move on to calculus ill equipped to think conceptually about its essential ideas. This text provides sound development of the important mathematical underpinnings of calculus, stimulating problems and exercises, and a well-developed, engaging pedagogy. Students will leave with a clear understanding of what lies ahead in their future calculus courses. Instructors will find that Smith's straightforward, student-friendly presentation provides exactly what they have been looking for in a text! Rapid Quantitative Aptitude with Shortcuts & Tricks for Competitive Exams is the finest book to achieve success in Arithmetic and Advanced Mathematics for all competitive exams. The book is updated with the latest trend of questions (like Data Analysis, Caselets, Data Missing etc.) being asked in the various exams. The Unique Selling Point of the book is its strong focus on Shortcuts, Tips & Techniques, which are highlighted with Solved Examples. Written in a very student-friendly manner, the book covers complete theory with suitable illustrations followed by two levels of exercises - each containing an assortment of questions for practice in increasing level of difficulty. The book contains many tricks in not just challenging but also mundane chapters which enable you to dodge the lengthy procedures and arrive at the result quickly, thereby saving your time, thereby increasing your final examination output and score. The book is useful for various exams such as SSC, Banking, Railways, UPSC, Defence etc.

Intermediate Algebra with Trigonometry focuses on principles, operations, and approaches employed in intermediate algebra with trigonometry. The publication first elaborates on basic properties and definitions, first-degree equations and inequalities, and exponents and polynomials. Discussions focus on polynomials, sums, and differences, multiplication of polynomials, greatest common factor and factoring by grouping, inequalities involving absolute values, the distributive property, the binomial theorem, the quadratic formula, and the quadratic formula, completing the square, multiplication and division of complex numbers, equations with radicals, simplified form for radicals, multiplication and division of rational expressions, and addition and subtraction of rational expressions. The text takes a look at triangles, trigonometric identities and equations, introduction to trigonometry, and sequence and series, including arithmetic progressions, trigonometric functions, tables and calculators, sum and difference formulas, and the law of sines and cosines. The publication is a valuable reference for students and researchers interested in intermediate algebra with trigonometry.

This book contains an access link for 5 Online Tests provided in the inner pages. 19 JEE Main 2019 Phase I & II Solved Papers (Held in January 2019 - 8 Sets & April 2019 - 8 Sets) consists of the 8 JEE Main Papers held in January (9th - 12th) in 8 Slots (2 shifts per day) and April (9th - 12th) in 8 Slots (2 shifts per day). The detailed solutions are provided immediately after each paper. These papers wouls act as a VERY IMPORTANT practice tool for JEE Main 2020. The book also provides 5 Online Tests with Insta Solutions & Reports. These tests can be access code provided inside the book.

As in previous editions, the focus in **INTERMEDIATE ALGEBRA** remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. Student engagement is crucial to success. Presenting students with worked examples, and then providing them with the opportunity to immediately solve similar problems, helps them build their confidence and eventually master the concepts. Simplicity is key in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective, which helps to reinforce key concepts and promote skill building. This clear, objective-based approach allows students to organize their thoughts around the content, and supports instructors as they work to design syllabi, lesson plans, and other administrative documents. New features like Focus on Success, Apply the Concept, and Concept Check add an increased emphasis on study skills and conceptual understanding to strengthen the foundation of student success. The Ninth Edition also features a new design, enhancing the Aufmann Interactive Method and making the pages easier for both students and instructors to follow. Available with InfoTrac Student Collections http://goengage.com/infotrac.

Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. *INTERMEDIATE ALGEBRA: CONNECTING CONCEPTS THROUGH APPLICATIONS shows students how to apply traditional mathematical skills in real-world contexts. The emphasis on skill building and applications engages students as they master concepts, problem solving, and communication skills. It modifies the rule of four, integrating algebraic techniques, graphing, the use of data in tables, and writing sentences to communicate solutions to application problems. The authors have developed several key ideas to make concepts real and vivid for students. First, the authors integrate applications, drawing on real-world data to show students why they need to know and how to apply math. The applications help students develop the skills needed to explain the meaning of answers in the context of the application. Second, they emphasize strong algebra skills. These skills support the applications and enhance student comprehension. Third, the authors use an eyeball best-fit approach to modeling. Doing models by hand helps students focus on the characteristics of each function type. Fourth, the text underscores the importance of graphs and graphing. Students learn graphing by hand, while the graphing calculator is used to display real-life data problems. In short, INTERMEDIATE ALGEBRA: CONNECTING CONCEPTS THROUGH APPLICATIONS takes an application-driven approach to algebra, using appropriate calculator technology as students master algebraic concepts and skills.*

The book offers a clear writing style that helps reduce any math anxiety they may have while developing their problem-solving skills. It incorporates Parallel Words and Math boxes that provide detailed annotations which follow a multi-modal approach. Your Turn exercises reinforce concepts by allowing them to see the connection between the exercises and examples. A five-step problem solving method is also used to help engineers gain a stronger understanding of word problems. Barron's Math 360: A Complete Study Guide to Pre-Calculus with Online Practice 32 JEE Main Online 2019 & 2020 Solved Papers 4th Edition 16 JEE Main Online 2019 Phase I & II Solved Papers with FREE 5 Online Tests Translated for People who Don't Speak Math!!*

Algebra I Essentials For Dummies

This book uses simplified language about mathematics to promote active and independent learning, strengthening critical thinking and writing skills. A "six-step" approach to problem-solving, numerous tips, and clear, concise explanations throughout the book enable users to "understand" the concepts underlying mathematical processes. Beginning with the foundations of the mathematical process, some of the topics covered are: whole numbers and decimals; integers; fractions; percents; measurement; area and perimeter; interpreting and analyzing data; symbolic representation; linear and nonlinear equations; powers and logarithms; formulas and applications; higher-degree equations; absolute values and inequalities; slope and distance; basic concepts in geometry; and an introduction to trigonometry. This book can serve as a valuable reference handbook for engineering technicians, nurses, dieticians, job trainers, home-schooling professionals, and others who require a basic knowledge of non-calculus mathematics. An important feature of the new edition is the alignment of the activities with the Common Core Math Standards for algebra for grades six through high school. Every standard is supported by at least one activity, and many are supported by two or more. The rest of the activities address prerequisite skills related to the standards. The number and diversity of the activities in this resource will help teachers to meet the needs of the various abilities and learning styles of their students. The book is designed for easy use. Each section is divided into two parts: a summary of the activities, which includes teaching notes and answers, followed by the reproducibles of the section. The activities stand alone and can be used to supplement instruction and reinforce skills and concepts. Many are self-correcting, a feature that adds interest for students and saves time for teachers. The nine sections of the book are: Section 1: The Language of Algebra (Using Whole Numbers) Section 2: Integers, Variables, and Expressions Section 3: Linear Equations and Inequalities Section 4: Graphing Linear Equations and Inequalities Section 5: Basic Operations with Monomials and Polynomials Section 6: Factors of Monomials and Polynomials Section 7: Complex Numbers Section 8: Polynomial, Exponential, and Logarithmic Functions and Equations Section 9: Potpourri

Learn to think mathematically and develop genuine problem-solving skills with Stewart, Redlin, and Watson's COLLEGE ALGEBRA, Sixth Edition. This straightforward and easy-to-use algebra book will help you learn the fundamentals of algebra in a variety of practical ways. The book features new tools to help you succeed, such as learning objectives before each section to prepare you for what you're about to learn, and a list of formulas and key concepts after each section that help reinforce what you've learned. In addition, the book includes many real-world examples that show you how mathematics is used to model in fields like engineering, business, physics, chemistry, and biology. YCCUPLACER Math Workbook 2018

Intermediate Algebra. An Applied Approach

Algebra and Trigonometry

Operations Research and Artificial Intelligence. The Integration of Problem-Solving Strategies

The Only Book You'll Ever Need to ACE the ACCUPLACER Math Exam! Effortless Math ACCUPLACER Workbook provides students with the confidence and math skills they need to succeed on the ACCUPLACER Math, providing a solid foundation of basic Math topics with abundant exercises for each topic. It is designed to address the needs of ACCUPLACER test takers who must have a working knowledge of basic Math. This comprehensive workbook with over 2,500 sample questions and 2 complete ACCUPLACER tests is all you need to fully prepare for the ACCUPLACER Math. It will help you learn everything you need to ace the math section of the ACCUPLACER. There are more than 2,500 Math problems with answers in this book. Effortless Math unique study program provides you with an in-depth focus on the math portion of the exam, helping you master the math skills that students find the most troublesome. This workbook contains most common sample questions that are most likely to appear in the mathematics section of the ACCUPLACER. Inside the pages of this comprehensive Workbook, students can learn basic math operations in a structured manner with a complete study program to help them understand essential math skills. It also has many exciting features, including: Dynamic design and easy-to-follow activitiesA fun, interactive and concrete learning processTargeted, skill-building practicesFun exercises that build confidenceMath topics are grouped by category, so you can focus on the topics you struggle onAll solutions for the exercises are included, so you will always find the answers2 Complete ACCUPLACER Math Practice Tests that reflect the format and question types on ACCUPLACER Effortless Math ACCUPLACER Workbook is an incredibly useful tool for those who want to review all topics being covered on the ACCUPLACER test. It efficiently and effectively reinforces learning outcomes through engaging questions and repeated practice, helping you to quickly master basic Math skills. Get a copy today and see how fast you will prepare for the test with the ACCUPLACER Math Workbook! Published By: Effortless Math Education www.EffortlessMath.com

This bestselling author team explains concepts simply and clearly, without glossing over difficult points. Problem solving and mathematical modeling are introduced early and reinforced throughout, providing students with a solid foundation in the principles of mathematical thinking. Comprehensive and evenly paced, the book provides complete coverage of the function concept, and integrates a significant amount of graphing calculator material to help students develop insight into mathematical ideas. The authors' attention to detail and clarity—the same as found in James Stewart's market-leading Calculus text—is what makes this text the market leader. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Presents algebra exercises with easy-to-follow guidelines, and includes over one thousand problems in numerous algebraic topics.

Easy to apply lessons for reteaching difficult algebra concepts Many students have trouble grasping algebra. In this book, bestselling authors Judith, Gary, and Erin Muschla offer help for math teachers who must instruct their students (even those who are struggling) about the complexities of algebra. In simple terms, the authors outline 150 classroom-tested lessons, focused on those concepts often most difficult to understand, in terms that are designed to help all students unravel the mysteries of algebra. Also included are reproducible worksheets that will assist teachers in reviewing and reinforcing algebra concepts and key skills. Filled with classroom-ready algebra lessons designed for students at all levels The 150 mini-lessons can be tailored to a whole class, small groups, or individual students who are having trouble This practical, hands-on resource will help ensure that students really get the algebra they are learning

College Mathematics for Technology

150 Mini-Lessons for Correcting Common Mistakes

Accessible to students and flexible for instructors, COLLEGE ALGEBRA, EIGHTH EDITION, incorporates the dynamic link between concepts and applications to bring mathematics to life. By integrating interactive learning techniques, the Aufmann author team helps students to better understand concepts, work independently, and obtain greater mathematical fluency. The Eighth Edition also includes technology features to accommodate courses that allow the option of using graphing calculators. Additional program components that support student success include tutoring services, online homework, Live Online Tutoring, and Instructional DVDs. The authors' proven Aufmann Interactive Method allows students to try a skill as it is presented in example form. This interaction between the examples and Try Exercises serves as a checkpoint to students as they read the textbook, do their homework, or study a section. In the Eighth Edition, Review Notes are featured more prominently throughout the text to help students recognize the key prerequisite skills needed to understand new concepts. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

COLLEGE ALGEBRA WITH APPLICATIONS FOR BUSINESS AND LIFE SCIENCES, Second Edition, meets the demand for courses that emphasize problem solving, modeling, and real-world applications for business and the life sciences. The authors provide a firm foundation in algebraic concepts, and prompt students to apply their understanding to relevant examples and applications they are likely to encounter in college or in their careers. The program addresses the needs of students at all levels—and in particular those who may have struggled in previous algebra courses—offering an abundance of examples and exercises that reinforce concepts and make learning more dynamic. The early introduction of functions in Chapter 1 ensures compatibility with syllabi and provides a framework for student learning. Instructors can also opt to use graphing technology as a tool for problem solving and for review or retention. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Larson's ALGEBRA AND TRIGONOMETRY is ideal for a two-term course and known for delivering sound, consistently structured explanations and carefully written exercises of the mathematical concepts. With the Tenth Edition, the author continues to revolutionize the way students learn material by incorporating more real-world applications, ongoing review and innovative technology. How Do You See It? exercises give students practice applying the concepts, and new Summarize features, and Checkpoint problems reinforce understanding of the skill sets to help students better prepare for tests. Stepped-out solution videos with instruction are available at CalcView.com for selected exercises throughout the text, and the companion website at LarsonPrecalculus.com offers free access to many additional tools and resources to supplement students' learning. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
