Ofcom is one of the key regulators in twenty first century Britain. It supervises the big industries of the present and the future: telephony, broadcasting, media, and so on. It is at the intersection of technology, culture and politics.

Ofcom is also at its own crossroads with a new chair to be announced in late Spring 2021. That individual could shape the public sphere for decades to come. Hence, this book - the first to my knowledge about the regulator - simply asks what is the point of Ofcom? And is it fit for purpose after close to two decades of existence? continues to be responsive to the very latest social and cultural developments in the environments in which it exists. They raise fundamental questions concerning new media and religious expression, religious youth cultures, the links between spirituality, personal development and consumer culture, and contemporary intersections of religion, identity and politics. Together the chapters demonstrate how belief in the superempirical is negotiated relative to secular concerns in the twenty-first century. The definitive media law guide for journalists and students alike. The only media law text endorsed by the NCTJ, McNae's offers unrivalled practical guidance on a wide range of reporting situations - an invaluable tool throughout your journalism career.

from community playgroups to conferences and dinners to large corporate Boards. The book is based on the personal experience of a professional working chair over many years. The book is aimed at younger men and women who are beginning to chair their first meetings, and also at more experienced chairs who want to develop their skills.

Writing in the sixth edition of this Handbook, author Michael Fordham described his ambition when writing the first edition (and indeed all subsequent editions) of this book as "to read as many judicial review cases as I could and to try to extract, classify and present illustrations and statements of principle". Behind this aim

lay the practitioner's overwhelming need to know and understand the case-law. Without it, as Fordham says "much can be achieved in public law through instinct, experience and familiarity with general principles which are broad, flexible and designed to accord with common sense". But with knowledge of the case law comes the vital ability to be able to point to and rely on an authoritative statement of principle and working illustration. Knowing the case-law is crucial: "the challenge is to find it". This, the sixth edition of the Handbook, continues the tradition established by earlier editions, in rendering the voluminous case-law accessible and knowable. This Handbook remains an

indispensable source of reference and a guide to the case-law in judicial review. Established as an essential part of the library of any practitioner engaged in public law cases, the Judicial Review Handbook offers unrivalled coverage of administrative law, including, but not confined to, the work of the Administrative Court and its procedures. Once again completely revised and updated, the sixth edition approximates to a restatement of the law of judicial review, organised around 63 legal principles, each supported by a comprehensive presentation of the sources and an unequalled selection of reported case quotations. It also includes essential procedural rules, forms and guidance issued by the

Administrative Court. As in the previous edition, both the Civil Procedure Rules and Human Rights Act 1998 feature prominently as major influences on the shaping of the case-law. Their impact, and the plethora of cases which explore their meaning and application, were fully analysed and evaluated in the previous edition, but this time around their importance has grown exponentially and is reflected in even greater attention being given to their respective roles. Attention is also given to another new development - the coming into existence of the Supreme Court. Here Michael Fordham casts an experienced eye over the Court's work in the area of judicial review, and assesses the early signs from a

Europe is marked by a great diversity in public service broadcasting culture which is a result of the different political, economic, cultural and social realities in different European countries. This publication examines the development of public service broadcasting, its current *raison d'être* and its perspectives in the digital media era. It also addresses the demands and expectations placed on public service broadcasting: how are these demands expressed and how do today's broadcasters meet these demands? Fourteen European countries are covered in detail: Bulgaria, Denmark, Finland, France, Germany, Hungary, Italy, Lithuania, Poland, Romania,

interventions has created ongoing problems with the provision of high-cost credit, particularly for consumers with lesser bargaining power and who are already financially vulnerable. The book tackles two specific gaps in the existing literature. The first involves inadequate analysis of the relevant philosophical concepts around high-cost credit, which can result in an over-simplification of what are particularly complex issues. The second is a lack of engagement in both the market and lived experience of borrowers, resulting in limited understanding of those who use these financial products. The Future of High-Cost Credit explores the theoretical grounding, policy initiatives and interdisciplinary perspectives associated with high-cost credit, making a novel

This book examines the harm that everyday discrimination can cause and proposes ways in which it can be redressed. Extreme forms of harmful expression, such as incitement to hatred, have been significantly addressed in law. Everyday generalised prejudice, negative stereotypes and gross under-representation of disadvantaged groups in mainstream media are, however, widely perceived

as 'normal', and their criticism is regularly trivialised. In response, this book draws on critical and feminist theory in order to forge a theoretical analysis of the harm created through everyday discrimination. Arguing that anti-discrimination law can and should be extended as a tool to offer protection against the harm inflicted, the book goes on to consider both its limits, and possibilities, for redressing this discriminatory practice.

While policy and reform debates focus on ownership and control measures, this book argues that such measures cannot be considered in isolation from other regulatory instruments, and that a holistic regulatory approach is required. As such, content regulation and competition regulation are also considered. Underlying the study is the contention that much of the policy informing pluralism and diversity regulation, although making reference to the importance of the media's role in the democratic process,

Access All Areas

Media law is a fast-developing area of scholarship that raises many high-profile and controversial questions. Recent issues include the use of privacy injunctions, the regulation of the press, the political power of media moguls, mass leaks of government information, and the responsibility of the digital media to prevent the spread of extreme content and fake news. This study looks at these issues and the key debates in

media law. The book includes chapters examining the protection of personal rights to reputation and privacy, the administration of justice, the role of government censorship, the protection of the newsgathering process, the regulation of the media and the impact of digital communications. The analysis is grounded in an account of media freedom that looks at the important democratic functions performed by the media and journalism. Examining various key themes, this study shows how those functions continue to evolve in a changing political culture and also how the media are subject to a range of legal and informal constraints. The book asks whether the law strikes the right balance in protecting media

freedom while preventing the abuse of media power, and considers the future of media law in the digital era. It is essential reading for students and scholars of media law alike. Sir Lenny Henry rang up the Office for National Statistics to confirm something he'd been thinking about for a long time. They told him that only 29.5% of the United Kingdom's population is made up of white, heterosexual, able-bodied men; so, he wonders, why do they still make up the vast majority of people we see in our media? Joining forces with the former Chair of the Royal Television Society's Diversity Committee Marcus Ryder, he draws on decades of experience to reveal why recent efforts to diversify media

have been thus far ineffective, and why they are simply not enough. With wit, humour and unflinching gravitas they analyse the flaws of current diversity initiatives, point out the structural and financial imbalances working against the cause, and provide clear solutions to get the media industry back on track. Access All Areas is an urgent, actionable manifesto that will dramatically shift the debate around diversity and the media.
