"Altogether superb; a worthy memorial to the victims of two and a half centuries past."--Kirkus Reviews, starred review
In 1755, New England troops embarked on a "great and noble scheme" to expel 18,000 French-speaking Acadians ("the neutral French") from Nova Scotia, killing thousands, separating innumerable families, and driving many into forests where they waged a desperate guerrilla resistance. The right of neutrality; to live in peace from the imperial wars waged between France and England; had been one of the founding values of Acadia; its settlers traded and intermarried

freely with native Mikmaq Indians and English Protestants alike. But the Acadians' refusal to swear unconditional allegiance to the British Crown in the mid-eighteenth century gave New Englanders, who had long coveted Nova Scotia's fertile farmland, pretense enough to launch a campaign of ethnic cleansing on a massive scale. John Mack Faragher draws on original research to weave 150 years of history into a gripping narrative of both the civilization of Acadia and the British plot to destroy it.

Hit the trail for a dramatic look at Wisconsin's geologic past. The impressive bluffs, valleys, waterfalls, and lakes of Wisconsin's state parks provide more than beautiful scenery and recreational opportunities. They are windows into the distant past, offering clues to the dramatic events that have shaped the land over billions

of years. Author and former DNR journalist Scott Spoolman takes readers with him to twenty-eight parks, forests, and natural areas where evidence of the state's striking geologic and natural history are on display. In an accessible storytelling style, Spoolman sheds light on the volcanoes that poured deep layers of lava rock over a vast area in the northwest, the glacial masses that flattened and molded the landscape of northern and eastern Wisconsin, mountain ranges that rose up and wore away over hundreds of millions of years, and many other bedrock-shaping phenomena. These stories connect geologic processes to the current landscape, as well as to the evolution of flora and fauna and development of human settlement and activities, for a deeper understanding of our state's natural history. The book includes a selection of detailed trail guides for each park, which hikers can take with them on the trail to view evidence of Wisconsin's geologic and natural history for themselves.

In this National Book Award-winning novel from a "brilliantly

breathhtaking writer,” a young Southerner searches for meaning in the midst of Mardi Gras (The New York Times Book Review). On the cusp of his thirtieth birthday, Binx Bolling is a lost soul. A stockbroker and member of an established New Orleans family, Binx’s one escape is the movie theater that transports him from the falseness of his life. With Mardi Gras in full swing, Binx, along with his cousin Kate, sets out to find his true purpose amid the excesses of the carnival that surrounds him. Buoyant yet powerful, The Moviegoer is a poignant indictment of modern values, and an unforgettable story of a week that will change two lives forever. This ebook features an illustrated biography of Walker Percy including rare photos from the author’s estate.

A Dominican-born academic tells the story of how the Great Books transformed his life—and why they have the power to speak to people of all backgrounds What is the value of a liberal education? Traditionally characterized by a rigorous engagement with the classics of Western thought and literature, this approach to education is all but extinct in American universities, replaced by flexible distribution requirements and ever-narrower academic specialization. Many academics attack the very idea of a Western canon as chauvinistic, while the general public increasingly doubts the value of the humanities. In Rescuing Socrates, Dominican-born American academic Roosevelt Montás tells the story of how a liberal education transformed his life, and offers an intimate account of the relevance of the Great Books today, especially to members of historically marginalized communities. Montás emigrated from the Dominican Republic to Queens, New York, when he was twelve and encountered the Western classics as an undergraduate in Columbia University’s renowned Core Curriculum, one of America’s last remaining Great Books programs. The experience changed his life and determined his career—he went on to

earn a PhD in English and comparative literature, serve as director of Columbia's Center for the Core Curriculum, and start a Great Books program for low-income high school students who aspire to be the first in their families to attend college. Weaving together memoir and literary reflection, Rescuing Socrates describes how four authors—Plato, Augustine, Freud, and Gandhi—had a profound impact on Montás's life. In doing so, the book drives home what it's like to experience a liberal education—and why it can still remake lives.

This collection of 150 great books is designed to motivate student exploration and is divided into ten units presenting experiences common to people in all times and societies. All

of the titles will not be suitable for all students, but something will interest each individual reader. We commonly think of society as made of and by humans, but with the proliferation of machine learning and AI technologies, this is clearly no longer the case. Billions of automated systems tacitly contribute to the social construction of reality by drawing algorithmic distinctions between the visible and the invisible, the relevant and the irrelevant, the likely and the unlikely – on and beyond platforms. Drawing on the work of Pierre Bourdieu, this book develops an original sociology of algorithms as social agents, actively participating in social life. Through a wide range of examples, Massimo Airoidi shows how society shapes algorithmic code, and how this culture in the code guides the practical behaviour of the code in the culture, shaping society in turn. The ‘machine habitus’ is the generative mechanism at work throughout myriads of feedback loops linking humans with artificial social agents, in the context of digital infrastructures and

pre-digital social structures. Machine Habitus will be of great interest to students and scholars in sociology, media and cultural studies, science and technology studies and information technology, and to anyone interested in the growing role of algorithms and AI in our social and cultural life.

A guide to books from and about British Columbia. It identifies 150 essential authors, such as Alice Munro, Earle Birney and Eric Nicol, who do not have one particular book that is outstanding but have enjoyed outstanding careers. It also describes many other authors and books that have played an important role in BC's history.

A companion title to 150 Great Books, this acclaimed sequel reviews classic and contemporary works. Each title contains a plot summary, three evaluation tools (a 20-question quiz, 5 short-answer questions, and a challenge essay question), answers and suggested responses, glossary of literary terms, and bibliographical entries. The 100 titles are grouped in

seven categories: Adventure and Survival (such as *Run Silent, Run Deep*, *Lord of the Flies*, and *A Walk Across America*) The Maturing Self (such as *The Stranger*, *Carrie*, and *Homecoming*) History in Fiction (such as *The Sun Also Rises*, *Gone with the Wind*, and *A Connecticut Yankee in King Arthur's Court*) Science Fiction, Fantasy, and the Supernatural (such as *The Last Unicorn*, *The Other*, and *The Martian Chronicles*) Social Issues and Moral Challenge (such as *Go Tell It on the Mountain*, *All the President's Men*, and *Skindeep*) Success and Achievement (such as *The Bell Jar*, *A Man Called Peter*, and *Up the Down Staircase*) Reflections of the Family (such as *Roots*, *Cold Sassy Tree*, and *Giants in the Earth*) Note: The original literary works are not included.

The Unnamable - so named because he knows not who he may be - is from a nameless place. He speaks of previous selves ('all these Murphys, Molloys, and Malones...') as diversions from the need to stop speaking altogether. But, as with the other novels in the trilogy, the prose is full of marvellous precisions, full of its own reasons for keeping going. ...perhaps the words have carried me to the threshold of my story, before the door that opens on my story, that would surprise me, if it opens, it will be I, will be the silence, where I am, I don't know, I'll never know, in the silence you don't know, you must go on, I can't go on, I'll go on.

How much power should a government have? How should it be exercised and regulated, and for what purposes should it be used? These have been important questions throughout history--but dangerous to ask. Speaking truth to power has

generally put a person at risk, and some of the world's most well-known political figures, philosophers, and artists were sent to prison for doing so. Some used their time behind bars to write important and influential books. Gandhi has this in common with Hitler, as well as with Martin Luther King Jr. and Cervantes.
