Great collector cars are still out there--just waiting to be found! Sadly, there is very little reality in reality TV. That wouldn't be so bad except for the fact that these shows are the only TV shows for the barn-find collector car aficionado. Barn Find Road Trip is the antidote to all the manufactured collector "reality" shows. It's a real-world, barn-find banzai run in which auto archaeologist Tom Cotter, his car collector pal Brian Barr, and photographer Michael Alan Ross embarked on a 14-day collector-car-seeking adventure with no predetermined destinations. It's barn-find freestyle! Roaming the Southeast, they documented their day-to-day car search in photos and through stories and interviews. This trip is absolutely real and the same kind of junket any gearhead with the skills, knowledge, and time can undertake. Cotter and company hit the road in Cotter's 1939 Ford Woody, the kind of car that opened doors and started the conversations that revealed where interesting cars were squirreled away. The result? The discovery of over 1,000

Abandoned junk to some, the rusty old steel shells of vehicles are treasures to others, holding memories of a bygone era, or the promise of a pristinely restored, radically customized automobile. Automotive photographer Will Shiers has captured these dreams on film for over ten years, and this volume collects his images between two covers for the first time. Here are the beautiful husks Shiers has found in the United States fields and barns, shops, and salvage yards across States. Divided into five categories General Motors, Ford, Chrysler, Independents, and Special Vehicles these wrecks and relics from 1910 to the 1970s come equipped with all the relevant information: history, model, location. The most comprehensive and beautifully photographed collection of abandoned cars ever

Tom Cotter returns to troll through Detroit and
discover long forgotten classics in Motor City Barn
Finds. You won't believe some of the rides he finds.
Detroit has been America's Motor City for decades. It's
home to Ford, General Motors, and Chrysler, as well
as numerous auto industry companies and specialty
and speed shops. At the same time, it's the poster child

for urban blight and dysfunction. It's truly a city of contrasts, which presented challenges and opportunities in equal measure to barn finder Tom Cotter. In *Motor City Barn Finds*, Cotter plies his trade in a locale rich with automotive history. Detroit's lost cars are abandoned in empty lots, resident in decrepit buildings, squirreled away in garages, and stashed in historic wrecking yards. Behind the wheel of his classic 1939 Ford Woodie, Cotter trolls the back streets and neighborhoods of this historic city looking for lost automotive gems accompanied by photographer Michael Alan Ross. As America's Motor City, Detroit is an emotional and historical mecca for car enthusiasts, capable of drawing hundreds of thousands of car people for events like Woodward Dream Cruise and attracting design-forward companies like Shinola. At the same time, it's intimidating to navigate, with numerous dodgy neighborhoods and risky abandoned factory sites. Add it all together and you have fascinating and intriguing opportunities to dig for barn-find gold.

Dodge Trucks

Audit Report and Financial Statements of the City, Its Boards and Commissions

With Dodge B-Series trucks becoming more rare with each passing year, it becomes more difficult to correctly identify an original condition truck. Drawing upon official Chrysler publications and a broad knowledge of original condition trucks, Dodge truck expert, Don Bunn, brings the restorer or buyer the information needed to correctly restore a truck or make an intelligent and informed purchase. It covers the entire line of 1948 through 1953 Dodge B-Series light, medium and heavy-duty models except Power Wagon, with a heavy emphasis on light-duty models because they are the most popular with collectors. Anyone with the desire to own, restore, or correctly identify an original condition Dodge B-Series truck needs this book!
