A contemporary ballad of heartbreak, failure, and unquenchable longing, this novel presents Don Lee at his best. Yadin Park is a talented alt-country musician whose career has floundered—doomed first by his homely looks and lack of stage presence and then by a progressive hearing disorder. His girlfriend, Jeanette Matsuda, might have been a professional photographer but for a devastating heartbreak in her teens. Now Yadin works for Jeanette's father's carpet-laying company in California while Jeanette cleans rooms at a local resort. When Yadin's former lover and musical partner, the celebrated Mallory Wicks, comes back into his life, all their most private hopes and desires are exposed, their secret fantasies about love and success put to the test. Drawn to the music of indie singer-songwriters like Will Johnson, who helped shape the lyrics in this book, Don Lee has written a novel that unforgettably captures America's deepest yearnings. Beautifully sad and laced with dark humor, Lonesome Lies Before Us is a profound, heartfelt romance, a soulful and memorable song.

*Do you drive with stress and frustration? Do you frequently complain about other drivers or get involved in hostile interactions with other motorists? Are you afraid for your teenage drivers in this climate of highway warfare? We're in the midst of an escalating epidemic of aggressive driving, which eats up 250 billion dollars a year in economic cost and causes the misery associated with 6 million injuries every year. Now the government has declared war on road rage with tough new laws that can land people in jail for behaviors they've used to doing every day.*Traffic psychology educators Dr. Leon James and Dr. Diane Nahl trace the aggressive driving problem to its roots in childhood when child passengers imbibed their parents' aggressiveness towards other motorists and their cynicism towards regulations and the law. By the time teenagers begin to drive they've been exposed to years of media portrayals of the fun and excitement of aggressive driving with no serious consequences. The authors argue that road rage and aggressive driving are common traffic emotions experienced by the vast majority of drivers. This authoritative book—the first to synthesize the subject of aggressive driving—presents conclusions of recent studies, highlights citizen action, and summarizes legislative and police initiatives. Besides vivid anecdotal evidence and personal stories of typical road rage incidents that we have all experienced, James and Nahl present self-tests that readers can use to estimate their own road rage tendency, and they prescribe activities to help every driver learn self-improvement and self-awareness skills behind the wheel. The authors outline their innovative three-step program to help people transform themselves from aggressive to supportive drivers.

This book redefines driver education for all drivers, including commercial drivers and truckers. Our traffic emotions need to be trained, the authors stress, and they provide the explanations and activities needed to strengthen critical thinking about road events. Leon James, Ph.D. (Honolulu, HI), the nation's foremost authority on road rage and aggressive driving, is frequently quoted in the nation's press and has raised the standard of discussion on this topic. His expert testimony at congressional hearings in July 1997 helped legislators to realize that aggressive driving is a cultural problem. Diane Nahl, Ph.D. (Honolulu, HI), is associate professor of Information and Computer Sciences in the Library and Information Science Program at the University of Hawaii and is the founder of the new field of Driving Informatics. Dr. Nahl and Dr. James have authored the RoadRageous aggressive-driving video course, which is used in driving schools and court-mandated traffic violator schools. They're also active in aggressive-driving prevention training for law enforcement, and their Web site at DrDriving.org provides services for older drivers, commercial drivers, and teen drivers.

Paratransit challenges conventional fixed-route, fixed-schedule systems of public transportation in the United States.

A commemorative history of fifty years of the iconic Ford Transit van, from the launch of the first-generation Transit in 1963, right up to the present day. Covering the full range of Transit models and with over three hundred photographs (including previously unpublished pictures from Ford's picture archive), Ford Transit - Fifty Years is an ideal resource for anyone with an interest in this world-beating commercial vehicle. Written by acknowledged Ford Transit expert Peter Lee, the book covers the development era, light commercial vehicles in the 1950s, the 'Project Redcap' prototypes and the first Transit. It goes on to describe the production and development of all eight generations and variants of Transits, including custom vans, camper vans, minibuses and special vehicle options. Specification guides, awards, and sales figures are all included as well as marketing worldwide. Finally, there are interviews with designers, engineers and Ford employees, along with owners' experiences. The Transit has and continues to receive numerous awards, voted 'International Van of the Year' in 2001 and 2013, and with the 2014 launch of the all-new two-tonne Transit and its pioneering technology, this looks to be only the first fifty years of the Ford Transit story. Fully illustrated with 200 colour and 100 black & white photographs, many previously unseen from Ford's archives.
