Jaishankar Prasad's epic poem Kamayani (1936) is a feast for intellectuals. It operates at three different levels: the gross or mythological, the emotional and the spiritual. Prasad infused the vision of a rishi, a sage, into this work. The reader experiences poetic currents of human emotions - anxiety, hope, desire, love, shyness, sorrow, conflict - and finally emerges at an elevated level of consciousness.

Gastrointestinal Malignancies Gastrointestinal (GI) cancers are common diseases worldwide. About 400,000 patients are diagnosed with esophageal cancer worldwide each year and nearly 330,000 die for this disease. Roughly 870,000 patients are newly diagnosed each year with gastric cancer and over 600,000 die from the disease each year. And 940,000 new cases of colorectal cancer are diagnosed annually and 490,000 patients die from this disease. Management options for patients with GI cancer have

undergone dramatic changes in the past decade. New cytotoxic agents, novel targeted agents, surgical and ablative options, as well as a new array of supportative medications have shown substantial progress. With the increased number of therapeutic options from which to choose, the clinician is better placed to offer effective therapy. At the same time the clinician is challenged to keep abreast of the rapidly changing treatment landscape and the newly emerging data that is shaping the options for treatment today and in the future. *Gastrointestinal Malignancies* provides a comprehensive and in-depth review of this group of malignancies. This volume reviews the current literature, provides critical evaluations of the data, and offers evidence-based recommendations. The editors and authors are leaders in their fields. The chapters update the current screening tools for colon cancers, assessment of predictive markers such as k-Ras and BRAF in the management of colon cancer as well as the state-of-the-art for use of both cytotoxic chemotherapy and the

incorporation of newer biological therapies. About the Series: Emerging Cancer Therapeutics is an invited review publication providing a through analysis of key clinical research related to cancer therapeutics, including a discussion and assessment of current evidence, current clinical best practice, and likely near future developments. There is an emphasis throughout on multidisciplinary approaches to the specialty, as well as on quality and outcomes analysis. Published three times a year Emerging Cancer Therapeutics provides authoritative, thorough assessments of advances in therapeutics in all major areas of oncology, both solid and hematologic malignancies, with a focus on advances in medical and biological therapies with emerging clinical impact and encompassing new technologies with implications for management such as molecular imaging. Features of the Emerging Cancer Therapeutics include: Editorial board of nationally recognized experts across the spectrum of Cancer Therapeutics In-depth, up-to-date expert reviews and

analysis of major new developments in all areas of Cancer Therapeutics Issues edited by an authority in specific subject area Focuses on major topics in Cancer Therapeutics with in-depth articles covering advances in clinical and translational research developments as well as clinical applications and experience Emphasizes multidisciplinary approaches to research and practice

Kabir was a 15th century Indian spiritual master who left a legacy of extraordinary poems which continue to capture the imagination of a diverse audience today. The poems downplay the importance of ritual and austerity, and teach that God is not confined to centers of worship or places of pilgrimage but found everywhere in creation. Most importantly, God is within us and this is where we must meet him. Kabir elevates us into the realm of the spirit - a world of beauty, majesty, even romance, where the relationship between lovers is a recurring metaphor for our relationship to the divine. For the last century, Rabindranath Tagore's classic translation, "Songs of

Kabir," has been the standard, but over the years it has suffered the ravages of time. In "Kabir Says," David Masterman has reworked Tagore's translation and breathed new life into it for the 21st century reader. But this edition goes beyond merely updating language and style; it considerably enhances the poetic form and flow of the English translation, and a new introduction and appendix have also been added to add depth to the reader's understanding.

'Sevasadan' is one of the most representative novels of Munshi Premchand. Soon after it was published, the novel kicked up national debates on such pertinent social issues as prostitution and the place of women in the Indian society. Social taboos dominated the scenario as much as reformers' zeal to tight the rot in the social value system. The story oscillates round a glamour-struck young girl's life. who was brought up with utmost love and care but whose father had to suffer ignominy at the hands of his adversaries for taking a once-in-lifetime bribe and being jailed for that. Her prospective engagement was broken because her mother, now made a destitute with her daughters, failed to meet the demand of dowry from the bridegroom's family. Hapless and stranded, she, along with her mother and sibling sister, was under care of her maternal-uncle. gets married to a middle-aged pauper and pushed to life-long poverty. She failed to get what she had been dreaming for since her childhood. She fought continual battles between

aspiration for a respected prosperous lifestyle, and the existing value system which forced her to live with poverty. By the turns of events she ends up into a life of a tawaif, hatefully tries to come out of the nuisance but the irony of fate makes her the centre-point of all debates on how prostitutes could be rescued and rehabilitated. 'Sevasadan' exposes the time Premchand lived in. It also reflects how seriously the author had waged a battle, which is being fought in the Indian society even today.

The Perfect Remedy for Cold Feet! More than half of all couples who become engaged this year will never make it to the altar. Why? Leading experts believe it's because couples fail to really get to know their potential mate before getting engaged.

Relationship expert and noted couples counselor Norm Wright steers potential brides and grooms through a series of soul-searching questions to discern if they've really met "the One." Couples will be much more confident about whether or not to pursue marriage after completing these in-depth and personal questions. Norm also addresses the delicate subject of calling off the wedding if readers discover that a potential mate isn't actually meant to be a life partner.

Among various Vargas, the relative importance of Navamsha is universally acclaimed. Astrologers consider it to be just next to birth chart or equal to birth chart or even better than the birth chart. Almost all astrologers use Navamsha and birth chart together to assess strengths of various houses and planets before giving any opinion. In Vedic astrology, Navamsha occupies an outstanding position and draws one's attention for deeper understanding/ scrutiny due to its multifarious technique and usage. The additional inputs in the form of scintillating concepts by Jaimini and Nadi system have made the subject more engrossing. The author has tried to

incorporate the same in the book. The study of a birth chart gives only the gross (Sthool) indications of characteristics of various houses and planets; while Navamsha offers their detailed (Sookshmatar) values. It is so because a Navamsha is basically equal to both in its size and extent to a quarter/ one fourth / pada of a Nakshtra, thereby giving it a stellar role. While a house represents a combined spectrum of 30 degrees, a Navamsha provides a microscopic view of 3° 20' or 1/ 9 part of a sign only.

Current interest in research of solidification of melts is focussed to understand crystal nucleation and crystal growth. They determine the solidified product with its physical properties. A detailed description of these processes lead to the development and validation of physical models, which may form the basis of quantitative modelling of solidification routes in e.g. casting and foundry

processes in order to develop a predictive capability in the design of materials during solidification. This book, based on a symposium held at EUROMAT 2003 aims to give an overview on current developments in the research of solidification and crystallisation of liquids. The materials of interest range from metals and their alloys over semiconductors and isolators to organic substances.

"The Slaves" is nothing but Frederick Douglass's groundbreaking autobiography and his first book "Narrative of the Life of Frederick Douglass, An American Slave, written by Himself". We have renamed the title here as "The Slaves" to keep the title short as well as to establish that Frederick Douglass is no longer a name of a particular slave born in nineteenth-century America, but a name that represents slaves of the entire world and of all time. Even though, we do not wish anyone to be born into slavery anymore like Frederick was, we have taken him as a symbol of all the slaves as a wish that all who

are still in slavery may have the spirit of Frederick Douglass and fight their ways to the freedom and work to free other slaves to make the slavery history. The life of Frederick, is in one way or another, is the lives of all other slaves. Hence, we have named this version of his book "The Slaves".

Translated by the author 'Tamasdrove the point home that ordinary people want to live in peace' The Guardian Set in a small-town frontier province in 1947, just before Partition, Tamas tells the story of a sweeper named Nathu who is bribed and deceived by a local Muslim politician to kill a pig, ostensibly for a veterinarian. The following morning, the carcass is discovered on the steps of the mosque and the town, already tension-ridden, erupts. Enraged Muslims massacre scores of Hindus and Sikhs, who, in turn, kill every Muslim they can find. Finally, the area's British administrators call out the army to prevent further violence. The killings stop but nothing can erase the awful memories from the minds of the survivors, nor will the various communities ever trust one another again. The events described in Tamas are based on true accounts of the riots of 1947 that Sahni was a witness to in Rawalpindi, and this new and sensitive translation by the author himself resurrects chilling memories of the consequences of communalism which
