Louder and Faster

A free open access ebook is available upon publication. Learn more at www.luminosoa.org. Louder and Faster is a cultural study of the phenomenon of Asian American taiko, the thundering, athletic drumming tradition that originated in Japan. Immersed in the taiko scene for twenty years, Deborah Wong has witnessed cultural and demographic changes and the exponential growth and expansion of taiko particularly in Southern California. Through her participatory ethnographic work, she reveals a complicated story embedded in memories of Japanese American internment and legacies of imperialism, Asian American identity and politics, a desire to be seen and heard, and the intersection of culture and global capitalism. Exploring the materialities of the drums, costumes, and bodies that make sound, analyzing the relationship of these to capitalist multiculturalism, and investigating the gender

politics of taiko, Louder and Faster considers both the promises and pitfalls of music and performance as an antiracist practice. The result is a vivid glimpse of an Asian American presence that is both loud and fragile. The inter-disciplinary contributors to Developmentalist Cities offer a richly nuanced and critical account of how the urban has been integral to East Asian developmentalism, and, vice versa, how developmentalism has profoundly shaped the nature of the urban in East Asia.

Why on earth would anyone give up a life on the open road for the regimen of a vast Japanese conglomerate? And is it really so different in Japan from everywhere else? Niall Murtagh spent years as a world traveller - hitchhiking to Istanbul, bussing to Kathmandu and crossing the Atlantic in a home-built yacht. In 1986 he closed the door on his adventurous life and settled down in Japan, eventually joining Mitsubishi as a Salaryman - a man in a shiny suit with a shiny attache case in a conglomerate with 100,000 employees. And what happens when you give up the Salaryman life? The book follows life after the corporation, giving fresh perspectives on the nature of Japanese business culture and the problems faced by outsiders in Japan.

Based on years of experience teaching and writing supplemental materials for more traditional precalculus books, Reva Narasimhan takes a functions-focused approach to teaching and learning algebra and trigonometry concepts. This new series builds up relevant concepts using functions as a unifying theme, repeating and expanding on connections to basic functions. Visualization and analysis motivate the functions-based approach, enabling users to better retain the material for use in later calculus courses.

It used to be that raves were grassroots organized, anti-establishment, unlicensed all-night drug-fueled dance parties held in abandoned warehouses or an open field. These days, you pay \$40 for a branded party at popular riverfront nightclubs where age and status, rather than DJ expertise and dancing, shape your experience. In Rave Culture sociologist Tammy Anderson explores the dance music, drug use and social deviance that are part of the pulsing dynamics of this collective. Her ethnographic study compares the Philadelphia rave scene with other rave scenes in London and Ibiza. She chronicles how generational change, commercialization, law enforcement, hedonism, and genre fragmentation fundamentally altered electronic dance music parties. Her analysis calls attention to issues of personal and collective identity in helping to explain

Jakou výbavu měla speciální série vozů Aston Martin, nazvaná Alfred Dunhill? Jak souvisí logo Maserati s fontánou z 16. století? Je slovo Aero spojeno jen s českou automobilkou, nebo najdeme vozy tohoto jména i v jiných částech světa? Co přesně jsou „dávové koně“? Vymysleli název Citroën Elysée říšské? Jak ovlivnil vývoj automobilového průmyslu fakt, že zakladatelé značky Ferrari a Lamborghini spolu nevycházeli? Ing. Jiří Fiala (publicista, automobilový historik a sběratel automobilové literatury) a doc. Petr Strossa (vědec, expert přes jazyky a dorozumívání s počítači) předkládají všem automobilovým fanatikům unikátní výkladový slovník jmen značek a jejich typů, který obsahuje hesla o přibližně 1600 značkách a více než 5000 typech a modelech. Čtenáři v knize najdou mimo jiné základní informace o výrobcích automobilů, jejich filozofii označování typů, používání interních kódů při recyklování názvů vozů. Dozvědí se, proč se jeden automobil prodával pod různými názvy, proč se některá jména nesměla používat nebo jakých dosáhly jednotlivé vozy sportovních úspěchů. Vše poprvé je u nás publikován systém kódů sovětských vozidel a pohled říšských značek a výrobců. Zvláštní pozornost je věnována značkám (logům) všech důležitých značek, jejich vzniku a proměnám v čase. Celá tato speciální problematika je navíc zasazena do kontextu společenských a geopolitických událostí a okolo ní

množstvím pozoruhodných historek a kuriozit souvisejících s auty, jejich jmény a výrobcí.

Like it or not, the automobile industry is now and will remain an overwhelming factor in the lives of most people - if not an owner and driver, then as a pedestrian or a breather of air, which is being polluted by the gas-guzzling and vile-air belching monsters created for our individual hedonistic pleasure. This book presents issues of current interest to those who cannot ignore their presence.

How Mass Collaboration Changes Everything

The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect
