An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is br jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many pare might ask family and friends for advice when faced with important choices about how to rais You might turn to parenting books or simply rely on timeworn religious or cultural traditions.

Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers can improve educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their parents yell at them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* gives you everything you need to know about the latest literature on parenting—with lessons that are as easy as pie. You'll be laughing and learning at the same time.

Essential tools such as multimeters (DVOM), oscilloscopes, and scan tools are discussed, with special attention given to the automotive multimeter needed to troubleshoot many modern sensors. You'll get step-by-step troubleshooting procedures ranging from safely jump starting a battery to diagnosing parasitic current drain and vehicle energy diagnosis. And you'll find detailed testing procedures for most problematic electrical components on your European car such as oxygen sensors, crankshaft and camshaft sensors, wheel speed sensors, fuel pumps, solenoids, and actuators.
