nations is on the rise,  
will matters only get  
worse? Or are there  
hopeful signs that  
effective, realistic  
solutions can be found?  
Blending a concise  
history of cars and  
their impact on the  
world, leading  
transportation experts  
Daniel Sperling and  
Deborah Gordon explain  
how we arrived at this  
state, and what we can  
do about it. Sperling  
and Gordon assign blame  
squarely where it  
belongs—on the auto-

industry, short-sighted government policies, and consumers. They explore such solutions as getting beyond the gas-guzzler monoculture, re-inventing cars, searching for low-carbon fuels, and more.

Promising advances in both transportation technology and fuel efficiency together with shifts in traveler behavior, they suggest, offer us a way out of our predicament. The authors conclude that the two places that have

**Introduction to Criminology, Tenth Edition, is a comprehensive introduction to the study of criminology, focusing on the vital core areas of the field—theory, method, and criminal behavior. With more attention to crime typologies than most introductory texts, authors Frank E. Hagan and Leah Elizabeth Daigle investigate all forms of criminal activity, such as organized crime, white collar crime, political crime, and environmental crime. The methods of operation, the effects on society and policy decisions, and the connection between theory and criminal behavior are all explained in a clear, accessible manner. of the automobiles, introduction in the automotive industry, and the traffic code, rules and signs. An automobile, usually called a car (an old word for carriage) or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with “motor” referring to what is now usually called the engine. It has seats for the driver and, almost without exception, for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction, in New York City, over 10,000 tons of manure had to be removed from the streets daily. However, in 2006 the automobile is one of the primary sources of worldwide air pollution and cause

There's "western," and then there's  
"Western"—and where history  
becomes myth is an evocative  
question, one of several questions  
posed by Josh Garrett-Davis in  
What Is a Western? Region, Genre,  
Imagination. Part cultural criticism,  
part history, and wholly  
entertaining, this series of essays  
on specific films, books, music, and  
other cultural texts brings a fresh  
perspective to long-studied topics.  
Under Garrett-Davis's careful  
observation, cultural objects such

as films and literature, art and artifacts, and icons and oddities occupy the terrain of where the West as region meets the Western genre. One crucial through line in the collection is the relationship of regional “western” works to genre “Western” works, and the ways those two categories cannot be cleanly distinguished—most work about the West is tinted by the Western genre, and Westerns depend on the region for their status and power. Garrett-Davis also seeks to answer the question “What is a Western now?” To do so, he brings the Western into dialogue with other frameworks of the “imagined West” such as Indigenous perspectives, the borderlands, and environmental thinking. The book’s mosaic of

information on the classic musical  
film Oklahoma!, a consideration of  
Native activism at Standing Rock,

the borderlands theory of Gloria  
Anzaldúa and the work of the indie  
rock band Calexico, as well as the  
author's own discipline of western  
cultural history. Richly illustrated,  
primarily from the collection of the  
Autry Museum of the American  
West, Josh Garrett-Davis's work is  
as visually interesting as it is  
enlightening, asking readers to  
consider the American West in new  
ways.

Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up." Provides information on the truck and specialty vehicles business, including: automotive industry

### Sierra Denali Service Manual

automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto

industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable

transmissions, "rodent snack" wiring, and mind-boggling depreciation Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar
