Before the "Big Three," even before the Model T, the race for dominance in the American car market was fierce, fast, and sometimes farcical. Car Crazy takes readers back to the passionate and reckless years of the early automobile era, from 1893, when the first US-built auto was introduced, through 1908, when General Motors was founded and Ford's Model T went on the market. The motorcar was new, paved roads few, and devotees of this exciting and unregulated technology battled with citizens who considered the car a dangerous scourge, wrought by the wealthy, that was shattering a more peaceful way of life. Among the pioneering competitors were Ransom E. Olds, founder of Olds Motor Works and creator of a new company called REO; Olds' cutthroat new CEO Frederic L. Smith; William C. "Billy" Durant of Buick Motor Company (and soon General Motors); and inventor Henry Ford. They shared a passion for innovation, both mechanical and entrepreneurial, but their maniacal pursuit of market share would also involve legal manipulation, vicious smear campaigns, and zany publicity stunts -- including a wild transcontinental car race that transfixed the public. Their war on wheels ultimately culminated in a courtroom battle that would shape the American car industry forever. Based on extensive original research, Car Crazy is a page-turning story of popular culture, business, and sport at the dawn of the twentieth century, filled with compelling, larger-than-life characters, each an American original.

The Battle for Supremacy between Ford and Olds and the Dawn of the Automobile Age

Growing Up Lebanese Muslim in Australia

In this remarkable oral history collection, thirty-three participants in the turbulent epic that began with the day of infamy at Pearl Harbor and ended with the signing of the surrender documents in Tokyo Harbor tell their stories. Their remembrances of heartbreak, frustration, heroism, hope, and triumph were collected over a period of twenty-five years by John T. Mason. Their recollections reveal perspectives and facts not included in traditional works of history. Each selection, introduced with a preface that places it in the context of the Pacific War, takes the reader behind the scenes to present the personal, untold stories of naval history. Included are Admiral William S. Sullivan's account of the problems involved in clearing Manila Harbor of some five hundred wrecked vessels left by the departing Japanese and Admiral Thomas C. Kinkaid's description of the communications breakdown at the Battle of Leyte Gulf. There are also the very personal recollections of humor and horror told by the unknown actors in the war: the hospital corpsman, the coxswain, and the machinist's mate. Originally published in 1986, this volume is an unusual and lasting tribute to the ingenuity and teamwork demonstrated by America's forces in the Pacific as well as a celebration of the human spirit

Through revised text, new photos, specialised illustrations, updated charts and additional information sidebars, The Ultimate Sniper once again thoroughly details the three great skill areas of sniping; marksmanship, fieldcraft and tactics.
