Literacy is a perennial 'hot topic' in Britain and other English-speaking countries. Concerns about falling standards and a 'literacy crisis' are frequently raised. In response, governments initiate new policies and teaching guidelines. This book addresses the current policies, practices and media debates in England, the US, Scotland and Australia. Literacy and Education examines: How literacy is taught to children in primary schools; The place of phonics in current policies and the arguments made for and against it; How teachers deliver phonics lessons and how children

engage with the method; The range of literacy practices children engage with throughout the school day and how they contribute to literacy learning; The contributions a social and critical perspective on literacy can make to current debates regarding teaching strategies; A wide range of research conducted in the UK, North America, Australia and other countries. Bringing together policy, practice and public debate and drawing on the author's extensive research in a primary school, this essential new textbook provides questions and tasks for readers to engage with. Literacy and Education is ideal for advanced undergraduate and postgraduate

students of literacy and education and students on PGCE courses. It will also be of interest to researchers and teachers.

Originally published in 1992. This book brings together the work of a number of distinguished international researchers engaged in basic research on beginning reading. Individual chapters address various processes and problems in learning to read - including how acquisition gets underway, the contribution of story listening experiences, what is involved in learning to read words, and how readers represent information about written words in memory. In addition, the chapter contributors consider how

phonological, onset-rime, and syntactic awareness contribute to reading acquisition, how learning to spell is involved, how reading ability can be explained as a combination of decoding skill plus listening comprehension skill, and what causes reading difficulties and how to study these causes. Complete coverage of the KS1 Math curriculum is provided in this accessible revision guide. Your child can prepare for in-school assessments and test with confidence. The engaging characters motivate children to test their knowledge and improve their understanding of the topics covered in school.

follows the adventures of a talking wooden puppet whose nose grew longer whenever he told a lie and who wanted more than anything else to become a real boy. As carpenter Master Antonio begins to carve a block of pinewood into a leg for his table the log shouts out, "Don't strike me too hard!"

Frightened by the talking log, Master Cherry does not know what to do until his neighbor Geppetto drops by looking for a piece of wood to build a marionette.

Antonio gives the block to Geppetto. And thus begins the life of Pinocchio, the puppet that turns into a boy. Pinocchio, The Tale of a Puppet is a novel for children by Carlo Collodi is about the

mischievous adventures of Pinocchio, an animated marionette, and his poor father and woodcarver Geppetto. It is considered a classic of children's literature and has spawned many derivative works of art. But this is not the story we've seen in film but the original version full of harrowing adventures faced by Pinnocchio. It includes 40 illustrations.

Why are girls outperforming boys in literacy skills in the Western education system today? To date, there have been few attempts to answer this question. Literacy and Gender sets out to redress this state of affairs by re-examining the social organization of literacy in primary schools. In

studying schooling as a social process, this book focuses on the links between literacy, gender and attainment, the role school plays in producing social difference and the changing pattern of interest in this topic both within the feminist community and beyond. Gemma Moss argues that the reason for girls' relative success in literacy lies in the structure of schooling and in particular the role the reading

Reading for pleasure urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. Building Communities of Engaged Readers highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers.

Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the

The Cambridge Primary Review Research Surveys is the outcome of the Cambridge Primary Review – England's biggest enquiry into primary education for over forty years. Fully independent of government, it was launched in 2006 to investigate the condition and future of primary education at a time of change and uncertainty and after two decades of almost uninterrupted reform. Ranging over ten broad themes and drawing on a vast array of evidence, the Review published thirty-one interim reports, including twenty-eight surveys of published research, provoking media

headlines and public debate, before presenting its final report and recommendations. This book brings together the twenty-eight research surveys, specially commissioned from sixty-five leading academics in the areas under scrutiny and now revised and updated, to create what is probably the most comprehensive overview and evaluation of research in primary education yet published. A particular feature is the prominence given to international and comparative perspectives. With an introduction from Robin Alexander, the Review's director, the book is divided into eight sections, covering: children's lives and voices: school, home and community children's development, learning, diversity and needs aims, values and contexts for primary education the structure and content of

Recognizing the characteristics
of children with learning
disabilities and deciding how to
help them is a problem faced by
schools all over the world.
Although some disorders are
fairly easily recognizable (e.g.,
mental retardation) or very
specific to single components of
performance and quite rare
(e.g., developmental
dyscalculia), schools must
consider much larger
populations of children with
learning difficulties who cannot
always be readily classified.
These children present high-

level learning difficulties that affect their performance on a variety of school tasks, but the underlying problem is often their difficulty in understanding written text. In many instances, despite good intellectual abilities and a superficial ability to cope with written texts and to use language appropriately, some children do not seem to grasp the most important elements, or cannot find the pieces of information they are looking for. Sometimes these difficulties are not immediately detected by the teacher in the early school years. They may be hidden because the most

obvious early indicators of reading progress in the teacher's eyes do not involve comprehension of written texts or because the first texts a child encounters are quite simple and reflect only the difficulty level of the oral messages (sentences, short stories, etc.) with which the child is already familiar. However, as years go by and texts get more complex, comprehension difficulties will become increasingly apparent and increasingly detrimental to effective school learning. In turn, studying, assimilating new information, and many other situations requiring text

comprehension -- from problem solving to reasoning with linguistic contents -- could be affected. Problems with decoding, dyslexia, and language disorders have attracted more interest from researchers than have specific comprehension problems and have occupied more room in specialized journals. Normal reading comprehension has also been a favorite with researchers. However, scarce interest has been paid to subjects who have comprehension difficulties. This book is an attempt to remedy this situation. In so doing, this volume answers the following
