"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Speaking is a dynamic, interpersonal process and one that strongly influences how we are perceived by others in a range of formal and everyday contexts. Despite this, speaking is often researched and taught as if it is simply writing delivered in a different mode. In Teaching and Researching Speaking, Rebecca Hughes suggests that we have less understanding than we might of important meaning-making aspects of speech such as prosody, gaze, affect, and the ways speakers collaborate and negotiate with one another in interaction. This thoroughly revised and updated second edition looks to the future of the field, offering: A new chapter on assessment, discussing 'high stakes' oral language testing contexts such as immigration New material considering access to spoken data via the worldwide web and new technologies that allow neurolinguistic insights formerly hidden from view Summaries and case studies to help the reader understand how to approach researching speaking and encourages practitioners to question the models of speaking that they are using in their classrooms. Reviewing materials and assessment practices in the light of current knowledge about spoken language, and highlighting areas for new work and collaboration between researchers and practitioners, this book will be a valuable resource for anyone involved in language teaching.

Starting in 1902 at a country school that had an enrollment of fourteen, Frank Boyden built an academy that has long since taken its place on a level with Andover and Exeter. Boyden, who died in 1972, was the school's headmaster for sixty-six years. John McPhee portrays a remarkable man "at the near end of a skein of magnanimous despots who...created enduring schools through their own individual energies, maintained them under their own absolute rule, and left them forever imprinted with their own personalities." More than simply a portrait of the Headmaster of Deerfield Academy, it is a revealing look at the nature of private school education in America.

The works of the Buddha can feel vast, and it is sometimes difficult for even longtime students to know where to look, especially since the Buddha never explicitly defined the framework behind his teachings. Designed to provide just such a framework, In the Buddha's Words is an anthology of the Buddha's works that has been specifically compiled by a celebrated scholar and translator. For easy reference, the book is arrayed in ten thematic sections ranging from "The Human Condition" to "Mastering the Mind" to "The Planes of Realization." Each section comes with introductions, notes, and essays to help beginners and experts alike draw greater meaning from the Buddha's words. The book also features a general introduction by the author that fully lays out how and why he has arranged the Buddha's teachings in this volume. This thoughtful compilation is a valuable resource for both teachers and those who want to read the Buddha on their own.

Deeper learning, dialogic learning, and critical thinking are essential capabilities in the 21st-century environments we now operate. Apart from being important in themselves, they are also crucial in enabling the acquisition of many other 21st-century skills/capabilities such as problem solving, collaborative learning, innovation, information and media literacy, and so on. However, the majority of teachers in schools and instructors in higher education are inadequately prepared for the task of promoting deeper learning, dialogic learning, and critical thinking in their students. This is despite the fact that there are educational researchers who are developing and evaluating strategies for such promotion. The problem is bridging the gap between the educational researchers' work and what gets conveyed to teachers and instructors as evidence-based, usable strategies. This book addresses that gap: in it, leading scholars from around the world describe strategies they have developed for successfully cultivating students' capabilities for deeper learning and transfer of what they learn, dialogic learning and effective communication, and critical thought. They explore connections in the promotion of these capabilities, and they provide, in accessible form, research evidence demonstrating the efficacy of the strategies. They also discuss answers to the questions of how and why the strategies work. A seminal resource, this book creates tangible links between innovative educational research and classroom teaching practices to address the all-important question of how we can realize our ideals for education in the 21st century. It is a must read for pre-service and in-service teachers, teacher educators and professional developers, and educational researchers who truly care that we deliver education that will prepare and serve students for life.

New Directions in Second Language Pragmatics brings together varying perspectives in second language (L2) pragmatics to show both historical developments in the field, while also looking towards the future, including theoretical, empirical, and implementation perspectives. This volume is divided in four sections: teaching and learning speech acts, assessing pragmatic competence, analyzing discourses in digital contexts, and current issues in L2 pragmatics. The chapters focus on various aspects related to the learning, teaching, and assessing of L2 pragmatics and cover a range of learning environments. The authors address current topics in L2 pragmatics such as: speech acts from a discursive perspective; pragmatics instruction in the foreign language classroom and during study abroad; assessment of pragmatic competence; research methods used to collect pragmatics data; pragmatics in computer-mediated contexts; the role of implicit and explicit knowledge; discourse markers as a resource for interaction; and the framework of translingual practice. Taken together, the chapters in this volume foreground innovations and new directions in the field of L2 pragmatics while, at the same time, ground their work in the existing literature. Consequently, this volume both highlights where the field of L2 pragmatics has been and offers cutting-edge insights into where it is going in the future. In this book the authors examine how language has adapted to the rapid changes in communication technology. It is especially timely in the light of the internet and its effect upon human interaction.
