Miles C. Collier asks: should we really let go of the vast amounts of collective knowledge that resides in automobiles? If not, how can we hold on to it? ?Archaeology isn't just about digging in grubby trenches. It is a way of thinking about the past and applying our imagination to the future. Miles C. Collier's remarkable analysis applies this thought process to cars. ?Miles C. Collier brings an archaeological point of view to the pithy matter of deciding how we understand and treat our automobiles, and how we pass this knowledge to generations to come. ?This book combines scholarship, pertinent anecdotes, style, and experience to provide a stimulating account of why we should all be archaeologists now.

p.p1 [margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial] Without question, the 1964-1/2 Mustang is one of the most important and influential cars in automotive history. When Ford launched the Mustang, it created an automotive revolution. Award-winning designer and stylist Gale Halderman was at the epicenter of the action at Ford, and, in fact, his initial design sketch formed the basis of the new Mustang. He reveals his involvement in the project as well as telling the entire story of the design and development of the Mustang. Authors and Mustang enthusiasts James Dinsmore and James Halderman go beyond the front doors at Ford into the design center, testing grounds, and Ford facilities to get the real, unvarnished story. Gale Halderman offers a unique behind-the-scenes perspective and firsthand account of the inception, design, development, and production of the original Mustang. With stinging losses from the Edsel fresh in minds at Ford, the Mustang project was an uphill battle from day one. Lee Iacocca and his assembled team had a herculean task to convince Henry Ford II to take a risk on a new concept of automobile, but with the help of Hal Sperlich's detailed market research, the project received the green light. Henry Ford II made it clear that jobs were on the line, including Iacocca's, if it failed. The process of taking a car from sketch to clay model to prototype to preproduction and finally finished model is retraced in insightful detail. During the process, many fascinating experimental cars, such as the Mustang I two-seater, Mustang II prototype, Mustang Allegro, and Shorty, were built. But eventually the Mustang, based on the existing Ford Falcon, received the nod for final production. In a gala event, it was unveiled at the 1964 World's Fair in New York. The Mustang received public accolades and critical acclaim, and soon it became a runaway hit. After the initial success, Ford designers and Gale Halderman designed and developed the first fastback Mustangs to compliment the coupes. The classic Mustang muscle cars to follow, including the GT, Mach 1, and others, are profiled as well. The Mustang changed automotive history and ushered in the pony car era as a nimble, powerful, and elegantly styled sports coupe. But it could so easily have stumbled and wound up on the scrap pile of failed new projects. This is the remarkable and dramatic story of how the Mustang came to life, the demanding design and development process, and, ultimately, the triumph of the iconic American car.

REVIEWS MUST read!, May 6, 2008 By G.P. - See all my reviews This is definitely a must read for anyone, Doors fan or not. It's one of the best bios I've read. No 'fluff' here. Paul tells it like it is, and has had an amazing life. His time with the Doors is well documented but he doesn't get enough credit for being THE Doors official photographer and filmmaker. You'll read about his time spent with the Doors, not to mention being one of Morrison's pals. Be prepared to read stories you've never read before. Even if you're not a Doors fan, the book is still a great read. Paul's life was and still is interesting to say the least. You'll be amazed at some of the people Paul knows and worked with. Everything is covered here including his adventures in Thailand, his ranch in New Mexico and his career in the movie industry. I give this book two thumbs up. Check it out! I read Paul's book and it was a big surprise. As a huge Doors fan, I'm aware of his well known photographic and film work for the band and his close relationship with them (mainly with Jim and Ray since the UCLA Days). In the meantime there are lots of details in this book who will delight the fans, details of journeys, partnership, work and so on.... But... Paul's life was much more than Jim and the boys "momento" (Jim and the "blue lady" at the book's cover is just one of the highlights of the all experience). . Hold your breath. you will be on board of a fantastic trip into childhood, family, friends, girls, party, cinema, music, "sex, drugs and rock n'roll", cars, jail, joy, death, love, etc, Rui

The Discourse of News Values breaks new ground in news media research in offering the first book-length treatment of the discursive construction of news values through words and images. Monika Bednarek and Helen Caple combine in-depth theoretical discussion with detailed empirical analysis to introduce their innovative analytical framework: discursive news values analysis (DNVA). DNVA allows researchers to systematically investigate how reported events are "sold" to audiences as "news" (made newsworthy) through the semiotic resources of language and image. With an interdisciplinary and multi-methodological approach, The Discourse of News Values analyzes authentic news discourse (both language and images) from around the English-speaking world through three new case studies: one that analyzes newsworthiness around the topic of cycling/cyclists; another that analyzes news values in images disseminated by news media organizations via Facebook; and a third that focuses on news values in "most shared" news items. Introducing readers to the possibilities of both DNVA and corpus-assisted multimodal discourse analysis (CAMDA), The Discourse of News Values brings together corpus linguistics and multimodal discourse analysis in a stimulating and unique book for researchers in Linguistics, Semiotics, Critical Discourse Analysis and Media/Journalism Studies.

The Ford Boss Mustang is the most iconic pony car ever created, and this book covers it more extensively than any other. Boss Mustang: 50 Years—a fully expanded version of Mustang Boss 302—includes the complete history of its creation: racing and street histories of both the 302 and 429 models; and photos and interviews with Boss Mustang designers, engineers, racers, and more. Of all the legendary names in the history of the Ford Mustang, one stands apart: Boss. Originally created to homologate the new Boss 302 engine and option package for SCCA Trans-Am racing, the Mustang Boss 302 debuted for the 1969 model year and was built in limited numbers for the street through 1970. This book features never-before-seen production and racing photography, interviews with designers and engineers, and keen insight from author Donald Farr, a renowned Ford historian and Ford hall-of-fame inductee. Designed by the legendary Larry Shinoda, the Boss cars were easily distinguished from their less potent stablemates by their race-bred powerplant, standard front spoiler, and bold graphics. In 2012, Ford at long last revived this most revered of all Mustang models. With a new racing counterpart and a modern street version that delivers more than 440 horsepower, the Boss was truly back! In 2013, Ford rolled out the Boss one more time. In Boss Mustang: 50 Years, Mustang historian Donald Farr offers a complete history of the car—from its late 1960s origins in Ford's boardrooms through its Trans-Am successes and untimely demise in 1970, up to the conception and development of the spectacular, limited-edition 2012 and 2013 Boss Mustangs. Packed with brilliant photography and firsthand accounts from the people who created the original Boss, as well as the team that resurrected Ford's most iconic Mustang for the 21st century, this is the story every Mustang enthusiast has been waiting to read.

In the 1960s, model kit building was a huge hobby. Kids built plastic kits of planes, tanks, race cars, space ships, creatures from scary movies, you name it. Before baseball card collecting, Pokémon, and video games, model kit building was one of the most popular hobby activities. Car and airplane kits were the most popular, and among the car kits, muscle cars, as we know them today, were one of the most popular categories. Many owners of real muscle cars today were not old enough to buy them when the cars were new, of course. Yet kids of the 1960s and 1970s worshiped these cars to an extent completely foreign to kids today. If you couldn't afford or were too young to buy a muscle car back then, what could you do? For many, the next best thing was to buy, collect, and build muscle car kits from a variety of kit companies. Hundreds were made. Many of these kits have become collectible today, especially in original, unassembled form. Although people still build kits today, there is a broad market for collectors of nostalgic model kits. People love the kits for the great box art, to rekindle fond memories of building them 40 years ago, or even as a companion to the full-scale cars they own today. Here, world-leading authority Tim Boyd takes you through the entire era of muscle car kits, covering the options, collectability, variety availability, and value of these wonderful kits today. Boyd also takes you through the differences between the original kits, the older reproduction kits, and the new reproduction kits that many people find at swap meets today. If you are looking to build a collection of muscle car kits, interested in getting the kits of your favorite manufacturer or even just of the cars you have owned, this book will be a valuable resource in your model kit search.
