The Fuzzy Systems and Data Mining (FSDM) conference is an annual event encompassing four main themes: fuzzy theory, algorithms and systems, which includes topics like stability, foundations and control; fuzzy application, which covers different kinds of processing as well as hardware and architectures for big data and time series and has wide applicability; the interdisciplinary field of fuzzy logic and data mining, encompassing applications in electrical, industrial, chemical and engineering fields as well as management and environmental issues; and data mining, outlining new approaches to big data, massive data, scalable, parallel and distributed algorithms. The annual conference provides a platform for knowledge exchange between international experts, researchers, academics and delegates from industry. This book includes the papers accepted and presented at the 5th International Conference on Fuzzy Systems and Data Mining (FSDM 2019), held in Kitakyushu, Japan on 18-21 October 2019. This year, FSDM received 442 submissions. All papers were carefully reviewed by program committee members, taking account of the quality, novelty, soundness, breadth and depth of the research topics falling within the scope of FSDM. The committee finally decided to accept 137 papers, which represents an acceptance rate of about 30%. The papers presented here are arranged in two sections: Fuzzy Sets and Data Mining, and Communications and Networks. Providing an overview of the most recent scientific and technological advances in the fields of fuzzy systems and data mining, the book will be of interest to all those working in these fields.

The thoroughly revised & Upgraded 7th edition of the book Crack IAS Prelims General Studies (CSAT) - Paper 2 is an exhaustive book capturing all the important topics being asked in the last few years of the IAS Prelim exam. • The book has been divided into 9 Units & 40 Chapters. • Each chapter porovides theory along with an Exercise in every chapter with fully solved past CSAT questions from 2011 onwards. • The book has separate units for Comprehension and English Language Comprehension. • English Language RC passage covers all literary styles. • Exhaustive exercise of situation-based questions to test decision making and administrative course of action. • Vast variety of situation-based questions to test Interpersonal Skills including Communication Skills. • Questions of Critical Reasoning based on Passages and Puzzles that are mostly asked in the exam, are covered with almost all varieties of questions in very large number. • Miscellaneous graphs as asked in 2018 Symmetric and Skew Distribution of Data as asked in 2015 are provided in the Data Interpretation unit of this book. • The Exercise covers the fully solved past CSAT questions from 2011 onwards.

In all the book contains 3000+ MCQs with detailed solutions. The book provides 5 Mock Tests with Solutions on the exact pattern as followed in the last CSAT paper.

Origami, the art of paper folding, has a rich mathematical theory. Early investigations go back to at least the 1930s, but the twenty-first century has seen a remarkable blossoming of the mathematics of folding. Besides its use in describing origami and designing new models, it is also finding real-world applications from building nano-scale robots to deploying large solar arrays in space. Written by a world expert on the subject, Origametry is the first complete reference on the mathematics of origami. It brings together historical results, modern developments, and future directions into a cohesive whole. Over 180 figures illustrate the constructions described while numerous 'diversions' provide jumping-off points for readers to deepen their understanding. This book is an essential reference for researchers of origami mathematics and its applications in physics, engineering, and design. Educators, students, and enthusiasts will also find much to enjoy in this fascinating account of the mathematics of folding.

JEE Advanced 16 Year-wise Solved Papers 1 & 2 (2021 - 2006) is the Most Important Resource for success in JEE Advanced. The book consists of the detailed solutions of the past 16 year papers of JEE Advanced - IIT-JEE (2006 to 2012) and JEE Advanced (2013 - 2021) Papers 1 & 2 to ANALYSE (the pattern, level of questions etc.) the exam; The book also provides the Trend Analysis of last 9 years in all the 3 subjects.

The updated and expanded third edition of this book focuses on the multi-disciplinary coupling between flight-vehicle hardware alternatives and enabling propulsion systems. It discusses how to match near-term and far-term aerospace vehicles to missions and provides a comprehensive overview of the subject, directly contributing to the next-generation space infrastructure, from space tourism to space exploration. This holistic treatment defines a mission portfolio addressing near-term to long-term space transportation needs covering sub-orbital, orbital and escape flight profiles. In this context, a vehicle configuration classification is introduced covering alternatives starting from the dawn of space access. A best-practice parametric sizing approach is introduced to correctly design the flight vehicle for the mission. This technique balances required mission with the available vehicle solution space and is an essential capability sought after by technology forecasters and strategic planners alike.

This book helps meet an urgent need for theorized, accessible and discipline-sensitive publications to assist science, technology, engineering and mathematics educators. The book introduces Legitimation Code Theory (LCT) and demonstrates how it can be used to improve teaching and learning in tertiary courses across the sciences. LCT provides a suite of tools which science educators can employ in order to help their students grasp difficult and dense concepts. The chapters cover a broad range of subjects, including biology, physics, chemistry and mathematics, as well as different curriculum, pedagogy and assessment practices. This is a crucial resource for any science educator who wants to better understand and improve their teaching.

A Pigovian Approach for 21st Century Markets

12 years JIPMER Topic-wise Solved Papers with 5 Mock Tests consists of past years (memory based) solved papers from 2008 onwards till date, distributed in 29, 31, 38, 1 & 1 topics in Physics, Chemistry, Biology, English Language & Comprehension and Logical & Quantitative Reasoning respectively. The book contains 2400 past MCQs. The book also contains 5 FULLY SOLVED MOCK TEST ON THE LATEST PATTERN.

In today's increasingly globalized environment, many economic fundamentals need to be reconsidered in order to regain stability in the global marketplace. One such consideration is the failing dynamics of the international tax infrastructure. Neoliberalism 2.0 brings a 21st century assessment of the Pigovian taxes, considering a completely new calibration of the international tax systems, inspired by the historically developed Pigovian tax model. The book considers the impact neoliberalism had and will have on regulatory infrastructure, democracy in an era of globalization and reduced legitimation of the national state. The Pigovian model brings home the often forgotten relationship between taxation (as a part of the regulatory sphere), macro-economics, and the political-philosophical context in which law and economics emerge. The model also takes into account the phenomena of globalization and financialization and is tested using the financial sector as an example. This book addresses the many challenges a Pigovian shift would imply for the sovereign and its national economies. Neoliberalism

2.0 demonstrates the ability to design a paradigm-changing alternative to the current tax infrastructure, while taking into account a low economic growth environment of the future, the implications of globalization and the changing relationship between citizens and their state.
