Arrow of God.

The author is from the Institute of Development Studies at the University of Zimbabwe. He examines the paradox ensuing from the Lancaster House Settlement at Zimbabwe's independence, that whilst colonial rule was ended, the framework was provided for continued white privilege, on the basis of control of the economy by this elite - and through them, transnational capital. He analyses the responses of the ruling (including official) elite, the black petty bourgeoisie, and the group associated with the former Rhodesian Front.

This book, which is the first to be published in the emerging field of farm-level microsimulation, highlights the different methodological components of microsimulation modelling: hypothetical, static, dynamic, behavioural, spatial and macro-micro. The author applies various microsimulation-based methodological tools to farms in a consistent manner and, supported by a set of Stata codes, undertakes analysis of a wide range of farming systems from OECD countries. To these case studies, O' Donoghue incorporates farming policies such as CAP income support payments, agri-

The universality of the problematics with urban education, together with the importance of understanding the context of improvement interventions, brings into sharp focus the importance of an undertaking like the International Handbook of Urban Education. An important focus of this book is the interrogation of both the social and political factors that lead to different problem posing and subsequent solutions within each region.
