Bernhard Rieger reveals how a car commissioned by Hitler and designed by Ferdinand Porsche became a global commodity on a par with Coca-Cola. The Beetle's success hinged on its uncanny ability to capture the imaginations of executives, engineers, advertisers, car collectors, suburbanites, hippies, and everyday drivers across nations and cultures.

The book was prepared by the academics and doctoral students of the Faculty of International Business and Economics of the Poznań University of Economics and Business to celebrate the 90th anniversary of the University and the 10th anniversary of the Faculty itself. The subject of this Volume reflects the variety of issues that are researched by academics from all departments of the Faculty. The rationale for publishing this Volume was to signal current work and research progress in the area of international economics, business and management. As the title of the Volume suggests, we need to anticipate changes and implement a new approach to face the challenges in the world economy for it is transforming in an unprecedented way now, at a fast pace, and the global economic map is constantly redrawing. Papers published in this Volume are written by individual authors and workgroups. They are results of research conducted in departments and have been assigned to eight chapters discussing crucial aspects of the world economy. The deliberations are held on a micro- and macroeconomic level in both theoretical and empirical terms. We hope that the contents of individual papers will inspire both readers and authors themselves to make further studies, to carry out follow-up research, to network with one another in order to find answers to the most important problems of the world economy and international business.

Dayla Evans has suffered the loss of her son, and then her husband. Her Christian faith and support from her church, family, and friends help to ease her emotional pain but her life has become a rigid routine as she immerses herself in her job teaching hearing impaired students. Although she is content living alone, she misses the companionship of someone to share her love for hiking. Unbeknownst to Dayla, when she is pressured to attend her co-worker's end-of-the-school-year celebration, it is the beginning of something remarkable. Dayla meets Kent, another outdoor enthusiast, at the party. Eventually, the two plan a week-long Autumn backpacking trip in the Great Smoky Mountains National Park of Tennessee. Unforeseen circumstances interfere with their plans. Dayla's faith gives her the courage and determination to proceed with the backpack trip, but something terrifying happens along the way. The events that coincide, confirm her belief that, although we may not have control of all that happens in life, we are given free-will to make choices in whatever good, or bad, comes our way. "No Accidents" is the story of coinciding events during an adventure in the beautiful Smoky Mountains, and how one woman, and one man, develop a heightened awareness of the meaningful messages God sends. It encourages the reader to pay attention to situations and coinciding events that arise in our own lives and to appreciate that, if we are open to it, God will provide the guidance for making choices that leads to something wonderful.

In The China Paradox: At the Front Line of Economic Transformation, Harvard University-based historian of modern China and business strategist Dr. Paul G. Clifford documents the twists and turns of China's dramatic and unforeseen rise over the last four decades. He sheds light on the delicate and fragile balance of forces at the heart of the success of China's hybrid model, explaining how the ruling Communist Party boldly led the nation's economic reforms as the surest way to preserve its grip on political power. Five years after this book was first published, much has changed within China and in its relationship with the world. This second edition provides extensive fresh new material. It explains how China has raised its game, moving from a catch-up mode to technological innovation in some areas, while still languishing in technology dependence in other respects. Earlier, China had shown signs that its driving spirit was faltering with its sails flapping. Under Xi Jinping, renewed energy has been injected. But at the same time Xi and his party have strongly reinforced their control across society and the economy, posing the question of whether Xi's New Era in fact marks a retreat from the reforms. This second edition contains two new chapters. One profiles Huawei, a national champion in advanced technology. Another focuses on China's frictions with the world which have been fueled by a perception that its technology progress threatens US global dominance, coupled with China's human rights record. In addition, against a background of the challenges faced by Alibaba and other firms, there is analysis of this watershed in China's private sector's autonomy. There is also extensive new insight into Xi Jinping's rule. As it celebrates its 100th anniversary in 2021, the Chinese Communist Party displays strong optimism over its continued governance of China. But that should not mask the longer-term risks to China's development and stability if its hybrid model continues to unravel as reforms are abandoned in favor of heightened autocracy.

The Volkswagen Beetle is the most successful car in the history of the automobile and over twenty million examples have been built. Conceived by Adolf Hitler in the spirit of the Model T Ford and designed by Ferdinand Porsche in the 1930s, the Beetle did not enter series production until 1945, after the ending of the Second World War. Its familiar but unconventional lines have since become recognisable throughout the world and, incredibly, it is still being built at VW's Mexican factory. This edition brings the story up to date and charts the arrival and evolution of the New Beetle, visually inspired by the original, which appeared in 1998. About the author Jonathan Wood is a founder member of the staff of Classic Cars, the magazine which gave its name to the movement. He is the author of some 35 books, which include an acclaimed history of the Volkswagen Beetle. Other titles for Shire by this author are: The Bean Austin Seven The Citroen The Bullnose Morris Classic Cars The Model T Ford The Rolls-Royce

A Drama of the American Workplace

Sideways From Japan to America

Dreamed up by drivers trying to outdo each other on the mountain passes of Japan, the art of the sideways descent of a switchback-what Wired described as "the fishtailing ballet of burning rubber called drifting"-has made it to the United States in a big way. What began as a new kind of daredevil driving among teens has, over two decades, become a sanctioned sport, making its way across the Pacific through video games and magazines, anime and the Internet, to take root in California's fertile underground racing culture. Drifting tells the story of drifting from its arrival on the West Coast to its emergence as the hottest form of motorsport in the United States. A dramatic visual record of the sport in America that includes over 400 photos, the book also profiles the people, teams, techniques, web sites, publications, videos, and trends that have made drifting the phenomenon that it is today. For the curious newcomer, author Antonio Alvendia's introduction succinctly explains what drifting is, setting the stage for the thrilling automotive drama that then unfolds. For the veteran drifting fan, this book is the first illustrated book on the latest motorsport to conquer the world.

This sourcebook offers a unique summary into all that was important in primary education during the 1990s. It provides almost fifty key readings on the field which are grouped around six major topics: * learners * teachers * classrooms * curriculum * assessment * school and education policy. Over half of the readings focus on real life cases - such as pupils, teachers, classrooms or schools - as a means of conveying some of the interpersonal subtleties of teaching and learning in primary schools. At the same time, these cases highlight important current topics and debates in primary education and often provide insights into practical ways of meeting the challenges which are posed. Other articles are more explicitly analytical and provide conceptual frameworks, overviews or critiques of their fields. This is an excellent resource and guide for primary school teachers, and students studying on PGCE courses.

This is the first significant publication to explore the output of Matt Keegan, the New York-based artist known for his work across mediums, as well as independent publishing including the acclaimed editioned art journal North Drive Press. This monograph expands on a recent solo exhibition by the artist at Rogaland Kunstcenter; Stavanger, Norway, titled "Portable Document Format." The show was organized as an idiosyncratic retrospective, with Keegan remaking sculptures dating from 2006 to 2015, initially fabricated in Sheetrock and steel, in cardboard. Like the exhibition, the publication serves both as a project and a reference for the artist's work. Essays by Tom McDonough and John Miller theorize Keegan's production, while interviews with Sara VanDerBeek and Anna Craycroft underscore the artist's ongoing engagement with his peer group. Furthered by contributions from colleagues Uri Aran, Leslie Hewitt and James Richards, situated alongside full-color installation photos and reproductions of work from the past decade, Matt Keegan: OR provides a solid introduction and layered overview of the artist's multifarious practice.

The Porsche 914 was born into consistently confusing and troubled times at Porsche and Volkswagen, not least with the idea of a non-911 Porsche horrifying many at the time. A Porsche with an engine that wasn't in the back was simply unthinkable. Richard Gooding examines the story of a car of mixed parentage, which against the odds became a success in its relatively short, six-and-a half year lifespan. Around 119,000 cars were sold from 1969 to 1975, outselling contemporary rivals such as the Opel GT, and meaning it was the first mid-engined car to achieve six-digit sales. As a present-day classic, although challenging to some, low-slung looks and bright colours make the 1970s 914 period-perfect. Combined with near-ideal weight distribution and a low centre of gravity, its mid-engine layout means the 914 can achieve cornering G-forces comparable to the contemporary 911. The 914 was seen as a car that could inject a shot of glamour into VW's slightly worthy and dependable range of air-cooled cars. This book covers the history, development and manufacture of the 914 through troubled times at Porsche and Volkswagen and studies the impact of its design upon its successors. Buying and owning a 914 today is covered, and the book is illustrated with 218 colour photographs.

Ob in der Politik, der Wirtschaft oder den Medien - Vertrauenskrisen umgeben uns alltäglich und sind für die betroffenen Krisenakteure nicht nur reputationsschädigend, sondern auch existenzbedrohend. Im Blickpunkt von Unternehmen in der Vertrauenskrise steht der Diskurs um den so genannten "VW-Dieselskandal". Absolut schlüssig und zugleich bislang kaum umgesetzt wird der Dieselskandal konsequent als Vertrauenskrise betrachtet und sich auf den Versuch des Volkswagenkonzerns konzentriert, Vertrauen in zentralen Absatzmärkten durch strategische öffentliche Kommunikation zurückzugewinnen. Durch Hinzuziehen des Vertrauensbegriffs und der ausdifferenzierten Diskursanalyse wird ein Forschungsdesiderat ausgefüllt, welches die Sprachhandlungsmuster und Strategien von Krisen- und Vertrauenskommunikation nicht nur aufdeckt, sondern gleichzeitig auch ihre kulturellen Spezifika und Bedingungen hervorhebt. Allgemeine Ausgangsthese ist, "dass Krisen nicht nach ein- und derselben Strategie in jedem Land bzw. Kultur gleich bewältigt werden können. Vielmehr könnte die Vermittlung an die Zielgruppe im Rahmen ihrer spezifischen Kultur im jeweiligen Landesmarkt ein entscheidender Faktor sein." Unternehmen in der Vertrauenskrise eröffnet eine spannende interdisziplinäre Perspektive zur Krisenkommunikationsforschung von Organisationen nicht nur aus etablierter soziologisch-wirtschaftswissenschaftlicher Perspektive, sondern führt diesen Forschungsbereich auf einschlägige Weise neu in die Kultur- und Medienwissenschaft ein.
