Enna is a girl who doesn't believe in herself and often utters the phrase "I can't do that!" One night in a dream she sees all the possible future versions of herself, discovering that she can be any of those versions with time, knowledge and dedication. She develops a growth mindset throughout her journey and instead of saying "I can't do that," she learns to say "I can't do that YET!"

I Can't Do That, Yet

This volume of original stories is all for furry feline friends. A unique collection of fantastical cat tales.

This book explores the 'photo story' through 61 master classes by some of the world's greatest photographers, all members of the international photographic agency Magnum.

Growth Mindset

Dusk features some of the most masculine, perfectly and naturally built, handsome and sensual naked men within a stunning array of hauntingly beautiful and raw outback settings. Paul Freeman has established himself at the pinnacle of his craft, not only as a photographer, but as a visual poet and artist eulogizing as he captures the spirit of the rugged yet sensitive Australian male in all his physical glory. His genius is to find the right men to photograph and then tell an enthralling story with his vision from behind the camera. From the quality of the compositions and the lighting through to the texture of the outback locations, these are some of the most perfectly executed and delightful photographs in any collection, and set a tone of sophistication so rarely achieved in books of the male nude.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A.

Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

This book offers a fascinating insight into ideas in the making - a glimpse into some of the early debates inside the History Group of the Communist Party of Great Britain, whose members included Christopher Hill, Rodney Hilton and Eric Hobsbawm. The outstanding contribution to historical studies of these and other members of the group is now almost universally recognised. The debates they initiated formed the ground for academic research that is still continuing, in particular their work on the nature of English civil war and revolution in the seventeenth century, and on the development of capitalism in Britain. This book focuses on the debates of the sixteenth- and seventeenth-century section of the group and their work on ideology and absolutism. It reproduces original documentary material - single contributions, reports and minutes - from the debates, and also includes an informative introductory essay as well as useful notes and appendices.

This reference guide traces the "Writing Across the Curriculum" movement from its origins in British secondary education through its flourishing in American higher education and extension to American primary and secondary education.
