Thinking and speaking about time is ridden with puzzles and paradoxes. How do human beings conceptualize time? Why, for example, does the availability of tense vary in different languages? How do the lines of information from tense, aspect, temporal adverbs, and context interact in the mind? Does time describe events? If real time does not flow, where do the concepts of the past, present and future come from? Are they basic concepts or are they composed out of more primitive constituents? And, finally, what is the semantics of expressions with temporal reference? This book offers a new approach to the representation of meaning of temporally-located utterances and discourses. Temporality, the author suggests, should be taken to mean degrees of certainty, understood in turn as degrees of acceptability concerning the eventuality referred to in the speaker's utterance. She presents theoretical arguments and empirical evidence from Indo-European and non-Indo-European languages to show that speakers represent the past, present, and future as degrees of epistemic modality. She argues that temporality can be subsumed under the general label of acceptability or attitude and, rather like the semantic category of evidentiality, founded on the strength of evidence. In the approach she develops, modality provides basic conceptual building blocks for the concept of time and at the same time semantic building blocks for representing temporal expressions in her framework of Default Semantics. Dr Jaszczolt sets the results of her research in the context of linguistic and philosophical work in semantics and pragmatics. *After having been held in the UK for the past 10 years, the 11th edition of the annual Current Research in Egyptology (CRE) graduate conference was held at Leiden University, The Netherlands in January 2010. As always, the main aim of the conference was to provide graduate and postgraduate students of Egyptology and Egyptian archaeology with the opportunity to present their research. The proceedings of this year's conference cover a wide range of topics from the Predynastic Period to modern Egypt. The papers reflect a similar variety in areas of research and scientific approach, for example, by applying the linguistic prototype theory to ancient Egyptian texts or by using an ethnoarchaeological approach for the study of modern mud-brick architecture. The topics covered include Egyptian religion, ranging from the Coffin Texts to the decoration of temple walls in Ptolemaic times, as well as sociological issues in the Middle and New Kingdom. Other contributions focus on the study of the chronology of the Middle Kingdom with the help of lunar ephemerides or well-stratified radiocarbon data versus pottery data. In summary, Proceedings of Current Research in Egyptology XI includes 19 selected papers on artefact studies, burial practices and provisioning for the afterlife, economy and sociology, history and chronological studies, linguistics, philology and religion.*

This book presents a new approach to analysing the image of ancient Egyptian kings and gods. The author studies textual evidence rather than the often stereotyped iconography, focusing on mentions of the king's White and Red Crowns and demonstrating that they possess a wide-ranging symbolism that transcends the terrestrial sphere to encompass the divine and the cosmos, death and rebirth. In funerary texts of the Old and Middle Kingdoms (ca. 2300-1700 BC), crowns play a part in the deceased king's ascent to the sky and transfiguration, enabling him to assume the form and powers of a celestial god. Crowns express such attributes as the legitimate rule of gods or of the deceased, as well as radiance; they are also metaphors for cosmic events. Personified as goddesses, they are the deceased's mothers and nurses. These symbolic functions are integrated into richly metaphorical texts that combine the explicit with the allusive and the concrete with the evanescent. The book discusses occurrences of the White, Red, and Double Crowns in the Pyramid and Coffin Texts, as well as other selected examples. A major section reinterprets the famous "Cannibal Spell" as a description of sunrise that fits seamlessly with the themes of other texts. This study will be of great interest not just to Egyptologists but also for the parallels it offers for styles of royal and divine symbolism that are found in many civilisations.

Sometimes you know things you ’ re not supposed to know. Things that you can never un-know. Things that will change the course of your life...and the fate of the ones you love. I found her in our living room, bleeding and close to death, but alive. Barely. Until morning stole her last breath. The media called her killer the “ Triangle Terror ” ... and then forgot about her. But I never forgot—my murdered sister, and an investigation that led to my own resurrection from the dead. Twenty-two years ago, on a cold February night, Landon Worthington lost his father for the last time. After an armed robbery gone wrong, evidence and witness testimony pointed a shaky finger at Dan Worthington—deadbeat dad and alcoholic husband. But before the dust could settle over the conviction, Landon ’ s preteen sister, Alexis, is murdered in their home, plunging Landon ’ s life into further despair. Two decades and a cold case later, Landon is dogged by guilt over their estranged relationship and decides to confront his incarcerated father about what really happened the night of the robbery. But the years of lies are hard to unravel. And the biggest question of all haunts him: How does everything tie into his sister ’ s murder? And so begins Landon ’ s journey to piece together the puzzle of secrets, lies, and truths that can free his father, avenge his sister, and perhaps save himself. A short story mystery perfect for fans of Robert Dugoni’s Third Watch and Dean Koontz’s The Neighbor. Read as a standalone or as the companion book to A Secondhand Life.

A Comprehensive Grammar

Revised and expanded, this volume deals with the religious traditions of ancient Egypt, which have come down to us in a state which is both extremely fragmentary and complex. New material - especially hymns collected in Theban tombs - now allows a much more precise allocation of religious texts and ideas in terms of time, place and social context. Within the field of solar religion, no less than five different traditions have to be distinguished: 1) the liturgical traditions of the royal solar cult, which for their secrecy and exclusivity are labelled the "mysterie" of the sun cult; 2) the traditional mythology of the solar course expressed in hymns and pictorial representations; 3) the revolutionary process culminating in the Amarna period, which discards the mythic images and gives a monotheistic construction of the solar course, a process which starts before Akhenaten's revolution; 4) the theology of Amun-Re, the God of Thebes, before the Amarna Period, a theology of primacy where one god acts as chief of a pantheon; and 5) the quite different theology of this same Amun-Re after Amarna, a theology which answers the monotheistic experience by developing a kind of pantheism - the concept of the hidden god - who is both cosmic god and personal saviour.

The book ?tu Vidy? emerged in search of answers to questions asked by adolescent girls and women in India during the author ’ s interactions with them as part of Menstrual Health workshops, conducted over a span of a decade across rural India. In an attempt to decode menstrual practices, the author undertook a journey across India and studied various indigenous knowledge systems such as ?a?-Dar?ana, ?yurved, Tantra, Cakra, Y?g, ?gama ??stra, Jyotis?a?a?stra, and several sub-texts from these categories. As a result, the book goes beyond just describing cultural practices and takes a deep dive into explaining the scientific and logical reasoning behind the origin of these practices. This book is for all Indian women who have unanswered questions pertaining to menstrual practices, for menstrual researchers who will find a treasure trove of potential areas for research pertaining to menstrual health, for sportswomen to discover the ancient techniques that worked in sync with women ’ s periods and not against it, and also for the feminist who assumes that cultural practices around menstruation are a taboo that needs to be done away with. The correct understanding of the science behind menstrual practices, as given in this book, will help women prevent menstrual difficulties, develop a positive attitude toward menstruation, and learn to work in sync with nature ’ s cycles. ?tu (pronounced as ruthu) is one of the terms for menstruation in Sanskrit. Vidy? means knowledge. ?tu Vidy? is the author ’ s attempt to bring together various indigenous knowledge systems that provide information about the science of menstruation, which is relevant even to this day.

*The End of Chiraq: A Literary Mixtape is a collection of poems, rap lyrics, short stories, essays, interviews, and artwork about Chicago, the city that came to be known as "Chiraq" ("Chicago" + "Iraq"), and the people who live in its vibrant and occasionally violent neighborhoods. Tuned to the work of Chicago's youth, especially the emerging artists and activists surrounding Young Chicago Authors, this literary*

*mixtape unpacks the meanings of “Chiraq” as both a vexed term and a space of possibility. “Chiraq” has come to connote the violence—interpersonal and structural—that many Chicago youth regularly experience. But the contributors to The End of Chiraq show that Chicago is much more than Chiraq. Instead, they demonstrate how young people are thinking and mobilizing, engaged in a process of creating a new and safer world for themselves, their communities, and their city. In true mixtape fashion, the book is an exercise in “low end theory” that does not just include so-called underground and marginal voices, but foregrounds them. Edited by award-winning poets, writers, and teachers Javon Johnson and Kevin Coval, The End of Chiraq addresses head-on the troublesome relationship between Chicago and Chiraq and envisions a future in which both might be transformed.*

*This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer’s invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here “0” stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with “oh” rather than “zero”, and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling “DOL” of “DOL” could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.*

The study of Egypt as the fount of all wisdom and stronghold of hermetic lore, already strong in antiquity, Hornung (Egyptology, U. of Basel) calls Egyptosophy. Though it was soundly rebuffed by Egyptology, based on conventional science and history, he thinks its continuing impact on western culture deserves scholarly attention. He reviews the various occult traditions and their expression during various eras. The original Esoterische Agypten was published by C. H. Beck’sche Verlagsbuchhandlung, Munich, in 1999, and translated by David Lorton, who has also translated Hornung’s earlier books for Cornell. Annotation copyrighted by Book News, Inc., Portland, OR.

It is the wet season in the Australian outback. Drunk and delirious, an old ex-pilot known as “Pisspot Stevie” lies dying in a remote cabin in the Queensland bush. When a priest named Roger Hargreaves comes upon him, Stevie is smoking opium to relieve the pain of his last moments. The priest listens as Stevie, in an opium-fueled haze, begins to describe a very different life he once lived—not in the past, but decades in the future, as a mixed-race aviator who finds love and glory in service to the Queen. After Stevie’s death, as Hargreaves tries to sort dream from reality, he makes discoveries that cause him to wonder if he has been granted a glimpse beyond the veil.

**The Hurrians were one of Ute principal contributors to ancient Near Eastern civilisation and yet we know fer less about their language, history and culture than we do about the Sumerians, Assyrians or Hittites. In this book, Professor Wilhelm has gathered the scattered threads from a great range of sources between 2500 and 500 BC, to give the first ever survey of the Hurrians. Professor Wilhelm is one of the world’s principal authorities on Hurrian language and history, and the book is therefore highly authoritative, although written for the general reader. The text has been specially brought up to date by the author for this edition, and an extra chapter on the archaeology, with additional illustrations, has been contributed by Dr Diana Stein. The Hurrians is essential to everyone studying the ancient Near East, and provide a starting point for future research into this important civilisation.
