Corporate social responsibility (CSR) has become an increasingly heated topic since the 1980s. But there are severe limitations with the concept of CSR and the effectiveness of CSR practices. Addressing such limitations, this volume proposes that the concept of Corporate Social Irresponsibility (CSI) offers a better theoretical platform to avoid the vagueness, ambiguity, arbitrariness and mysticism of CSR. It challenges conventional modes of thinking, unveils the CSR mask of business practices and redirects public attention to the core issues of CSR. This collective work sets up an initial theoretical framework for the subject of CSI and examines the fundamental reasons for irresponsibility in and beyond a corporate context. Rooted in theory and practice it seeks to understand how boundaries of CSR and CSI have been constructed in society, and explores some systemic and structural issues of CSI in practice.

An advanced yet accessible treatment of the welding process and its underlying science. Despite the critically important role welding plays in nearly every type of human endeavor, most books on this process either focus on basic technical issues and leave the science out, or vice versa. In Principles of Welding, industry expert and prolific technical speaker Robert W. Messler, Jr. takes an integrated approach--presenting a comprehensive, self-contained treatment of the welding process along with the underlying physics, chemistry, and metallurgy of weld formation. Promising to become the standard text and reference in the field, this book provides an unprecedented broad coverage of the underlying physics and the mechanics of solidification--including peritectic and eutectic reactions--and emphasizes material continuity and bonding as a way to create a joint between materials of the same general class. The author supplements the book with hundreds of tables and illustrations, and correlates the science to welding practices in the real world. Principles of Welding departs from existing books with its clear, unambiguous presentation, which is easily grasped even by undergraduate students, yet given at the advanced level required by experienced engineers.

In 1997 Michael Flecker investigated a shipwreck in the north Java sea. The wreck comprised the remains of a mid 10th-century ship with its cargo of thousands of ceramic and non-ceramic artefacts. This report describes the methodology and aims of the underwater operation, discusses the finds that were recovered and places these within the context of maritime archaeology in southeast Asia. Flecker evaluates the evidence from the Intan shipwreck alongside contemporary historical information about sea travel, ports, trade routes and cargoes.

On Sunday 26 December 2004, a tsunami of up to 30 metres high hit the northern tip of Sumatra in Indonesia, causing immediate destruction and the deaths of at least 130,000 in Indonesia alone. The scale of the devastation and ensuing human suffering prompted the biggest response endeavour to any natural disaster in history.Post-Disaster Reconstruction will be the first major book that analyses the different perspectives and experiences of the enormous post-tsunami reconstruction effort. It looks specifically at the reconstruction efforts in Aceh, one of the regions most heavily-hit by the tsunami and a province that has until recently suffered nearly three decades of armed conflict. Positioning the reconstruction efforts within Aceh’s multi-layered historical, cultural, socio-political and religious contexts, the authors explore diverse experiences and assessments of the reconstruction. It considers the importance of the political and religious settings of the reconstruction, the roles of communities and local non-government organisations and the challenges faced by Indonesian and international agencies. From the in-depth examination of this important case study of disaster reconstruction - significant not only because of the huge scale of the natural disaster and response but also the post-conflict issues - the editors draw together the lessons learned for the future of Aceh and make general recommendations for post-disaster and post-conflict reconstruction-making.

"An intergenerational collection of personal narratives by women in the 21st century who mother from the margins of our society. It features 20 stories of caretakers who have both overcome their own personal challenges and are now making a difference in the public sphere today. This coffee table book offers readers an opportunity to experience the lives of "detestable" or "reprehensible" moms from the perspective of the women we love to judge. Filled with stunning photography and provocative stories, it challenges popular perceptions of teen moms, survivors of domestic violence, and baby mamas. It adds complexity to stereotypical stories about mamas who abuse drugs or engage in sex work. And it demonstrates both the humanity and value of the very mothers our society often dismisses. This book is an excellent choice for scholars of motherhood studies, black women's autobiographies, sociology, gender and women's studies, and rhetoric. It is a must-read book for social workers. Every woman who has ever been called "infamous" should own a copy; it will inspire, inform, and make you laugh. But above all, it will remind you of your power"--back cover.

Solid Waste Management (SWM) is a matter of great concern in the urban areas of developing countries. The municipal authorities who are responsible for managing municipal solid waste are unable to discharge their obligations effectively because they lack the in-house capacity to handle the complexities of the process. It is heartening to see that the World Bank has prepared this book covering all important aspects of municipal SWM in great depth. The book covers very lucidly the present scenario of SWM in urban areas, the system deficiencies that exist, and the steps that need to be taken to correct SWM practices in compliance with Municipal Solid Waste (Management and Handling) Rules 2000 ratified by the Government of India. The book shares examples of best practices adopted in various parts of the country and abroad, and very appropriately covers the institutional, financial, social, and legal aspects of solid waste management, which are essential for sustainability of the system. It provides a good insight on how to involve the community, nongovernmental organizations, and the private sector to help improve the efficiency and cost effectiveness of the service, and shows how contracting mechanisms can be used to involve the private sector in SWM services. This book will be a very useful tool for city managers and various stakeholders who deal with municipal solid waste management in the design and execution of appropriate and cost-effective systems.

Masa lalu tidak begitu penting. Jadi teruslah melangkah maju dengan gambaran masa depan yang indah di depan mata. Jika pun saat melangkah maju masa lalu itu mengetuk pundak, jangan lagi berbalik. Karena masa lalu yang seperti itu hanyalah batu kerikil yang ingin membuat kita terjatuh. Terjatuh lagi pun sebenarnya tidak masalah, karena saat bangkit seseorang akan menjadi lebih kuat. —Han Se-Hee—
Aku menyesalinya. Sungguh menyesal. Beribu kali lipat dibanding penyesalan yang sebelumnya kurasakan. Gadis itu... senyum ceria yang selalu ia layangkan, menghilang begitu saja, karenaku. Penyesalan seperti ini akan terus tertanam dalam jiwaku. Menjadi satu dengan ruang kehidupanku yang rumit. Sampai saatnya sebuah janji terlaksanakan. “Beri aku waktu. Sampai musim dingin berakhir, berilah aku kesempatan untuk mengembalikan ingatan masa kecil yang telah hilang dari memori otakmu. Setelah itu kau bisa melakukan apapun, bahkan jika menyuruhku pergi.” —Chae Sang-Hyun—
