David Curtis is one of the most successful and loved artists in the UK. His books are bestsellers and in his latest publication he talks about the secrets of producing paintings with impact. Although his work is not showy, they are powerful and are much-sought after. His secrets for painting with impact are the sensitive consideration of balance and contrast in tone, colour, handling qualities and compositional elements. Whether you're working on location with a limited palette or in the studio with all the time and materials at your disposal, the author talks you through the ways to capture the essence of a subject matter and the mood or

sense of the place, and always with a something that will grab the viewer. The key elements are covered: Selection – what to paint and if necessary how to simplify or dramatise those elements; Mood – creating a strong sense of mood through choice of medium, colour and painting technique; Colour – choosing the right colours to suit the intentions of the painting. The book discusses a range of inspiring locations, from marine subjects, beaches and harbours to city scenes, trees and the light of the Mediterranean.

turn in the first place to the one to whom this book is dedicated. It is a great grief to me that he who took such an intense interest in my work has not lived to see its conclusion. It was he who in the beginning urged me to venture upon this course of study and whose encouragement helped me in moments of despondency. The high standard which, with his keen and critical judgment, he set for his own work, was an example to me, and I shall strive to maintain it in my future studies. Not only did he help me to lay the foundation of my knowledge of archive science, but he

was also my guide in a field new to me in many respects, that of Asian maritime trade. His wide knowledge of medieval European trade in the Baltic area led me to compare and contrast the two worlds of East and West and thus helped me to obtain a deeper insight into the differences and similarities between the various problems involved. I am greatly indebted to Prof. Dr. J. M. Romein, who has followed the progress of my studies with great interest all these years, and on whose help and support, sometimes in very difficult circumstances, I have always been able to rely.
