Every year, the people of the Protectorate leave a baby as an offering to the witch who lives in the forest. They hope this sacrifice will keep her from terrorizing their town. But the witch in the Forest, Xan, is kind. She shares her home with a wise Swamp Monster and a Perfectly Tiny Dragon. Xan rescues the children and delivers them to welcoming families on the other side of the forest, nourishing the babies with starlight on the journey. One year, Xan accidentally feeds a baby moonlight instead of starlight, filling the ordinary child with extraordinary magic. Xan decides she must raise this girl, whom she calls Luna, as her own. As Luna's thirteenth birthday approaches, her magic begins to emerge--with dangerous consequences. Meanwhile, a young man from the Protectorate is determined to free his people by killing the witch. Deadly birds with uncertain intentions flock nearby. A volcano, quiet for centuries, rumbles just beneath the

earth's surface. And the woman with the Tiger's heart is on the prowl . . . The Newbery Medal winner from the author of the highly acclaimed novel The Witch's Boy.

A WALL STREET JOURNAL BESTSELLER! "You can't really know anything if you just remember isolated facts. If the facts don't hang together on a latticework of theory, you don't have them in a usable form. You've got to have models in your head." - Charlie Munger, investor, vice chairman of Berkshire Hathaway The world's greatest problem-solvers, forecasters, and decision-makers all rely on a set of frameworks and shortcuts that help them cut through complexity and separate good ideas from bad ones. They're called mental models, and you can find them in dense textbooks on psychology, physics, economics, and more. Or, you can just read Super Thinking, a fun, illustrated guide to every mental model you could

possibly need. How can mental models help you? Well, here are just a few examples... • If you've ever been overwhelmed by a to-do list that's grown too long, maybe you need the Eisenhower Decision Matrix to help you prioritize. • Use the 5 Whys model to better understand people's motivations or get to the root cause of a problem. • Before concluding that your colleague who messes up your projects is out to sabotage you, consider Hanlon's Razor for an alternative explanation. • Ever sat through a bad movie just because you paid a lot for the ticket? You might be falling prey to Sunk Cost Fallacy. • Set up Forcing Functions, like standing meeting or deadlines, to help grease the wheels for changes you want to occur. So, the next time you find yourself faced with a difficult decision or just trying to understand a complex situation, let Super Thinking upgrade your brain with mental models.

How to repair the disconnect between designers and users, producers and consumers, and tech elites and the rest of us: toward a more democratic internet. In this provocative book, Ramesh Srinivasan describes the internet as both an enabler of frictionless efficiency and a dirty tangle of politics, economics, and other inefficient, inharmonious human activities. We may love the immediacy of Google search results, the convenience of buying from Amazon, and the elegance and power of our Apple devices, but it's a one-way, top-down process. We're not asked for our input, or our opinions—only for our data. The internet is brought to us by wealthy technologists in Silicon Valley and China. It's time, Srinivasan argues, that we think in terms beyond the Valley. Srinivasan focuses on the disconnection he sees between designers and users, producers and consumers, and tech elites and the rest of us. The recent Cambridge Analytica and Russian misinformation scandals exemplify the imbalance of a digital world that puts profits before inclusivity and democracy. In search of a more democratic internet,

Srinivasan takes us to the mountains of Oaxaca, East and West Africa, China, Scandinavia, North America, and elsewhere, visiting the “design labs” of rural, low-income, and indigenous people around the world. He talks to a range of high-profile public figures—including Elizabeth Warren, David Axelrod, Eric Holder, Noam Chomsky, Lawrence Lessig, and the founders of Reddit, as well as community organizers, labor leaders, and human rights activists.. To make a better internet, Srinivasan says, we need a new ethic of diversity, openness, and inclusivity, empowering those now excluded from decisions about how technologies are designed, who profits from them, and who are surveilled and exploited by them.

The global security environment, dominated and dependent on information and communication technology, generates an accumulation of disruptive factors for society. This volume, in direct accordance with technological developments that have facilitated information avalanche and (anonymous) communication, has required interdisciplinary research in areas such as: psychology, sociology, computer science, social media communication and legislation. The research aims to establish whether social media platforms, through the actions they facilitate, can pose risks and threats to national security and to identify premises in order to stimulate strategies that should be followed to avoid transforming various forms of online communication into a potentiating and generating factor of crime, radical or extremist opinions, mass manipulation, etc. At the same time, the research offers an alternative vision on approaching the concept of intelligence in the context of the development of social media networks (SocMInt) and promotes ways to improve and streamline how to achieve objectives that can be successfully applied, including in business intelligence. In this regard, a case study is conducted on the effects of CoVid-19 pandemic (SARS-CoV-2 coronavirus) from the

perspective of law enforcement agencies. Although the individual exploitation of SocMInt does not provide a comprehensive answer, it must be used in the initial stages of decision-making and effort-making, due to the low costs compared to other Int disciplines. The volume does not present a solution to current problems, but through its didactic, documentary and informative nature it offers professional support at high standards to analysts and managers in decision making.

A surprising and gripping sci-fi thriller with a killer twist The daughter of two astronauts, Romy Silvers is no stranger to life in space. But she never knew how isolating the universe could be until her parents' tragic deaths left her alone on the Infinity, a spaceship speeding away from Earth. Romy tries to make the best of her lonely situation, but with only brief messages from her therapist on Earth to keep her company, she can't help but feel

like something is missing. It seems like a dream come true when NASA alerts her that another ship, the Eternity, will be joining the Infinity. Romy begins exchanging messages with J, the captain of the Eternity, and their friendship breathes new life into her world. But as the Eternity gets closer, Romy learns there's more to J's mission than she could have imagined. And suddenly, there are worse things than being alone.... Now nominated as a YALSA Quick Pick!

Named a Notable Work of Nonfiction of 2020 by the Washington Post As heard on NPR's Fresh Air, We Have Been Harmonized, by award-winning correspondent Kai Strittmatter, offers a groundbreaking look, based on decades of research, at how China created the most terrifying surveillance state in history. China's new drive for repression is being underpinned by unprecedented advances in technology: facial and voice recognition, GPS tracking, supercomputer databases, intercepted cell phone conversations, the monitoring of app use, and millions of high-resolution security cameras make it nearly impossible for a Chinese citizen to hide anything from authorities. Commercial transactions, including food deliveries and online purchases, are fed into vast databases, along with everything from biometric information to social media activities to methods of birth control.

Cameras (so advanced that they can locate a single person within a stadium crowd of 60,000) scan for faces and walking patterns to track each individual's movement. In some schools, children's facial expressions are monitored to make sure they are paying attention at the right times. In a new Social Credit System, each citizen is given a score for good behavior; for those who rate poorly, punishments include being banned from flying or taking high-speed trains, exclusion from certain jobs, and preventing their children from attending better schools. And it gets worse: advanced surveillance has led to the imprisonment of more than a million Chinese citizens in western China alone, many held in draconian "reeducation" camps. This digital totalitarianism has been made possible not only with the help of Chinese private tech companies, but the complicity of Western governments and corporations eager to gain access to China's huge market. And while governments debate trade wars and tariffs, the Chinese Communist Party and its local partners are aggressively stepping up their efforts to export their surveillance technology abroad—including to the United States. We Have Been Harmonized is a terrifying portrait of life under unprecedented government surveillance—and a dire warning about what could happen anywhere under the pretense of national security.

“Terrifying. ... A warning call.” —The Sunday Times (UK), a “Best Book of the Year so Far”

The report presents the latest assessment of global trends in wildlife crime. It includes discussions on illicit rosewood, ivory, rhino horn, pangolin scales, live reptiles, tigers and other big cats, and European eel. The COVID-19 (coronavirus) pandemic has highlighted that wildlife crime is a threat not only to the environment and biodiversity, but also to human health, economic development and security. Zoonotic diseases - those caused by pathogens that spread from animals to humans - represent up to 75% of all emerging infectious diseases. Trafficked wild species and the resulting products offered for human consumption, by definition, escape any hygiene or sanitary control, and therefore pose even greater risks of infection.

In recent years, men have been given a lot of mixed messages as to what it means to be a man, husband, or father. Men hate mixed messages. Just tell us like it is (or should be) without all of the extra verbiage. That's exactly what Mike Pearl does in eliminating the conflicting messages and getting to the meat of the matter. Discover God's design for a man and how you can find joy doing what you were designed to do. Learn how love your wife

“even as Christ also loved the church.” As always, Mike's presentation is direct with no holds barred and he is not afraid to hurt your feelings. With his more than fifty years of Bible study he presents God's perspective on the subject, and his more than years of marriage bears witness to its effectiveness. His wife, Debi Pearl, weighs in to add grace to Mike's to the point writing style.

From the host of the YouTube channel that went viral—Dad, How Do I?—comes a book that's part memoir/part inspiration/part DIY. Rob Kenney's father left him and his seven siblings when

he was fourteen years old, and the youngest had to fend for themselves. He wished that he had someone who could teach him the basics—how to tie a tie, jump-start a car, unclog a drain, use tools properly—as well as succeed in life. But he and his siblings had to figure these things out on their own. Now a father himself, Rob decided that he would help people out by providing how-to tips as well as advice—and even throw in some bad dad jokes. He started a YouTube channel for anyone looking for fatherly advice, and in the course of three months, gained a following of nearly 2.5 million subscribers, with millions of views for his how-to and inspirational videos. In this book, Rob shares his story of overcoming a difficult childhood with the strength of faith and family, and offers inspiration and hope. In addition, he provides 50 practical DIY instructions (30 of which will be unique to the book), illustrated with helpful line drawings.

Smuggling, gun-running, drugs, terrorism for many decades, Mumbai has lived under the shadow of the Underworld. Dawood Ibrahim, Karim Lala, Varadara- jan Mudaliar: these are names that any Indian would recognise. Analysed in print, immortalised on film, their lives, their gangs, More...their 'businesses' are out there for anyone who wants the information. But there have been women, too, who have been part of this murky side of the city, walking along side, sometimes leading and manipulating men in the Underworld to run their own illegal businesses. Here, for the first time, crime journal- ists S. Hussain Zaidi and Jane Borges explore the lives of some of these women, and how, in cold blood, they were able to make their way up in what was certainly a man's world. From Kamathipura to Dongri, from assassins to molls, this is a collection that tells the stories of women who have become legend in Mumbai's streets, lanes and back-alleys. Absorbingly told, impeccably researched, Mafia Queens of

A riveting account of how a popularly elected leader has steered the world's largest democracy toward authoritarianism and intolerance Over the past two decades, thanks to Narendra Modi, Hindu nationalism has been coupled with a form of national-populism that has ensured its success at the polls, first in Gujarat and then in India at large. Modi managed to seduce a substantial number of citizens by promising them development and polarizing the electorate along ethno-religious lines. Both facets of this national-populism found expression in a highly personalized political style as Modi related directly to the voters through all kinds of channels of communication in order to saturate the public space. Drawing on original interviews conducted across India, Christophe Jaffrelot shows how Modi's government has moved India toward a new form of democracy, an ethnic democracy that equates the majoritarian community with the nation and relegates Muslims and Christians to second-class citizens who are harassed by vigilante groups. He discusses how the promotion of Hindu nationalism has resulted in attacks against secularists, intellectuals, universities, and NGOs. Jaffrelot explains how the political system of India has acquired authoritarian features for other reasons, too. Eager to govern not only in New Delhi, but also in the states, the government has centralized power at the expense of federalism and undermined institutions that were part of the checks and balances, including India's Supreme Court. Modi's India is a sobering account of how a once-vibrant democracy can go wrong when a government backed by popular consent suppresses dissent while growing

increasingly intolerant of ethnic and religious minorities.

This is the first published version of Beauty and the Beast, written by the French author Gabrielle-Suzanne Barbot de Villeneuve in the mid-18th century and translated by James Robinson Planché. It is a novel-length story intended for adult readers, addressing the issues of the marriage system of the day in which women had no right to choose their husband or to refuse to marry. There is also a wealth of rich back story as to how the Prince became cursed and revelations about Beauty's parentage, which fail to appear in subsequent versions of the now classic fairy tale.

Young or old, rich or poor, Hindu or Muslim, all unite at one platform; it's the India Book of Records 2021. The year 2021 can be called the year of record making as more records created and even more records are attempted than any other year in the past, leading to the breaking of our own boundaries to present you a bigger and thicker India Book of Records 2020. Arguably this is the biggest national book of records ever produced by any country.

which in itself can be called a record. Truly, Indians create more records than anyone on the planet. While many of the Indian record holders achieved a place in Asia Book of Records and World Record Union, more than 50 Indian record holders featured in a platform created by the initiative of three countries that produce the India Book of Records, Vietnam Book of Records and Indonesia Book of Records to showcase the top record holders on the global stage. As you are holding 'India Book of Records 2021', surely some of the records will inspire you to challenge yourself to create a record and see your name in India Book of Records 2021.

From the #1 New York Times bestselling author of *Small Great Things* and the modern classics *My Sister's Keeper*, *The Storyteller*, and more, comes a "complex, compassionate, and smart" (*The Washington Post*) novel about a family torn apart by a murder accusation. When your son can't look you in the eye...does that mean he's guilty? Jacob Hunt is a boy with Asperger's syndrome. He's hopeless at reading social cues or expressing himself well to others, though he is brilliant in many ways. He has a special focus on one subject—forensic analysis. A police scanner in his room clues him in to crime scenes, and he's always showing up and telling the cops what to do. And he's usually right. But when Jacob's small hometown is rocked by a terrible murder, law enforcement comes to him. Jacob's behaviors are hallmark Asperger's, but they look a lot like guilt to the local police. Suddenly the Hunt family, who only want to fit in, are thrust directly in the spotlight. For Jacob's mother, a brutal reminder of the intolerance and misunderstanding that always threaten her family.

his brother, it's another indication why nothing is normal because of Jacob. And for the frightened small town, the soul-searing question looms: Did Jacob commit murder? Hou Rules is "a provocative story in which [Picoult] explores the pain of trying to comprehend people we love—and reminds us that the truth often travels in disguise" (People).

Hello February

Hello February 2020

World Wildlife Crime Report 2020

India Book of Records 2021

A wonderful new book is coming from Random House Children's Books. By 1979, we knew all that we know now about the science of climate change - what was happening, why it was happening, and how to stop it. Over the next ten years, we had the very real opportunity to stop it. Obviously, we failed. Nathaniel Rich's groundbreaking account of that failure - and how tantalizingly close we came to signing binding treaties that would have saved us all before the fossil fuels industry and politicians committed to anti-scientific denialism - is already a journalistic blockbuster, a full issue of the New York Times Magazine that has earned favorable comparisons to Rachel Carson's Silent Spring and John Hersey's Hiroshima. Rich has become an instant, in-demand expert and speaker. A major movie deal is already in place. It is the story, perhaps, that can shift the conversation. In the book Losing Earth, Rich is able to provide more of the context for what did - and didn't - happen in the 1980s and, more important, is able to carry the story fully into the present day and wrestle with what those past failures mean for us in 2019. It is not just an agonizing revelation of historical missed opportunities, but a clear-eyed and eloquent assessment of how we got to now, and what we can and must do before it's truly too late.

This is the full Mueller Report, as released on April 18, 2019, by the U.S. Department of Justice. A reprint of the report exactly as it was issued by the government, it is without analysis or commentary from any other source and with nothing subtracted except for the material redacted by the Department of Justice. The mission of the Mueller investigation was to examine Russian interference in the 2016 Presidential election, consisting of possible links, or "collusion," between the Donald Trump campaign and the Russian government of Vladimir Putin as well as any allegations of obstruction of justice in this regard. It was also intended to detect and prosecute, where warranted, any other crimes that surfaced during the course of the investigation. The report consists of a detailed summary of the various investigations and inquiries that the Special Counsel and colleagues carried out in these areas. The investigation was initiated in the aftermath of the firing of FBI Director James Comey by Donald Trump on May 9, 2017. The FBI, under Director Comey, had already been investigating links between Russia and the Trump campaign. Mueller submitted his report to Attorney General William Barr on March 22, 2019, and the Department of Justice released the redacted report one month later.

Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to

natural disasters Women's empowerment What Works in Girls' Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.
