Does your child display a creative leaning and loves drawing and art? Do you want to encourage this and help them flourish? Maybe art is not your thing and you have no idea how to help them? Kids love to draw. It is one of the earliest forms of expression for them and allows them to show their creative side in a whole range of ways. But for many parents, teaching their child how to draw is hard. It may be that you do not have the time to spend due to work and other commitments, or perhaps art was never your thing. You do not have

to be an accomplished artist to help. With this new book, all you need are a few essential items and before long your child could be: Learning how to draw in 3D Creating optical illusions Enjoying a new hobby Learning the basics of art Having fun And much more... Even if you have no artistic talents, it no longer matters, because this book and its 15 step-by-step tutorials takes all the hard work out of it, providing you with a fun hobby that you and your child can do together, with minimal supervision. All you need to get started is a graph ruled notebook, pencil, a black ball-point pen and a black marker. So what are you waiting for? Scroll up now and click Add to Cart for your copy and release the inner artist in your child! Help young children learn and practice the alphabet while having fun with paper crafts! 3D Paper Crafts for Kids is an exciting and easy project guide that carefully illustrates how to create 26 charming projects from paper and other household items. Organized in alphabetical order, have fun creating giraffes, kites, owls, queens, trees, zebras, and so much more! From buttons and yarn to seeds and pipe cleaners, every project is perfect and simple for even the youngest mind to make. Featuring step-by-step instructions,

coordinating photography, and templates, this must-have arts and crafts book encourages education along with hands-on fun! Paper is readily available and inexpensive in comparison to other sculptural media, and can be manipulated with a set of simple tools. It is a tactile medium, which can be formed into three-dimensional shapes quickly and immediately through folding and cutting. This hands-on element is something I feel is important -- it allows the artist to engage immediately with the material, resulting in something physical and tangible. It is, perhaps, these factors that make it so appealing, not only as a tool to apply in different fields, such as model making for architecture, but as an activity for its own sake. A section of this book is dedicated to a selection of the techniques I use in the creation of my work, and which I demonstrate in my workshops. My aim is to show the basic principles of form-making in paper, which can then be expanded on and explored as the reader wishes. Also included are my sources of inspiration and details of my working practice, which shows the evolution of an initial idea into a final artwork. I hope this book offers an insight into my work, while offering inspiration to those who wish to explore the creative

potential of paper.

MiniEco is the sensational craft blog of Kate Lilley. With over 250,000 followers it has taken on cult status in the international craft community, and that is purely down to Kates fresh, contemporary and beautifully explained and executed craft projects. With a book for children already under her belt, this publication focuses more on adults with 33 pieces including paper gems, an origami lampshade, macrame hangings, pop-up pixel cards, hama bead candle holders, and tie-dyed furoshiki cloths. The ideas range in complexity from the simple to the advanced, but each one is totally unique and has never before been published. The look of the book will reflect the immaculate, Japanese-inflected minimalism of the MiniEco website, with some high-end production finishes including a die-cut, dust-jacketed paperback binding and boldly pared-back photography.
