*A flagship annual document of the Ministry of Finance, Government of India, Economic Survey 2008-09 reviews the developments in the Indian economy over the past 12 to 18 months, summarizes the performance on major development programmes, and highlights the policy initiatives of the government and the prospects of the economy in the short to medium term. With detailed statistical data covering all aspects of the economy--macro as well as sectoral-- the report provides an overview of the following issues: state of the*

*Indian economy; challenges, policy responses, and medium-term prospects; fiscal policy and monetary management; financial intermediation and the role of markets; external sector, balance of payments, and trade; agriculture and industrial development; energy, infrastructure, and communications; human development and public programs. The Survey highlights that the fallout of the global financial crisis on the Indian economy has been palpable in the industry and trade sectors and has also permeated the services sector. While some segments, especially the export-oriented industries have suffered, the Indian economy has resiliently withstood the adverse global economic situation and posted a growth rate of 6.7 per cent in 2008-09. The Survey also identifies the wide-*

art and perspectives of the field. While presenting a comprehensive coverage of thiophene-based materials and related applications, the aim is to show how the rational molecular design of materials can bring a new breadth to known device applications or even aid the development of novel application concepts. The main topics covered include synthetic methodologies to thiophene-based materials (including the chemistry of thiophene, preparation of oligomers and polymerisation approaches) and the structure and physical properties of oligo- and polythiophenes (discussion of structural effects on electronic and optical properties). Part of the book is devoted to the optical and semiconducting properties of conjugated thiophene materials

definitive work on the Internet 's Next Big Thing: The Blockchain. Big banks have grown bigger and more entrenched. Privacy exists only until the next hack. Credit card fraud is a fact of life. Many of the "legacy systems" once designed to make our lives easier and our economy more efficient are no longer up to the task. Yet there is a way past all this—a new kind of operating system with the potential to revolutionize vast swaths of our economy: the blockchain. In *The Truth Machine*, Michael J. Casey and Paul Vigna demystify the blockchain and explain why it can restore personal control over our data, assets, and identities; grant billions of excluded people access to the global economy; and shift the balance of power to revive society 's faith in itself. They reveal the disruption it promises for industries including

finance, tech, legal, and shipping. Casey and Vigna expose the challenge of replacing trusted (and not-so-trusted) institutions on which we've relied for centuries with a radical model that bypasses them. The Truth Machine reveals the empowerment possible when self-interested middlemen give way to the transparency of the blockchain, while highlighting the job losses, assertion of special interests, and threat to social cohesion that will accompany this shift. With the same balanced perspective they brought to *The Age of Cryptocurrency*, Casey and Vigna show why we all must care about the path that blockchain technology takes—moving humanity forward, not backward.

This report attempts to demystify the sphere of commodities markets worldwide by providing an in-depth examination of the major commodity groups, focusing on product characteristics, supply chains, pricing, liquidity, financial intermediation, industry players and the interplay between derivatives markets and the underlying physical goods. In so doing, the report contributes to the international debate with important information about the diverse market structures across commodities, including supply and demand elasticities, concentration of ownership, infrastructure organisation and layers of financial participation. While describing the endogenous
