One of the most authoritative and comprehensive books on the subject of continued fractions, this monograph has been widely used by generations of mathematicians and their students. Dr. Hubert Stanley Wall presents a unified theory correlating certain parts and applications of the subject within a larger analytic structure. Prerequisites include a first course in function theory and knowledge of the elementary properties of linear transformations in the complex plane. Some background in number theory, real analysis, and complex analysis may also prove helpful. The two-part treatment begins with an exploration of convergence theory, addressing continued fractions as products of linear fractional transformations, convergence theorems, and the theory of positive definite continued fractions, as well as other topics. The second part, focusing on function theory, covers the theory of equations, matrix theory of continued fractions, bounded analytic functions, and many additional subjects.

Examines the universal phenomenon of cost-sharing in higher education -- where financial responsibility shifts from governments and taxpayers to students and families. Growing costs for education far outpace public revenue streams that once supported it. Even with financial aid and scholarships defraying some of these costs, students are responsible for a greater share of the cost of higher education. Shows how economically diverse countries all face similar cost-sharing challenges. While cost-sharing is both politically and ideologically debated, it is imperative to implement it for the financial health of colleges and universities From publisher description.

This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

McKeon and others delve into the significance of the novel as a genre form, issues in novel techniques such as displacement, the grand theory, narrative modes such as subjectivity, character, and development, critical interpretation of the structure of the novel, and the novel in historical context.

Following the Pulitzer prize-winning collection Stag's Leap, Sharon Olds gives us a stunning book of odes. Opening with the powerful and tender "Ode to the Hymen," Olds addresses and embodies, in this age-old poetic form, many aspects of love and gender and sexual politics in a collection that is centered on the body and its structures and pleasures. The poems extend parts of her narrative as a daughter, mother, wife, lover, friend, and poet of conscience that will be familiar from earlier collections, each episode and memory burnished by the wisdom and grace and humor of looking back. In such poems as "Ode to My Sister," "Ode of Broken Loyalty," "Ode to My Whiteness," "Blow Job Ode," and "Ode to the Last Thirty-Eight Trees in New York City Visible from This Window," Olds treats us to an intimate examination that, like all her work, is universal, by turns searing and charming in its honesty. From the bodily joys and sorrows of childhood to the deaths of those dearest to us, Olds shapes the world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader.

This book provides a comparative analysis of the impact of 'soft Europeanization' on higher education governance in Western Europe. Using concrete indicators of policy change, it focuses on university reform in Italy, France, Germany and the UK to explore how historical legacies and transnational communication have impacted policy pathways.

As demand for tertiary education continues to rise across Asia, countries are expanding their higher education systems outwards by constructing new universities, hiring more faculty and encouraging private provision. Many of these systems are also moving upwards by introducing new graduate programmes to ensure that there are enough qualified professors and researchers for the future. Based on data from the UNESCO Institute for Statistics (UIS) and a diverse range of national and international sources, this report provides a comprehensive view to evaluate different strategies to expand graduate education. Special focus is given to middle-income countries in the region which have recently experienced the most dramatic growth through an innovative mix of policies. For example, interventions aimed at improving university rankings may be controversial but are nonetheless reshaping university reforms. The report highlights the pros and cons by comparing the three most commonly-used university ranking systems. Across the region, countries are not simply seeking to accommodate more students - they are striving to build top-quality universities that can produce the research and workforce needed for national economic development. So this report presents a range of data to better evaluate the economic benefits flowing from university research, as well as the spillover effects to the private sector. The authors also analyse the ways in which international collaboration can boost the productivity and quality of university-based research. Overall, this report provides the data and analysis to help countries weigh the balance of different policies to expand their higher education systems.

"Higher education in Latin America and the Caribbean has expanded dramatically in the past 15 years, as the average gross enrollment rate has more than doubled, and many new institutions and programs have been opened. Although higher education access has become more equitable, and higher education supply has become more varied, many of the 'new' students in the system are, on average, less academically ready than are their more advantaged counterparts. Furthermore, only half of higher education students, on average, complete their degree, and labor market returns to higher education vary greatly across institutions and programs. Thus, higher education is at a crossroads today. Given the region's urgency to raise productivity in a low-growth, fiscally constrained environment, going past this crossroads requires the formation of skilled human capital fast and efficiently. 'At a Crossroads: Higher Education in Latin America and the Caribbean' contributes to the discussion by studying quality, variety, and equity of higher education in Latin America and the Caribbean. The book presents comprehensive evidence on the recent higher education expansion and evolution of higher education labor market returns. Using novel data and state-of-the-art methods, it studies demand and supply drivers of the recent expansion. It investigates the behavior of institutions and students and explores the unintended consequences of large-scale higher education policies. Framing the analysis are the singular characteristics of the higher education market and the market segmentation induced by the variety of students and institutions in the system. At this crossroads, a role emerges for incentives, information, accountability, and choice."

Since the identification of the first cases of the coronavirus in December 2019, there has been a significant amount of confusion regarding the origin and spread of the so-called 'coronavirus', SARS-CoV-2, and the cause of the disease COVID-19. Conflicting messages from the media and officials across different countries and organizations, the abundance of disparate sources of information, unfounded conspiracy theories on the origins of the virus, unproven therapies, and inconsistent public health measures, have all served to increase anxiety in the population. Where did the virus come from? How is it transmitted? How does it cause disease? Is it like flu? What is a pandemic? In this concise and accessible introduction, a leading expert provides answers to these commonly asked questions. This revised and updated edition now also covers how the virus mutates, how important these mutations are, how vaccines work, and what we can expect in the near and long-term future.

The purpose of the second volume of this book is to see how appeals to xenophobic, racist and nativist politics led by Trump and the Republican Party causes an upsurge in PTSS among black conservatives and those who are trying to fit-in. There is a backlash against by self-determining, Afrocentric, blacks against the self-hatred and self-destruction perpetuated by PTSS and assimilationists. The latter, surrogates of white nationalism, are "mental slaves" derived

from the "house slaves or servants" of previous generations. Today, they are among the most renowned black jurist, entertainment and media celebrities, scholars, politicians, retired physicians, ranked law enforcement officers, etc. The liberators that make blacks aware of the challenges, injustices and the knowledge needed to overcome PTSS are identified. They present the knowledge of our ancestral self-imprinted in the DNA. The purpose of presenting the truth about Black Americans long and glorious past before slavery is to refocus the mind from the false belief that our history began with American enslavement. According to the statements of "house slaves and servants" on the behalf of white conservatives, slavery under the Christian and benevolent white masters saved blacks from savagery and "eating each other." In contrast, this book debunks this and other white supremacist notions that are detrimental to our well-being. In doing so, it provides a well-researched approach to mitigate PTSS and elevate one's potential.

"Remarkable personal journals . . . revealing the combat experience of the German-Russian War as seldom seen before . . . a harrowing yet poignant story" (Military Times). Hans Roth was a member of the anti-tank panzerjager battalion, 299th Infantry Division, attached to the Sixth Army, as the invasion of Russia began. As events transpired, he recorded the tension as the Germans deployed on the Soviet frontier in June 1941. Then, a firestorm broke loose as the Wehrmacht tore across the front, forging into the primitive vastness of the East. During the Kiev encirclement, Roth's unit was under constant attack as the Soviets desperately tried to break through the German ring. At one point, after the enemy had finally been beaten, a friend serving with the SS led him to a site—possibly Babi Yar—where he witnessed civilians being massacred. After suffering through a brutal winter against apparently endless Russian reserves, his division went on the offensive again when the Germans drove toward Stalingrad. In these journals, attacks and counterattacks are described in you-are-there detail. Roth wrote privately, as if to keep himself sane, knowing his honest accounts of the horrors in the East could never pass Wehrmacht censors. When the Soviet counteroffensive of winter 1942 begins, his unit is stationed alongside the Italian 8th Army, and his observations of its collapse, as opposed to the reaction of the German troops sent to stiffen its front, are of special fascination. Roth's three journals were discovered many years after his disappearance, tucked away in the home of his brother. After his brother's death, his family discovered them and sent them to Rosel, Roth's wife. In time, Rosel handed down the journals to Erika, Roth's only daughter, who had emigrated to America. Roth was likely working on a fourth journal before he was reported missing in action in July 1944. Although his ultimate fate remains unknown, what he did leave behind, now finally revealed, is an incredible firsthand account of the horrific war the Germans waged in Russia.

Featuring the music of Carrie Underwood, Trisha Yearwood, Martina McBride, Reba McEntire, Sara Evans, Dixie Chicks, Chely Wright, Dolly Parton, Pam Tillis, Gretchen Wilson, Terri Cark, Tammy Wynette, Loretta Lynn and Patsy Cline! This edited volume critically examines the widely supported doctrine of the 'Responsibility to Protect', and investigates the claim that it*

*embodies progressive values in international politics. Since the United Nations World Summit of 2005, a remarkable consensus has emerged in support of the doctrine of the 'responsibility to protect' (R2P) – the idea that states and the international community bear a joint duty to protect peoples around the world from mass atrocities. While there has been plenty of discussion over how this doctrine can best be implemented, there has been no systematic criticism of the principles underlying R2P. This volume is the first critically to interrogate both the theoretical principles and the policy consequences of this doctrine. The authors in this collection argue that the doctrine of R2P does not in fact embody progressive values, and they explore the possibility that the R2P may undermine political accountability within states and international peace between them. This volume not only advances a novel set of arguments, but will also spur debate by offering views that are seldom heard in discussions of R2P. The aim of the volume is to bring a range of criticisms to bear from a variety of disciplinary perspectives, including international law, political science, IR theory and security studies. This book will be of much interest to students of the Responsibility to Protect, humanitarian intervention, human security, critical security studies and IR in general.*

A New York Times Bestseller "Funny, subversive, and able to excavate such brutally honest sentences that you find yourself nodding your head in wonder and recognition." --Lin-Manuel Miranda, composer and lyricist of *In the Heights* and *Hamilton: An American Musical* Are you a sensible, universally competent individual? Are you tired of the crushing monotony of leaping gracefully from one lily pad of success to the next? Are you sick of doing everything right? In this brutally honest and humorous debut, musician and artist George Watsky chronicles the small triumphs over humiliation that make life bearable and how he has come to accept defeat as necessary to personal progress. The essays in *How to Ruin Everything* range from the absurd (how he became an international ivory smuggler) to the comical (his middle-school rap battle dominance) to the revelatory (his experiences with epilepsy), yet all are delivered with the type of linguistic dexterity and self-awareness that has won Watsky devoted fans across the globe. Alternately ribald and emotionally resonant, *How to Ruin Everything* announces a versatile writer with a promising career ahead.

Essential reading for policy makers, institutional leaders, managers, advisors, and scholars in the field of higher education, *International Perspectives on the Governance of Higher Education* analyzes how the governance of higher education systems has evolved in recent years. This volume is an authoritative overview with contributions from authors from the U.K., the Netherlands, Denmark, Portugal, Norway, Italy, Ireland, Austria, Germany, Canada, the U.S. and Australia. Comprehensive in coverage, this volume explores how the use of disciplinary approaches and frameworks, particularly from political science, public administration and public policy help us to understand better the coordination of higher education systems. This is an arduous but gratifying challenge, given the current complexity of multi-actor and multi-level steering in higher education, rife with unintended outcomes and unanticipated dynamics. The edited volume looks to: The role of government, market and network steering in higher education systems. Governance in the knowledge society. How the use of disciplinary approaches help to better understand the steering policy processes and outcomes in higher education. Empirical studies exploring governance issues across systems and over time within systems.
