The Economics of Alfred Marshall brings together a number of leading international scholars for a timely reappraisal of Marshall's contribution to the development of economics. The aims of the contributors are firstly to revisit the work of Alfred Marshall and to investigate the unity of his projects, which contemporary authors often tend to underestimate; and

secondly to show how Marshall's approach is not only a subject for historians of economic thought, but may also provide a message that is relevant for the progress of economics.

**A Biography of the Reverend James Fitch,
1622-1702**

This book takes a completely new look at the Anthroposophical Soul Calendar. It is about the deeper meaning of the fifty-two weekly verses, which has remained essentially unexplored in the last hundred years since the first edition by Rudolf Steiner. A dense veil of Isis was spread over them, of which is well known that no mortal person can lift it. Only the immortal, psycho-spiritual human being, who knows himself at home in the

extrasensory, higher worlds, is capable of doing this. Only to him the weekly verses reveal themselves as a travel guide through these worlds and lift him up to ever higher spiritual-cosmic realms until he reaches the experience of God, from where he gradually descends again into a new life on Earth, enriched in spirit and fertilized in his soul. If the reader embarks on this journey, the spiritual archetype of the Soul Calendar is ultimately unveiled to him and he achieves an extended understanding of Man and Christ. By many quotations from Rudolf Steiner's lectures

and books, the author virtually lets Steiners himself elucidate the breathtaking depths of his mysterious weekly verses.

This monograph, based on newly declassified sources from Western and Russian archives as well as on communist texts about international law and neutrality, is the first English-language account of Soviet policy towards neutral yet capitalist Austria during the Cold War. In order to make neutrality a model for the West, the Kremlin presented the unique Soviet-Austrian relationship as "a good example of peaceful coexistence" and a showcase

for the benefits a Western state might reap by declaring neutrality. This honor, however, had strings attached: The communist doctrine of neutrality contained obligations that were expected to make it possible to exploit neutral states as instruments of Soviet policy and bring them nearer the socialist bloc.
