Functional Communication Training for Problem Behavior

The world lies devastated after the massive oil crisis that was described in LAST LIGHT. Human society has more or less entirely broken down and millions lie dead of starvation and disease. There are only one or two beacon communities that have managed to fashion a new way of living.Jenny Sutherland runs one of these groups. Based on safety - a few hundred people have rebuilt a semblance of normality in this otherwise dead world.But as her and her people start to explore their surroundings once again, they start to realise not every survivor has the same vision of a better future than their catastrophic past. There are people out there who would take everything they massive...

Kids stop, think, and predict as they solve skill-building word problems.

This volume provides a study guide for learning how to solve mathematical word problems.

100 day multiplication problem. Discover the changes that a few minutes of practice can bring. These are reproducible practice sheets to help students learn multiplication facts and recall them smoothly. This book focuses on the numbers 0-12. The back of the book includes an answer key, so students can easily check their own work.

'5 Minute Math Testers' series provides practice tests in all major topics of Grade 1. It is guaranteed to improve your child's math and success at every test they take. In this book you will find ninety short tests that are designed to help students prepare for achievement and standardised tests on a regular basis. You can also use these tests to find out how well your child has grasped mathematical concepts taught in the class. Taking these tests regularly will help to determine the areas of strength and weakness of your child. Once the gaps in the knowledge have been found out, you can target the teaching instructions for your child focusing on the weak areas. This book is an ideal supplement for your child's Math curriculum and keeps the students up on all math skills they learn. All you have to do is to fit these quick test-taking short drills into child's daily schedule. This will not only help your child to achieve a stellar score academically but also increase their repertoire of problem-solving strategies and mathematical understanding.

Children and adolescents with moderate and severe disabilities often have communication challenges that lead them to use problem behavior to convey their desires. This is the most comprehensive contemporary volume on functional communication training (FCT)—the individualized instructional approach that teaches a child socially acceptable communicative alternatives to aggression, tantrums, self-injury, and other unconventional behaviors. The expert authors provide accessible, empirically based guidelines for implementing FCT, and tips for overcoming obstacles. Grounded in the principles of applied behavior analysis, the book includes detailed strategies for developing a support plan, together with illustrative case examples.

Many K-6 teachers--and students--still think of mathematics as a totally separate subject from literacy. Yet incorporating math content into the language arts block helps students gain skills for reading many kinds of texts. And bringing reading, writing, and talking into the math classroom supports the development of conceptual knowledge and problem solving, in addition to computational skills. This invaluable book thoroughly explains integrated instruction and gives teachers the tools to make it a reality. Grounded in current best practices for both language arts and math, the book includes planning advice, learning activities, assessment strategies, reproducibles, and resources, plus a wealth of examples from actual classrooms.

The 5-Minute Teacher

Presents 250 multi-step math problems for students in grades four through eight, covering whole numbers, decimals, fractions, measurement, geometry, percents, ratio, and probability, and algebra and statistics; and includes an answer key.

Fun-filled math problems that put the emphasis on problem-solving strategies and reasoning The Algebra Teacher's Activity-a-Day offers activities for test prep, warm-ups, down time, homework, or just for fun. These unique activities are correlated with national math education standards and emphasize problem-solving strategies and logical reasoning skills. In many of the activities, students are encouraged to communicate their different approaches to other students in the class. Filled with dozens of quick and fun algebra activities that can be used inside and outside the classroom Designed to help students practice problem-solving and algebra skills The activities address a wide range of topics, skills, and ability levels, so teachers can choose whichever best suit the students' needs.

This collection of one hundred short essays gives readers a grand tour through contemporary and everyday mathematics. Behrends provides classics from his newspaper column in Die Welt, expands and illustrates them, and gives readers just enough information at a time to build mastery of concepts and applications. The topics range from pure mathematics to applied math, but all essays are suspenseful and fun to read. This is a very handy tool for teachers of all levels of mathematics (even elementary school children will be able to handle some of the topics), and Behrends assumes his readership has and interest but only a minimal background in mathematics so the essays are accessible but not dumbed-down.

Help middle schoolers engage in the classroom before it's too late! The authors' four principles of brain-based learning show you how to create strong, positive learning patterns.

Looking for a fun and easy way to help kids build math skills? Look no further! These 40 reproducible practice pages give you an instant and fun way to reinforce skills in multiplication, division, fractions, decimals, percentages and lots more. You can also use them for review, assessment, and test prep. Content is correlated to the NCTM standards. For use with Grades 6-8.

Even in an education system driven by the Common Core State Standards and high-stakes testing, teachers must adapt their methods to the styles of the modern learner. This means creating a student-centered classroom, driven by brief, interactive instruction from highly skilled teachers who know when the time is right to get out of the way. The five-minute teacher is one who delivers quick, thought-provoking lessons that send students clamoring to find meaning on their own, with the help of peers, and using the concepts and tools the teacher has provided in just a few minutes to create a wondrous, student-centered classroom. Barnes shares real anecdotes and practical strategies for transforming any learning environment into a remarkable, student-centered classroom, facilitated by a five-minute teacher.
