Few scholars have been as influential in finance, both as an academic field and an industry, as Eugene Fama. Since writing his groundbreaking 1970 essay on efficient capital markets, Fama has written over 100 papers and books that have been cited hundreds of thousands of times. Yet there is no one collection where one can easily find his best work in all fields. "The Fama Portfolio" will be an outstanding and unprecedented resource in a field that still concentrates mainly on questions stemming from Fama's work: Is the finance industry too large or too small? Why do people continue to pay active managers so much? What accounts for the monstrous amount of trading? Do high-speed traders help or hurt? The ideas, facts, and empirical methods in Fama's work continue to guide these investigations. "The Fama Portfolio" will be a historic and long-lasting collection of some of the finest work ever produced in finance."

Eleanor Smith's Hull House Songs: The Music of Protest and Hope in Jane Addams's Chicago reprints Eleanor Smith's 1916 folio of politically engaged songs, together with interdisciplinary critical commentary from sociology, history, and musicology.

Since the first edition was introduced, the fats and oils industry has undergone a number of changes and challenges that have prompted the development of new and revised products, technologies, and processing techniques. This second edition provides a more complete coverage of the pertinent subjects in fats and oils technology. At the same time it follows the original objective, i.e., to provide an overview of the fats and oils industry and serve as a starting point for new fats and oils scientists and engineers. This edition has been expanded from 19 to 29 chapters and subdivided into five sections, covering raw materials, processing, quality, applications, and new developments. The material covered in the 16 chapters retained from the first edition has been updated to include the advances in technology and practice. Thirteen new chapters that pertain to new areas of fats and oils technology have been added to supplement the original material.

Mobil pertama bermesin uap dibuat oleh Nicolas-Joseph Cugnot pada tahun 1769. Namun baru pada tahun 1808 François Isaac de Rivaz untuk pertama kalinya membuat mobil dengan mesin pembakaran dalam berbahan bakar hidrogen. Pada tahun 1870, Siegfried Marcus membuat mobil yang digerakkan dengan mesin pembakaran dalam yang memanfaatkan bahan bakar minyak bumi (bensin). Hingga saat ini mobil dengan bahan bakar minyak bumi baik yang berupa bensin maupun minyak solar/diesel masih dominan. Mobil berbahan bakar minyak menimbulkan ketergantungan terhadap minyak bumi yang pada suatu saat akan habis. Disamping itu, pembakaran bahan bakar minyak menyebabkan polusi udara. Bahan bakar yang lebih ramah lingkungan adalah bahan bakar gas. Oleh sebab itu konversi penggunaan bahan bakar minyak menjadi penggunaan bahan bakar gas adalah pilihan yang paling baik. Dengan cara konversi ini mesin mobil konvensional masih tetap dapat digunakan dengan hanya menambahkan alat konverter.

Why Not? After all, no-one had ever done it before. It would be one of the longest of all overland journeys – half way round the world, from the English Channel to Singapore. They knew that several expeditions had already tried it. Some had got as far as the desrts of Persia: a few had even reached the plains of India. But no one had managed to go on from there: over the jungle clad mountains of Assam and across northern Burma to Thailand and Malaya. Over the last 3,000 miles it seemed there were ‘just too many rivers and too few roads’. But no-one really knew ... In fact, their problems began much earlier than that. As mere undergraduates, they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work – wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80 of them) ranged from whiskey distillers to the makers of collapsible buckets.

In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore – to flash bulbs and champagne. Now, fifty years on, their book, ‘First Overland’, is republished – with a foreword by Sir David Attenborough. After

all, it was he who gave them that film.

The Complete Idiot's Guide to Finding Mr. Right

Oconeean; 1904

From the late 1940s to the mid-1970s, Richard Nixon was a polarizing figure in American politics, admired for his intelligence, savvy, and strategic skill, and reviled for his shady manner and cutthroat tactics. Conrad Black, whose epic biography of FDR was widely acclaimed as a masterpiece, now separates the good in Nixon—his foreign initiatives, some of his domestic policies, and his firm political hand—from the sinister, in a book likely to generate enormous attention and controversy. Black believes the hounding of Nixon from office was partly political retribution from a lifetime's worth of enemies and Nixon's misplaced loyalty to unworthy subordinates, and not clearly the consequence of crimes in which he participated. Conrad Black's own recent legal travails, though hardly comparable, have undoubtedly given him an unusual insight into the pressures faced by Nixon in his last two years as president and the first few years of his retirement.
