The Paper Industry

*First published in 1982,
Education in Africa offers a
comprehensive treatment of
the development of education
in Africa. Until now only
scattered documents on
educational growth in
individual countries have
been available; works
devoted to Africa as a whole
have tended towards the
general and have, by and
large, been written by
outside observers. This book*

is a collection of illuminating syntheses of major trends in educational development in Africa, by renowned African educationists, and is the first attempt to supply the need for a comprehensive book on African education written from an African viewpoint. All but one of the chapters were written specially for the book by leading African educators each of whom has had a distinguished career and wide experience in education in his or her own country; they represent eleven nations in all. The volume is designed for African students, teachers and

administrators and will also be welcomed by educational planners and by scholars working in the fields of comparative education and the history of education. It will be of special interest to departments, institutions and faculties of education in all the universities and colleges of education in Africa, and to educators and students worldwide who are concerned with comparative African education.

It is with great pleasure that we present to you a collection of over 200 high quality technical papers from more than 10 countries that were presented at the Biomed 2008.

The papers cover almost every aspect of Biomedical Engineering, from artificial intelligence to biomechanics, from medical informatics to tissue engineering.

They also come from almost all parts of the globe, from America to Europe, from the Middle East to the Asia-Pacific. This set of papers presents to you the current research work being carried out in various disciplines of Biomedical Engineering, including new and innovative researches in emerging

areas. As the organizers of Biomed 2008, we are very proud to be able to come-up with this publication. We owe the success to many individuals who worked very hard to achieve this: members of the Technical Committee, the Editors, and the International Advisory Committee. We would like to take this opportunity to record our thanks and appreciation to each and every one of them. We are pretty sure that you will find many of the papers illuminating and useful for your own research and study. We hope that you will enjoy yourselves going through them as much as we had enjoyed compiling them into the proceedings. Assoc. Prof. Dr.

Diploma in Mechanical Engineering Group as per the syllabus prescribed by SBTE. We have observed the students facing extreme difficulties in understanding the basic principles and fundamental concepts without adequate solved problems along with the text. To meet this basic requirement of students, sincere efforts have been made to present the subject matter with frequent use of figures and lots of numerical examples.

business ideas upon a meticulous evaluation of the entrepreneurial prospects. Creation of business ideas is not sufficient, they must be tested on techno-fiscal, economic and authorized viewpoints. NPCS Team has identified some projects for the Investors and these Project Profiles conduct a profound road map for Effectual business venture. It discusses about requirement of finance, plant & machinery, regulation & standard for educational institutions, etc. The major contents of this book are project profiles of projects like Dental College, Engineering College, Industrial Training Institute (I.T.I.), Management College (BBA, MBA, BCA & MCA), Marine Engineering College, Medical College With Hospital, Pharmacy College (B. Pharma), Polytechnic
