*February issue includes Appendix entitled Directory of United States Government periodicals and subscription publications; September issue includes List of depository libraries; June and December issues include semiannual index*

*Aircraft Alerting Systems Criteria Study: Collation and analysis of aircraft system data Operator's, Unit, Direct Support, and General Support Maintenance Manual (including Repair Parts and Special Tools Lists) for Trailer, Chassis, 1-ton, 2-wheel M514 (NSN 2330-00-542-5753) and Trailer, Chassis, 2-ton, 2-wheel M390C (NSN 2330-00-542-3491).*

*Boeing Maintenance Training Manual*

*Direct Support and General Support Maintenance Manual (including Repair Parts and Special Tools Lists) for Engine, Diesel, 12 Cylinder, Turbocharged, GMC Allison - Detroit, Diesel Model 7123-7396 (NSN 2815-00-148-9470).*

*Airport management*

*Operator's, Organizational, Direct Support, and General Support Maintenance Manual (including Repair Parts and Special Tools List)*

This is an illustrated technical guide to the Boeing 737 aircraft. Containing extensive explanatory notes, facts, tips and points of interest on all aspects of this hugely successful airliner and showing its technical evolution from its early design in the 1960s through to the latest advances in the MAX. The book provides detailed descriptions of systems, internal and external components, their locations and functions, together with pilots notes and technical specifications. It is illustrated with over 500 photographs, diagrams and schematics. Chris Brady has written this book after many years developing the highly successful and informative Boeing 737 Technical Site, known throughout the world by pilots, trainers and engineers as the most authoritative open source of information freely available about the 737.

*The Boeing 737 Technical Guide*

*On January 13, 1982, Air Florida Flight 90, a Boeing 737-222, was a scheduled flight to Fort Lauderdale, Florida, from Washington National Airport, Washington, D.C. There were 74 passengers and 5 crewmembers on board. The flight was delayed about 1 hour 45 minutes due to a moderate to heavy snowfall. Shortly after takeoff the aircraft crashed at 1601 e.s.t. into the 14th Street Bridge over the Potomac River and plunged into the ice-covered river, 0.75 nmi from the departure end of runway 36. Four passengers and one crewmember survived the crash. Four persons in the vehicles on the bridge were killed; four were injured. The National Transportation Safety Board determines that the probable cause of this accident was the flightcrew's failure to use engine anti-ice during ground operation and takeoff, and to take off with snow/ice on the airfoil surfaces of the aircraft. Contributing to the accident were the ground delay between de-icing and takeoff clearance.*
