The Lansdowne ms (No. 851) of Chaucer's Canterury tales

The Liflade of St. Juliana, from Two Old English Manuscripts of 1230 A. D.

Hilariously imagined text conversations—the passive aggressive, the clever, and the strange—from classic and modern literary figures, from Scarlett O'Hara to Jessica Wakefield Mallory Ortberg, the co-creator of the cult-favorite website The Toast, presents this whimsical collection of hysterical text conversations from your favorite literary characters. Everyone knows that if Scarlett O'Hara had an unlimited text-and-data plan, she'd constantly try to tempt Ashley away from Melanie with suggestive messages. If Mr. Rochester could text Jane Eyre, his ardent missives would obviously be in all-caps. And Daisy Buchanan would not only text while driving, she'd text you to pick her up after she totaled her car. Based on the popular web-feature, Texts from Jane Eyre is a witty, irreverent mashup that brings the characters from your favorite books into the twenty-first century.

User modeling researchers look for ways of enabling interactive software systems to adapt to their users-by constructing, maintaining, and exploiting user models, which are representations of properties of individual users. User modeling has been found to enhance the effectiveness and/or usability of software systems in a wide variety of situations. Techniques for user modeling have been developed and evaluated by researchers in a number of fields, including artificial intelligence, education, psychology, linguistics, human-computer interaction, and information science. The biennial series of International Conferences on User Modeling provides a forum in which academic and industrial researchers from all of these fields can exchange their complementary insights on user modeling issues. The published proceedings of these conferences represent a major source of information about developments in this area.
