This book covers a simple investment technique for aspiring, beginner and expert Amazon sellers... Back in 2017 I learned about options trading and was immediately struck by the similarities between selling on Amazon and investing in the financial markets. There was one major difference though... Investing in physical goods to sell on Amazon holds "real value" and that value does not diminish over time. Unlike the stock market whose value is only on paper and whose products are extremely volatile and unpredictable. Stocks are driven by emotion. Physical goods are driven by "value" and supply and demand. Once I understood the correlations between the financial markets and investing in goods for resale on Amazon, I had a major revelation. Selling on Amazon isn't so much about selling products. It's more about reinvesting your capital using a simple capital compounding technique. In other words, to make more money on the same effort, you need a system for reinvesting your profits as they come in. When you invest your capital into products that sell within a week (for example) then you can easily compound your working capital at least 3 to 4 times in a 30 day period. This is how the big retailers make major returns on tiny ROIs. This is how Amazon has become a giant in eCommerce. Even small retailers can use the same principles to create one of the most powerful investment vehicles in existence today. This book is my chronicle of the financial laws I discovered in options trading that, when applied to the Amazon business, led to a major change in profitability. Suddenly I was making 3 times more profit on the same effort and I was only managing a few simple tasks to achieve that. I wasn't spending more time, I was simply making more money. I lay out my discoveries in this book! In my book, I uncover some math realities that will surprise you at first, and when you play the numbers, you'll learn some new rules that may change your Amazon business like they did for me. Best of all, the rules are so easy to understand, follow and manage that you don't need to know any math or have any special skills or software to implement them. Most sellers are losing a TON of money! It's a fact that most sellers don't run their Amazon business like an investor. Those sellers are losing a bunch of money and don't even know it! Most sellers are leaving huge profits on the table. My book will uncover and reveal all the areas where sellers lose money. My book then goes on to provide you with 5 simple rules and daily tasks that will manage these financial laws so you can finally plug up all your profit leaks!
