Naval Aviation News

Heli the Helo

A big blue helicopter and his best friend in the world, pilot Joe Baker, are invited to an air show in Pensacola, Florida. Joe and Heli are excited to attend the air show and have to make their way from San Diego to Pensacola. They run into a little bit of

Get Free Air Show!

trouble along the way but make it safely to the air show. However, once they arrive Heli quickly realizes he is not like the other flying machines and becomes self-conscious about himself when none of the children want to see him. Author Shawn T. Robinson brings to life a heartwarming character the reader is sure to identify with as he explores the United States and learns about himself during one of the great American past times... The Air Show.

In 1923—just 20 years after the Wright brothers' first flight at Kitty Hawk—a Naval Reserve aviation training program was established at Great Lakes Naval Training Center. Originally, sea planes and a few small land-based planes were used for

Get Free Air Show!

primary flight instruction. With the development of heavier, faster military aircraft, the Great Lakes facility became inadequate. Under Rear Adm. John Downes, commandant of the 9th Naval District, the search for a suitable new location was undertaken. Curtiss-Reynolds-Wright Airfield was deemed ideal for relocation of the aviation training program. From humble beginnings as Naval Reserve Aviation Base Chicago, Naval Air Station Glenview (the official U.S. Navy designation) went on to play a vital and unique role during World War II. Until closure in 1995, the base was home to thousands of Navy and Marine Reserve pilots, aircrews, and support personnel—proudly known as weekend

Ellie and Gill are going to the Air Show!

Get Free Air Show!

There will be over 10,000 planes there. But there's one kind of plane in particular that Ellie's got her eye on. Will she go up in a stunt plane? Beloved motion picture and television actor Treat Williams and acclaimed picture book creator Robert Neubecker team up to give kids a tour of the air show. Loaded with color and action and lots of cool pilot-speak, this book is the perfect book for read-alouds as well as for poring over again and again. Air Show is sure to find fans amongst young lovers of gadgets and vehicles. Blue sky? Check! Cool planes? Check! Ready for take-off! You're invited to EAA AirVenture - a weeklong airshow so packed with aircraft that for one week Oshkosh's control tower is the busiest in the world. Every year the skies over Oshkosh, Wisconsin, rumble with the sound of aircraft engines. It's the annual EAA AirVenture, a gathering of aviation enthusiasts like no other. The

Get Free Air Show!

weeklong airshow is sponsored by the Experimental Aircraft Association (EAA) - an international organization based in Oshkosh - and is the largest of its kind anywhere in the world. EAA Oshkosh showcases the many types of aircraft that have appeared there and even offers a glimpse of the lively crowds and campgrounds. At EAA AirVenture, hundreds of thousands of aircraft enthusiasts flock to the Wittman Regional Airport to gawk at an amazing collection of all things airborne. From handsome old canvas-covered biplanes to brawny warbirds to home-built models to massive jetliners, the traffic in the air and on the runway make the Wittman's control tower in tiny Oshkosh the busiest in the world. It's an adventure to be sure, and the highlights are all here. Organized according to aircraft types, EAA Oshkosh features: - Warbirds - Vintage aircraft -

ascent, on July 5, 1858. In 1861, the capital city's most famous resident, Abraham Lincoln, then residing in the White House, authorized the creation of the first U.S. "air force," a balloon to observe Confederate troops. Springfield's interface with aviation has been a steady stream of hot-and-cold-running enthusiasm since airplanes began flying from the state fair racetrack infield about 1910. Springfield

Get Free Air Show!

Aviation chronicles that flow and concludes with photographs from Abraham Lincoln Capital Airport in early 2008. It presents photographs of memorable airplanes, airships, and prominent aviators from the author's extensive collection, augmented by contributions from Springfield Airport Authority, Lincoln Library's Sangamon Valley Collection, and many others. The Red Knight is the product of 25 years of

Get Free Air Show!

meticulous research. It is, arguably, the most comprehensive account ever written about the Canadian Air Force's legendary solo jet-aerobatics performer. An important part of Canadian aviation history, the Red Knight is second only to the Snowbirds in longevity and total number of performances. The Red Knight chronicles the history of the program, from its conception in 1957 to its cancellation in 1970. Everyone who

Get Free Air Show!

has enjoyed watching the precision, grace and beauty of aerobatic flight will enjoy this insight into the "behind the scenes" aspect of aerial displays. A fine addition to any aviation reference library, *The Red Knight* will be of particular interest to anyone who remembers the program or saw a performance of this uniquely Canadian display. *The Red Knight* is illustrated with rare photographs never published before. The

book is further enhanced by specially commissioned works of art from noted Canadian Aviation Artist, Don Connolly. Details of the various Red Knight paint schemes are provided through aircraft profiles, also specifically created for this publication.

Together, this unique pictorial collection vividly portrays the legacy of the Red Knight.

Air Show ; Frameworks 1966-7 :
[three Essays]

Celebrates the courage and drive of a collection of amazing aviators who took part in the first cross-country air race for women in 1929 from California to Ohio, featuring famed-flyers Opal Kunz and Florence Pancho Barnes.

Once again, more than a million visitors

Get Free Air Show!

were thrilled to see spectacular aerial acrobatics, precision flying, and unbelievable jet-speed performances just overhead and offshore with near-perfect weather at this year's Huntington Beach Great Pacific Airshow. The Air Force Thunderbirds, flying Lockheed Martin F-16 Fighting Falcons, again performed mind bending precision and choreographed sequences as they rolled and passed in tight formation above Surf City. The United Kingdom's Royal Air Force Aerobatic team, the Red Arrows and the Canadian Forces Snowbirds performed equally stunning aerial performances. Other performances included Lucas Oil pilot Mike Wiskus, the Special Operations Command parachute team, a FedEx fly-by, dueling jetpack riders and demonstrations from the Air Force F-35 Lightning II and A-10C Thunderbolt II, known for it's

Get Free Air Show!

unique role in close air support for ground troops. Jeff Boerboon appeared in his Yak 110, a one-of-a-kind aircraft made of two fuselages, two propellers, and one jet engine. Lyon Air Museum's C-47 Dakota, the "Willa Dean", flying since 1941, made some lovely pass-overs as she offered the crowd a thrill with the unique rumble of her engines. The excitement and thrills were enjoyed by all on the beach, out on off-shore boats, and in the nearby area. We're looking forward to next year (and will bring earplugs!).

The true stories of the most daring of pilots—and the deadly risks they take to thrill the audiences below. In the early days of aviation, spectators gathered whenever a new flying machine attempted to leave the ground. The trick was to get them to pay. Takeoffs and landings did not sell tickets—but people

Get Free Air Show!

lined up, money in hand, to watch a “dip of death,” in which an aviator would dive from as high as he or she dared and pull up at the last second. Risk always sells, and flying was man’s riskiest endeavor yet. From the start, the “exhibition” pilots stood out. Everything about an aerobatic routine requires a degree of skill and a commitment to practice the inconceivable, presenting innumerable risks to life and limb. And with risk, often, comes tragedy. *The Crowd Pleasers* is a sweeping history of air show accidents beginning in 1910 with the death of Charles Stewart Rolls, cofounder of Rolls-Royce, and ending in the present day. It brings to light some of the most notable air show accidents of all time and explores the aviators behind them, their stories, and their motivations. In so doing, it illuminates the role played by choice, social circumstance, and fate

Get Free Air Show!

in these often devastating accidents—and the lives attached to them.
