

Alla Conquista Dell'Antartide Dominio Geostrategico E Controllo Delle Risorse Idriche Ed Energetiche Del Polo Sud

Bob Orango sta cercando un omicida, anzi due, forse qualcuno in pi: come in una favola (o nella realt) incontrer buoni e cattivi, ma in questa favola distorta i buoni diventano assassini mentre gli assassini sono giustizieri e gli unici perbene rimangono i peggiori. Ogni pista fa perdere le tracce di s per ricomparire pi in l, sempre pi vicina all'orlo di un abisso: tra un sabba e una partita di droga, tra una resa dei conti e un serial killer, tra una serie d'indizi assurdi e un toscano extravecchio, Bob Orango dovr risolvere l'omicidio avvenuto in una prestigiosa universit investigando casualmente nella notte di Roma. Antonio Romano al suo ennesimo romanzo giallo qui si cimenta tra il sottobosco umano e le sue mille contraddizioni. Giovane autore barese Romano gi assunto tra le promesse italiane della letteratura hard boiled. Bob Orango is looking for a murderer, or rather two, maybe a few more: as a fable (or reality) will meet good and bad, but in this story the good become distorted while the murderers are murderers and executioners are the only decent worst . Every track lose track of him to reappear farther, ever closer to the edge of an abyss: between a sand and a lot of drugs, including a showdown and a serial killer, including a series of clues absurd and a Tuscan

Extravecchio Bob Orango must solve the murder took place in a prestigious university investigating random night in Rome.

Dr. Ethan LaPierre was content in his tenure as a professor at the prestigious Oxford University, spending his days in the classroom, his leisure time with his dearest friend, Dr. Colin Bishop. An accomplished intellectual rooted in academia, Ethan had no greater aspirations and no intention of altering his current trajectory in life until an astounding discovery in the field of science captured his attention and imagination, grabbing him by the throat. His friend and longtime colleague, Dr. Anson Van Ruden would introduce Ethan to this conceptual project of limitless potential while still in its infancy. Although intrigued, he'd initially rejected the offer to join Anson's team, opting instead for the simpler life as a professor of history and philosophy, not believing an opportunity presented him would ever come to fruition. It was not until the moment a program shrouded in secrecy for years finally went public and took center stage that Ethan took notice, reconnecting with Anson and the project.

Ultimately, by surrendering to his innate curiosity, wondering what it could mean for him, for humanity and for history, Ethan took a decided leap of faith. What followed is an extraordinary tale of the human spirit and mind, a divine and hellacious roller coaster ride inside a tornado of emotions and experiences that will leave the main character and the reader breathless. "In A Flicker" delves into the deepest, darkest fears of any mortal soul,

what one fears of them self and likewise, the ones they love. Those who dare to jump into the chasm will emerge haunted by the ghosts who have been there all along.

"Aurora Australis" by Sir Ernest Henry Shackleton, Frank Wild, Tannatt William Edgeworth David, George Marston, Alistair Mackay, James Murray, Douglas Mawson. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

'In this book, Bloom takes what might seem a very localized subject and shows how it opens up to all the central questions today in cultural studies around gender, nationhood, the politics of imperialism, race, male homosocial behavior, and the sociality of science. Gender on Ice has an eloquence and elegance that positively refreshing and the prose is stylish, engaging, and direct.' -Dana Polan, University of

Il tramonto della nostra civiltà

How We Created the Anthropocene

The Birthday Boys

It is the coldest, windiest, driest place on earth, an icy desert of unearthly beauty and stubborn impenetrability. For centuries, Antarctica has captured the imagination of our greatest scientists and explorers, lingering in the spirit long after their return. Shackleton called it "the last great journey"; for Apsley Cherry-Garrard it was the worst journey in the world. This is a book about the call of the wild and the response of the spirit to a country that exists perhaps most vividly in the mind. Sara Wheeler spent seven months in Antarctica, living with its scientists and dreamers. No book is more true to the spirit of that continent--beguiling, enchanted and vast beyond the furthest reaches of our imagination. Chosen by Beryl Bainbridge and John Major as one of the best books of the year, recommended by the editors of Entertainment Weekly and the Chicago Tribune, one of the Seattle Times's top ten travel books of the year, Terra Incognita is a classic of polar literature.

La finanza divenuta autonoma; la crescita e il declino demografici e la scarsità delle risorse naturali e alimentari; il maggior peso delle potenze emergenti e l'incertezza aumentata con la fine dell'"ordine militare"; le frontiere divenute permeabili e le nuove tecnologie dell'informazione che hanno reso il mondo più interdependente: è questo il contesto attuale nel quale opera la geopolitica, scienza che studia le relazioni fra geografia fisica e

The Human Planet

aspetti psicologici dell'insegnamento della storia

A remarkable exploration of the science, history, and politics of the Anthropocene, one of the most important scientific ideas of our time, from two world-renowned experts “A relentless reckoning of how we, as a species, got ourselves into the mess we’re in today, . . . told with determination and in chiseled, almost literary prose.”—Christoph Irmscher, *Wall Street Journal* Meteorites, mega-volcanoes, and plate tectonics—the old forces of nature—have transformed Earth for millions of years. They are now joined by a new geological force—humans. Our actions have driven Earth into a new geological epoch, the Anthropocene. For the first time in our home planet’s 4.5-billion-year history a single species is increasingly dictating Earth’s future. To some the Anthropocene symbolizes a future of superlative control of our environment. To others it is the height of hubris, the illusion of our mastery over nature. Whatever your view, just below the surface of this odd-sounding scientific word, the Anthropocene, is a heady mix of science, philosophy, and politics linked to our deepest fears and utopian visions. Tracing our environmental impacts through time, scientists Simon Lewis and Mark Maslin reveal a new view of human history and a new outlook for the future of humanity in the unstable world we have created.

Captain Scott and the four men with him, who suffered extraordinary hardships before finally dying during their 1912 attempt to be the first to reach the South Pole. 'Bainbridge's account of the horribly familiar story is both fresh and sure-footed. The power of her imagination, her clarity of expression and mastery of language are more striking than anything else I have read this year' Jane Shilling, Sunday Telegraph The Birthday Boys is one of Beryl Bainbridge's most acclaimed novels, telling the story of Scott's doomed expedition through the voices of five men on the voyage. As Scott, Petty Officer Taff Evans, ship's doctor Dr Edward Wilson, Lieutenant Henry Bowers and Captain Lawrence Oates step forward for their place in the narrative, the reader is gripped by the the characters themselves alongside the vividly evoked period.

Restoration of Amundsen's lantern slides

OF all the writings of Plato the Timaeus is the most obscure and repulsive to the modern reader, and has nevertheless had the greatest influence over the ancient and mediaeval world. The obscurity arises in the infancy of physical science, out of the confusion of theological, mathematical, and physiological notions, out of the desire to conceive the whole of nature without any adequate knowledge of the parts, and from a greater perception of similarities which lie on the surface than of differences which are hidden from view.

respingimenti. Il 2009 sarà ricordato come un anno nero della nostra storia. Un anno in cui molti nodi sono venuti al pettine, tutti insieme, e ci hanno riconsegnato un paese stanco, involgarito, ripiegato su se stesso e sui suoi atavici difetti. Giorgio Bocca racconta il nostro Annus Horribilis con la veemenza e l'intransigenza di cui può essere capace solo un grande "antitaliano" come lui. La sua è un appassionato j'accuse contro i mali apparentemente inestirpabili della nostra vita pubblica: il trasformismo, l'opportunismo, la memoria corta, la furberia diffusa, l'impunità, l'ossequio al potente di turno..

The war between humans halted as the great military powers scrambled to meet an even deadlier foe. Already, Berlin and Washington had been wiped out and the US and the Axis territories lay under the invaders' control. Yet humanity refused to surrender.

Radically reconceives Friedrich Nietzsche's early life, offering an alternative approach and new insights into the early development of Nietzsche's philosophy.

Annus horribilis

"And I tell you, if you have the desire for knowledge and the power to give it physical expression, go out and explore," wrote Apsley Cherry-Garrard in the opening chapters of his now classic exploration narrative, *The Worst Journey in the World*. The incredible tale that he tells is of the fated last voyage of Captain Robert Scott and his crew to the outermost reaches of the South Pole on the *Terra Nova*. Chronicling the journey of the *Terra Nova* from England in 1910 to New Zealand in 1913, *The Worst Journey in the World* vividly describes the entirety of Scott's harrowing and tragic final expedition. Driven by a lust to investigate the untold scientific knowledge contained within the South Pole, these courageous pioneers embarked on a journey into previously unexplored territory, subjecting themselves to the ultimate physical and mental limits as they traveled the massive expanses of the icy tundra. Cherry-Garrard was a key member of the *Terra Nova* crew that, in addition to the desire to uncover scientific data, desperately sought to be the first Europeans to reach the South Pole. But the expedition was thwarted at every turn by punishing weather, extreme bad luck, and the intense physical and mental decline of the crew on the final stages of their journey.

Confronted by the shattering knowledge that rival explorer Roald Amundsen had reached the South Pole only a few weeks before them, Scott's team then had to negotiate the last stage of their voyage, a doomed attempt which has no equal in peril, disaster, and tragedy. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

Nel corso del tempo e in culture diverse le montagne hanno nutrito l'immaginazione letteraria come poche altre entità naturali. Strutture simboliche e metaforiche, le vette hanno avuto un ruolo centrale nell'elaborazione di teorie estetiche e filosofiche; in alcune tradizioni europee, sono entrate anche a far parte dei discorsi coloniali e imperiali. Esaltante e tragica, la storia delle scalate si è intersecata con la dimensione sportiva e psicologica, in una proiezione verso l'estremo connotata in senso fisico e mentale. Il volume, che trae origine dai contributi presentati durante un incontro

Pearls of Wisdom unites over 400 years of practice experience. Phenomenal doctors who are workingwomen, mothers, daughters, sisters and mentors to many share with frank openness emotional and motivational stories on maintaining focus while moving forward and experiencing life events. Dr. Liz ties their stories together to share vignettes on working through pain, birth, death, practice, and all of life's little surprises. A poignant, authentic, no holds barred book to which any woman can relate. Not only do you come to appreciate the dynamics of being a woman, but gather a sense of love for the chiropractic profession. This book is a brilliant display of professional leaders with one booming 'revelation' after another, and spectacularly pieced together. It provokes you to ask yourself questions for growth and guides you through pivotal life experiences. At a minimum, you will

gain a renewed passion to serve in any endeavor you choose. A must read, to implement approaches from their collective wisdom. The book presents for the first time the restoration of Amundsen's glass slides, one of the most beautiful collections of slides in the world. The 248 slides are the photographic testimony of three great explorations: the Northwest Passage (1903-1906), the conquest of the South Pole (1910-1912) and the Maud expedition (1918-1925). Discovered by chance in 1986, the slides were restored in 2009 by Pietro Librici at the National Library of Norway, in a continuous cooperation with the institute team. The restoration is presented analytically in its methodological, technical, scientific and operational aspects, constituting an updated model of intervention. Critical historical studies that accompanied the restoration and the expressive features of the slides have also led the author to identify Amundsen's own style which lies between documentary photography and photographic documentation and make the book a particular opportunity to immerse in the charm of polar expeditions, in the first years of the 20th century when the poles were the only areas of terra incognita left on the world map.
