Automation Is a Myth

"The CEO" is a fast paced corporate thriller of loves come and gone, innovation, resilience, corporate philanthropy, vision, and deception. Corporate business leaders are protected by their own small armies of private security whose power will surprise. The story takes the reader behind the scenes and into the back office meetings of both corporations and countries; travelling from Denver to New York to London to Bogota and to Paris. As Mitch and his team of loyalists' race against time they are faced with constant revelation of threats against the company and those involved; including the life of the woman that Mitch falls deeply in love with. The depth of the plot reveals a 200 year old secret between two of the world's most powerful countries. If the secret is revealed it could destroy the balance of power in the world. Though, if the secret stays protected it could crush all that Mitch Jacobs desires. Although Mitch Jacobs never questions his ability to conquer the current forces against him, it is a race to answer the questions: Will Mitch be able to discover who is leading the attack on him before it is too late? Is this conspiracy the result of the usual corporate competition or does it emanate from the power hungry executives in his company? What interest do certain world leaders have in this plot that will destroy all that Mitch has built? Most important Mitch has fallen in love with two women whose essence and similarities (and differences) of character lead him on his mission

For some, automation will usher in a labor-free utopia; for others, it signals a disastrous age-to-come. Yet whether seen as dream or nightmare, automation, argues Munn, is ultimately a fable that rests on a set of triple fictions. There is the myth of full autonomy, claiming that machines will take over production and supplant humans. But far from being self-acting, technical solutions are piecemeal: their support and maintenance reveals the immense human labor behind "autonomous" processes. There is the myth of universal automation, with technologies framed as a desituated force sweeping the globe. But this fiction ignores the social, cultural, and geographical forces that shape technologies at a local level. And, there is the myth of automating everyone, the generic figure of "the human" at the heart of automation claims. But labor is socially stratified and so automation's fallout will be highly uneven, falling heavier on some (immigrants, people of color, women) than others. Munn moves from machine minders in China to warehouse pickers in the United States to explore the ways that new technologies do (and don't) reconfigure labor. Combining this rich array of human stories with insights from media and cultural studies, Munn points to a more nuanced, localized, and racialized understanding of the "future of work."

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of The Laws of Human Nature. In the book that People magazine proclaimed " beguiling " and " fascinating," Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (" Law 1: Never Outshine the Master "), others teach the value of confidence (" Law 28: Enter Action with Boldness "), and many recommend absolute self-preservation (" Law 15: Crush Your Enemy Totally "). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, The 48 Laws of Power is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

Pen is trying to live up to his family's massive successes and equally massive expectations—but is always looking for a chance to run. The sprawling, untamed city of Porta Caída is a world designed by the rich—with favorable tax laws, soft human rights protections, and imported plants and animals taking over the land.
