

An Astronaut's Guide To Life On Earth

Travel to space and back with astronaut Chris Hadfield's "enthraling" bestseller as your eye-opening guide (Slate). Colonel Chris Hadfield has spent decades training as an astronaut and has logged nearly 4000 hours in space. During this time he has broken into a Space Station with a Swiss army knife, disposed of a live snake while piloting to the exterior of an orbiting spacecraft. The secret to Col. Hadfield's success-and survival-is an unconventional philosophy he learned at NASA: prepare for the worst- and enjoy every moment of it. In An Astronaut's Guide to Life on Earth, Col. Hadfield takes readers deep into his years of training and space exploration to show how to make entertaining stories filled with the adrenaline of launch, the mesmerizing wonder of spacewalks, and the measured, calm responses mandated by crises, he explains how conventional wisdom can get in the way of achievement — and happiness. His own extraordinary education in space has taught him some counterintuitive lessons: don't v sweat the small stuff. You might never be able to build a robot, pilot a spacecraft, make a music video or perform basic surgery in zero gravity like Col. Hadfield. But his vivid and refreshing insights will teach you how to think like an astronaut, and will change, completely, the way you view life on Earth — especially your own. "Hadfield provides a unique perspective on the universe, but also a deeply thoughtful explorer of the human condition." —Maria Popova, Brain Pickings

_____ *The* puzzle book of 2018, as featured in the Times, Daily Telegraph, BBC Radio 4, and BBC Breakfast, and a Guardian Book of the Year pick. Have YOU got what it takes to be an astronaut? This book will help readers of all ages find out. Featuring 100 real astronaut tests and exercises from the European Space Agency, this is an easy to fiendishly hard, The Astronaut Selection Test Book goes where no puzzle book has gone before. Including puzzles and tests on: · visual perception and logic · mental arithmetic and concentration · psychological readiness · teamwork and leadership · survival, physical and medical skills · foreign languages (every astronaut has to know a few) · space science · astronomy · physics · chemistry · biology · psychology · mathematics · geography · history · art · music · sports · and more. This book draws on Tim Peake's first-hand experience of applying to be an astronaut in 2008, when he and five others were chosen - out of over 8,000 applications! We've all dreamed of being an astronaut, though of the estimated 100 billion people who have ever lived, only 557 people have travelled to space. But with this unprecedented look into the mind of an astronaut, you can see how it's done. This is a book that will help you understand the challenges of space travel, and how dreams can become reality... _____ HOUSTON, WE HAVE A PROBLEM SOLVER... _____ 'Engrossing... a brain buster of a book... You'll learn plenty about space and what it takes to be an astronaut, but you'll also sharpen up your broader knowledge. For anyone interested in the space race and the imminent journey to Mars, this is a must-read.' —The New York Times

A devastating and lyrical work of nonfiction, Young Men and Fire describes the events of August 5, 1949, when a crew of fifteen of the US Forest Service's elite airborne firefighters, the Smokejumpers, stepped into the sky above a remote forest fire in the Montana wilderness. Two hours after their jump, all but three of the men were dead. For Norman Maclean, this was a defining moment in his life. In Young Men and Fire, Maclean puts together the scattered pieces of the Mann Gulch tragedy in Young Men and Fire, which won the National Book Critics Circle Award. Alongside Maclean's now-canonical A River Runs through It and Other Stories, Young Men and Fire is recognized today as a classic of the American West. This twenty-fifth anniversary edition of the book he would write—including a powerful new foreword by Timothy Egan, author of The Big Burn and The Worst Hard Time. As moving and profound as when it was first published, Young Men and Fire honors the literary legacy of a man who gave voice to an essential corner of the American soul.

NATIONAL BEST SELLER A stunning, personal memoir from the astronaut and modern-day hero who spent a record-breaking year aboard the International Space Station—a message of hope for the future that will inspire for generations to come. The veteran of four spaceflights and the American record holder for consecutive days spent in space, Chris Hadfield's memoir is a sphere utterly hostile to human life. He describes navigating the extreme challenge of long-term spaceflight, both life-threatening and mundane: the devastating effects on the body; the isolation from everyone he loves and the comforts of Earth; the catastrophic risks of colliding with space junk; and the still-unfathomable tragedy strike at home—an agonizing situation Kelly faced when, on a previous mission, his twin brother's wife, American Congresswoman Gabrielle Giffords, was shot while he still had two months in space. Kelly's humanity, compassion, humor, and determination resonate throughout, as he recalls his rough-and-tumble New Jersey childhood, his astounding career, and as he makes clear his belief that Mars will be the next, ultimately challenging, step in spaceflight. In Endurance, we see the triumph of the human imagination, the strength of the human will, and the infinite wonder of the galaxy.

Inspired by the childhood of real-life astronaut Chris Hadfield and brought to life by Terry and Eric Fan's lush, evocative illustrations, The Darkest Dark will encourage readers to dream the impossible. Chris loves rockets and planets and pretending he's a brave astronaut, exploring the universe. Only one problem—at night, Chris doesn't feel so brave. He's afraid of the dark. But when he watches the groundbreaking moon landing on TV, he realizes that space is the darkest dark there is—and the dark is beautiful and exciting, especially when you have big dreams to keep you company.

Join Chris Hadfield living on the International Space Station! This book examines the extraordinary life of one of the most popular astronauts, from his early life to the six months he spent living in space. Discover what the International Space Centre is used for, and how astronautsÀ like Hadfield can live there. Find out about the rigorous training that astronauts undergo and how they prepare for a journey into the unknown.

NEW YORK TIMES BESTSELLER • NATIONAL BOOK AWARD WINNER • *From the infinitely inventive author of How to Live Safely in a Science Fictional Universe, a deeply personal novel about race, pop culture, immigration, assimilation, and escaping the roles we are forced to play. "One of the funniest books of the year.... A delicious, ambitious Hollywood satire."* —*The Washington Post* Willis Wu doesn't perceive himself as the protagonist in his own life: he's merely Generic Asian Man. Sometimes he gets to be Background Oriental Making a Weird Face or even Disgraced Son, but always he is relegated to a prop. Yet every day, he leaves his tiny room in a Chinatown SRO and enters the Golden Palace restaurant, where Black and White, a procedural cop show, is in perpetual production. He's a bit player here, too, but he dreams of being Kung Fu Guy—the most respected role that anyone who looks like him can attain. Or is it? After stumbling into the spotlight, Willis finds himself launched into a wider world than he's ever known, discovering not only the secret history of Chinatown, but the buried legacy of his own family. Infinitely inventive and deeply personal, exploring the themes of pop culture, assimilation, and immigration—Interior Chinatown is Charles Yu's most moving, daring, and masterful novel yet.

What Going to Space Taught Me About Ingenuity, Determination, and Being Prepared For Anything. Becoming an astronaut is a childhood dream of people all over the world. Being able to leave Earth, experience zero-gravity, and float among the stars is something only a few people in life are lucky enough to experience. Chris Hadfield is one of the lucky few. After logging nearly 4,000 hours in space and spending decades training, Chris has plenty of stories to tell and lessons that he’s learned. The secret to his success and his survival can boil down to one unconventional philosophy he learned at NASA: prepare for the worst. You see, preparing for the worst sounds negative and pessimistic, but for an astronaut, preparing for the worst is a matter of life and death. Throughout An Astronaut’s Guide to Life on Earth, Chris Hadfield aims to teach his readers what he’s learned through his time in space. The lessons from space can be easily applied to life on Earth, no matter what you do for a living. As you read, you’ll learn how thinking like an astronaut can help you find peace of mind, how there is no such thing as over-preparation, and how landing a capsule from space is nothing like landing a plane.

Former NASA astronaut Terry Virts offers an insider's guide to astronauting—a behind-the-scenes look at the training, the basic rules, lessons, and procedures of space travel, including how to deal with a dead body in space, what it’s like to film an IMAX movie in orbit, what exactly to do when nature calls, and much more, in 51 brief chapters.

From New York Times bestselling author and astronaut Chris Hadfield comes this exceptional thriller and "exciting journey" into the dark heart of the Cold War and the space race (Andy Weir, author of The Martian and Project Hail Mary). 1973: a final, top-secret mission to the Moon. Three astronauts in a tiny spaceship, a quarter million miles from home. A quarter million miles from help. NASA is about to launch Apollo 18. While the mission has been billed as a scientific one, flight controller Kazimieras "Kaz" Zemeckis knows there is a darker objective. Intelligence has discovered a secret Soviet space station spying on America, and Apollo 18 may be the only chance to stop it. But even as Kaz races to keep the NASA crew one step ahead of their Russian rivals, a deadly accident reveals that not everyone involved is quite who they were thought to be. With political stakes stretched to the breaking point, the White House and the Kremlin can only watch as their astronauts collide on the lunar surface, far beyond the reach of law or rescue. Full of the fascinating technical detail that fans of The Martian loved, and reminiscent of the thrilling claustrophobia, twists, and tension of The Hunt for Red October, The Apollo Murders is a high-stakes thriller unlike any other. Chris Hadfield captures the fierce G-forces of launch, the frozen loneliness of space, and the fear of holding on to the outside of a spacecraft orbiting the Earth at 17,000 miles per hour as only someone who has experienced all of these things in real life can. Strap in and count down for the ride of a lifetime.

"Packed with cosmic action... The Astronaut Selection Test Book

Typography and Design in Science Fiction Movies

Was it fun to do a space walk? How squashed were you in the capsule on the way back? What were your feelings as you looked down on Earth for the first time? Were you ever scared? Where to next -- the Moon, Mars, or beyond? Based on his historic mission to the International Space Station, Ask an Astronaut is Tim Peake's guide to life in space, and his answers to the thousands of questions he has been asked since his return to Earth. With explanations ranging from the mundane -- how do you wash your clothes or go to the bathroom while in orbit? -- to the profound -- what's the point? -- all written in Tim's characteristically warm style, Tim shares his thoughts on every aspect of space exploration. From training for the mission to launch, to his historic spacewalk, to re-entry, he reveals for readers of all ages the cutting-edge science behind his groundbreaking experiments, and the wonders of daily life on board the International Space Station. The public was invited to submit questions using the hashtag #askanastronaut, and a selection are answered by Tim in the book, accompanied with illustrations, diagrams, and never-before-seen photos.

An Astronaut's Guide to Life on Earth: What Going to Space Taught Me About Ingenuity, Determination, and Being Prepared for Anything (2013) by Chris Hadfield tells the Canadian astronaut's life story and offers practical life advice based on this professional experience. Focusing on his training and his third and final mission to space, Hadfield demonstrates how the unusual way in which astronauts work is surprisingly applicable to everyday life.. Today's astronauts require many different abilities. They must not only be expert in performing flight simulations but must also be proficient in such dissimilar subjects as photography, thermodynamics, electrical repairs, flight procedures, oceanography, public affairs, and geology. In Prepare for Launch, the author introduces the technologies and myriad activities that constitute or affect astronaut training, such as the part-task trainers, emergency procedures, the fixed-based and motion-based simulators, virtual environment training, and the demands of training in the Weightless Environment Training Facility. With plans to return to the Moon and future missions to Mars, the current selection criteria and training are very different from those used for short duration mission Space Shuttle crews. Dr. Erik Seedhouse in this book focuses on how astronaut candidates are taught to cope with different needs and environments (for example, hibernation, artificial gravity, and bioethics issues) and also includes brief discussions of the astronaut application and selection process.

From "America's nerviest journalist" (Newsweek)--a breath-taking epic, a magnificent adventure story, and an investigation into the true heroism and courage of the first Americans to conquer space. "Tom Wolfe at his very best" (The New York Times Book Review) Millions of words have poured forth about man's trip to the moon, but until now few people have had a sense of the most engrossing side of the adventure; namely, what went on in the minds of the astronauts themselves - in space, on the moon, and even during certain odysseys on earth.

It is this, the inner life of the astronauts, that Tom Wolfe describes with his almost uncanny empathetic powers, that made The Right Stuff a classic.

THE PERFECT SUMMER READ - From the #1 bestselling author of Hello, is this Planet Earth? and Ask an Astronaut As heard on BBC Radio 4 Desert Island Discs _____ 'What surprised me was how entirely serene I felt. I was weightless, no forces exerting themselves on my body. To my left was the Space Station. Below me, gradually going into shadow, was the Earth. And over my right shoulder was the universe.' In fascinating and personal detail, and drawing on exclusive diaries and audio recordings from his mission, astronaut Tim Peake takes readers closer than ever before to experience what life in space is really like: the sights, the smells, the fear, the sacrifice, the exhilaration and the deep and abiding wonder of the view. Warm, inspiring and often funny, Tim also charts his surprising road to becoming an astronaut, from a shy and unassuming boy from Chichester who had a passion for flight, to a young British Army officer, Apache helicopter pilot, flight instructor and test pilot who served around the world. Tim's extensive eighteen-year career in the Army included the command of a platoon of soldiers in Northern Ireland during the Troubles, deployment in Bosnia, and operations in Afghanistan. Full of life lessons for readers of all ages, Limitless is the story of how ordinary can become extraordinary. _____ 'For someone who has literally been out of this world Tim's an incredibly down to earth guy and I think you'll be amazed at some of the things he has done ... it's so inspiring to know that even going into space didn't change him as much as being a parent did.' JOE WICKS 'Tim is one of our nation's good guys - and his story is a testament to his courage, kindness and a never-give-up spirit.' BEAR GRYLLS 'Full of courage, camaraderie and daring escapades, this reads like a Boys' Own adventure' MIRROR 'A fantastic book' PIERS MORGAN 'Fasten your seatbelt for an exhilarating read ... His accounts of blasting into orbit at 25 times the speed of sound and floating, weightless, around the space station are enthralling.' EXPRESS Bestseller in the UK, Sunday Times, October 2020 A designer's deep dive into seven science fiction films, filled with "gloriously esoteric nerdery [and] observations as witty as they are keen" (Wired). In Typeset in the Future, blogger and designer Dave Addey invites sci-fi movie fans on a journey through seven genre-defining classics, discovering how they create compelling visions of the future through typography and design. The book delves deep into 2001: A Space Odyssey, Star Trek: The Motion Picture, Alien, Blade Runner, Total Recall, WALL · E, and Moon, studying the design tricks and inspirations that make each film transcend mere celluloid and become a believable reality. These studies are illustrated by film stills, concept art, type specimens, and ephemera, plus original interviews with Mike Okuda (Star Trek), Paul Verhoeven (Total Recall), and Ralph Eggleston and Craig Foster (Pixar). Typeset in the Future is an obsessively geeky study of how classic sci-fi movies draw us in to their imagined worlds.

The day of the accident, Jess is in the backyard with a chainsaw, clearing space to build the greenhouse she's always wanted. And, as always, she is thinking of Arthur. Arthur, her colleague in the botany department, who never believed she'd actually start the project. Arthur, who, after getting too close, has cut off contact, escaping to study the subarctic pines. But now there has been a disaster, connected to her husband's space

tourism company: the explosion of a space shuttle filled with commercial passengers, igniting a media frenzy on her family's doorstep. Jess's engineer husband is implicated, and she knows there is information he's withholding, even as she becomes an unwitting player in the efforts to salvage the company's reputation. Struggling, Jess writes to the only person she can be candid with. She writes to Arthur. And in her e-mails -- warm, frank, yet freighted with regret and the old habits of seduction -- Jess tries to untangle how her life has changed, in one instant but also slowly, and how it might change still. With sure pacing and intimate wisdom, God is an Astronaut unfurls a story of secrets and of wonderment, the unforgettable and the vast unknowable.

NEW YORK TIMES BESTSELLER • Have you ever wondered what it would be like to find yourself strapped to a giant rocket that’s about to go from zero to 17,500 miles per hour? Or to look back on Earth from outer space and see the surprisingly precise line between day and night? Or to stand in front of the Hubble Space Telescope, wondering if the emergency repair you’re about to make will inadvertently ruin humankind’s chance to unlock the universe’s secrets? Mike Massimino has been there, and in Spaceman he puts you inside the suit, with all the zip and buoyancy of life in microgravity. Massimino’s childhood space dreams were born the day Neil Armstrong set foot on the moon. Growing up in a working-class Long Island family, he catapulted himself to Columbia and then MIT, only to flunk his first doctoral exam and be rejected three times by NASA before making it through the final round of astronaut selection. Taking us through the surreal wonder and beauty of his first spacewalk, the tragedy of losing friends in the Columbia shuttle accident, and the development of his enduring love for the Hubble Telescope—which he and his fellow astronauts were tasked with saving on his final mission—Massimino has written an ode to never giving up and the power of teamwork to make anything possible. Spaceman invites us into a rare, wonderful world where science meets the most thrilling adventure, revealing just what having “the right stuff” really means.

This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. My Guide to Life in Space (Official Tim Peake Book)

In this revelatory and moving memoir, a former NASA astronaut and NFL wide receiver shares his personal journey from the gridiron to the stars, examining the intersecting roles of community, perseverance and grace that align to create the opportunities for success. Leland Melvin is the only person in human history to catch a pass in the National Football League and in space. Though his path to the heavens was riddled with setbacks and injury, Leland persevered to reach the stars. While training with NASA, Melvin suffered a severe injury that left him deaf. Leland was relegated to earthbound assignments, but chose to remain and support his astronaut family. His loyalty paid off. Recovering partial hearing, he earned his eligibility for space travel. He served as mission specialist for two flights aboard the shuttle Atlantis, working on the International Space Station. In this uplifting memoir, the former NASA astronaut and professional athlete offers an examination of the intersecting role of community, determination, and grace that align to shape our opportunities and outcomes. Chasing Space is not the story of one man, but the story of many men, women, scientists, and mentors who helped him defy the odds and live out an uncommon destiny. As a chemist, athlete, engineer and space traveler, Leland's life story is a study in the science of achievement. His personal insights illuminate how grit and grace, are the keys to overcoming adversity and rising to success.

Fourteen mountains on Earth tower over 8,000 metres above sea level, an altitude where the brain and body withers and dies. Until recently, the world record for climbing them all stood at nearly eight years. So I announced I was summiting them in under seven months. People laughed.They told me I was crazy, even though I'd sharpened my climbing skills on the brutal Himalayan peaks of Everest and Dhaulagiri. But I possessed more than enough belief, strength and resilience to nail the job, having taken down enemy gunmen and terrorist bomb makers while serving with the Gurkhas and the UK Special Forces.

We are in the early stages of the next big platform shift in healthcare computing. Fueled by Artificial Intelligence (AI) and the Cloud, this shift is already transforming the way health and medical services are provided. As the industry transitions from static digital repositories to intelligent systems, there will be winners and losers in the race to innovate and automate the provision of services. Critical to success will be the role leaders play in shaping the use of AI to be less "artificial" and more "intelligent" in support of improving processes to deliver care and keep people healthy and productive across all care settings. This book defines key technical, process, people, and ethical issues that need to be understood and addressed in successfully planning and executing an enterprise-wide AI plan. It provides clinical and business leaders with a framework for moving organizations from the aspiration to execution of intelligent systems to improve clinical, operational, and financial performance.

In You Are Here, celebrated astronaut Chris Hadfield gives us the really big picture: this is our home, as seen from space. The millions of us who followed Hadfield's news-making Twitter feed from the International Space Station thought we knew what we were looking at when we first saw his photos. But we may have caught the beauty and missed the full meaning. Now, through photographs - many of which have never been shared - Hadfield unveils a fresh and insightful look at our planet. He sees astonishing detail and importance in these images, not just because he's spent months in space but because his in-depth knowledge of geology, geography and meteorology allows him to reveal the photos' mysteries. Featuring Hadfield's favourite images, You Are Here is divided by continent and represents one (idealized) orbit of the ISS. Surprising, thought-provoking and visually delightful, it opens a singular window on our planet, using remarkable photographs to illuminate the history and consequences of human settlement, the magnificence of never-before-noticed landscapes, and the power of the natural forces shaping our world and the future of our species.

Ask an Astronaut

A visionary work that combines speculative fiction with deep philosophical inquiry, The Sparrow tells the story of a charismatic Jesuit priest and linguist, Emilio Sandoz, who leads a scientific mission entrusted with a profound task: to make first contact with intelligent extraterrestrial life. The mission begins in faith, hope, and beauty, but a series of small misunderstandings brings it to a catastrophic end. Praise for The Sparrow “A startling, engrossing, and moral work of fiction.”—The New York Times Book Review “Important novels leave deep cracks in our beliefs, our prejudices, and our blinders. The Sparrow is one of them.”—Entertainment Weekly “Powerful . . . The Sparrow tackles a difficult subject with grace and intelligence.”—San Francisco Chronicle “Provocative, challenging . . . recalls both Arthur C. Clarke and H. G. Wells, with a dash of Ray Bradbury for good measure.”—The Dallas Morning News “[Mary Doria] Russell shows herself to be a skillful storyteller who subtly and expertly builds suspense.”—USA Today

“Experience the wonders of life in orbit with a female astronaut's incredible memoir, revealing what it really takes to reach the stars”--

“This quietly profound book belongs on the shelf next to Jon Krakauer’s Into the Wild.” —The New York Times The riveting true story of Dick Conant, an American folk hero who, over the course of more than twenty years, canoed solo thousands of miles of American rivers—and then disappeared near the Outer Banks of North Carolina. This book “contains everything: adventure, mystery, travelogue, and unforgettable characters” (David Grann, best-selling author of Killers of the Flower Moon). For decades, Dick Conant paddled the rivers of America, covering the Mississippi, Yellowstone, Ohio, Hudson, as well as innumerable smaller tributaries. These solo excursions were epic feats of planning, perseverance, and physical courage. At the same time, Conant collected people wherever he went, creating a vast network of friends and acquaintances who would forever remember this brilliant and charming man even after a single meeting. Ben McGrath, a staff writer at The New Yorker, was one of those people. In 2014 he met Conant by chance just north of New York City as Conant paddled down the Hudson, headed for Florida. McGrath wrote a widely read article about their encounter, and when Conant’s canoe washed up a few months later, without any sign of his body, McGrath set out to find the people whose lives Conant had touched--to capture a remarkable life lived far outside the staid confines of modern existence. Riverman is a moving portrait of a complex and fascinating man who was as troubled as he was charismatic, who struggled with mental illness and self-doubt, and was ultimately unable to fashion a stable life for himself; who traveled alone and yet thrived on connection and brought countless people together in his wake. It is also a portrait of an America we rarely see: a nation of unconventional characters, small river towns, and long-forgotten waterways.

1 New York Times Bestseller • #1 Wall Street Journal Bestseller From Daniel Silva, the internationally acclaimed #1 New York Times bestselling author, comes a riveting new thriller featuring art restorer and legendary spy Gabriel Allon. It was nearly one a.m. by the time he crawled into bed. Chiara was reading a novel, oblivious to the television, which was muted. On the screen was a live shot of St. Peter ’ s Basilica. Gabriel raised the volume and learned that an old friend had died. . . Gabriel Allon has slipped quietly into Venice for a much-needed holiday with his wife and two young children. But when Pope Paul VII dies suddenly, Gabriel is summoned to Rome by the Holy Father ’ s loyal private secretary, Archbishop Luigi Donati. A billion Catholic faithful have been told that the pope died of a heart attack. Donati, however, has two good reasons to suspect his master was murdered. The Swiss Guard who was standing watch outside the papal apartments the night of the pope ’ s death is missing. So, too, is the letter the Holy Father was writing during the final hours of his life. A letter that was addressed to Gabriel. While researching in the Vatican Secret Archives, I came upon a most remarkable book ... The book is a long-suppressed gospel that calls into question the accuracy of the New Testament ’ s depiction of one of the most portentous events in human history. For that reason alone, the Order of St. Helena will stop at nothing to keep it out of Gabriel ’ s hands. A shadowy Catholic society with ties to the European far right, the Order is plotting to seize control of the papacy. And it is only the beginning. As the cardinals gather in Rome for the start of the conclave, Gabriel sets out on a desperate search for proof of the Order ’ s conspiracy, and for a long-lost gospel with the power to put an end to two thousand years of murderous hatred. His quest will take him from the Ponte Vecchio in Florence, to a monastery in Assisi, to the hidden depths of the Secret Archives, and finally to the Sistine Chapel, where he will witness an event no outsider has ever before seen—the sacred passing of the Keys of St. Peter to a newly elected pope. Swiftly paced and elegantly rendered, The Order will hold readers spellbound, from its opening passages to its breathtaking final twist of plot. It is a novel of friendship and faith in a perilous and uncertain world. And it is still more proof that Daniel Silva is his generation ’ s finest writer of suspense and international intrigue.

From the book it is just a life experience of a given person among the population of many. Am sure so many of us have buckets full of big dreams, bigger than the ones depicted in this article. What if we all, the billions of people, persevered in all the difficulties along the way? Would we still make our dreams true with the available resources? Note that, people are different but the kind of visions or virtual dream they have will never be negative nor small. You will never come across a person who wishes to be a thief but you can find one who dreams of getting a green source of energy from the sun. If these dreams could be true how could the world be?

One of the most successful Black businessmen in the country, who has led Nike’s Jordan Brand from a \$200M sneaker company to a \$4B global apparel juggernaut, tells the remarkable story of his rise from gangland violence to the pinnacles of international business. Jump tells Larry Miller’s journey from the violent streets of West Philly in the 1960s to the highest echelons of American sports and industry. Miller wound up in jail more than once, especially as a teenager. But he immersed himself in the educational opportunities, eventually took advantage of a Pennsylvania state education-release program offered to incarcerated people, and was able to graduate with honors from Temple University. When revealing his gangland past caused him to lose his first major job opportunity, Miller vowed to keep it a secret. He climbed the corporate ladder with a number of companies such as Kraft Foods, Campbell’s Soup, and Jantzen, until Nike hired him to run its domestic apparel operations. Around the time of Michael Jordan’s basketball retirement, Nike Chairman Phil Knight made Larry Miller president of the newly formed Jordan Brand. In 2007 Paul Allen convinced Miller to jump to the NBA to become president of the Portland Trailblazers, one of the first African-Americans to lead a professional sports team, before returning to Jordan Brand in 2012. All along, Miller lived two lives: the secret of his violent past haunted him, invading his days with migraines and his sleep with nightmares of getting hauled back to jail. More than a rags-to-riches story, Jump is also a passionate appeal for criminal justice reform and expanded educational opportunities for incarcerated and formerly incarcerated people across the United States. Drawing on his powerful personal story, as well as his vast and well-connected network, Miller plans to use Jump as a launching point to help expand such opportunities and to provide an aspirational journey for those who need hope.
