"Consider this another vaccine against disaster. Fortunately, this dose won't cause a temporary fever—and it happens to be a rippingly good read." —Wired "This crisply written and well-paced book reads like an all-caps warning for a world shackled to the machines we carry in our pockets and place on our laps . . ." —The Washington Post From two former military officers and award-winning authors, a chillingly authentic geopolitical thriller that imagines a naval clash between the US and China in the South China Sea in 2034—and the path from there to a nightmarish global conflagration. On March 12, 2034, US Navy Commodore Sarah Hunt is on the bridge of her flagship, the guided missile destroyer USS John Paul Jones, conducting a routine freedom of navigation patrol in the South China Sea when her ship detects an unflagged trawler in clear distress, smoke billowing from its bridge. On that same day, US Marine aviator Major Chris "Wedge" Mitchell is flying an F35E Lightning over the Strait of Hormuz, testing a new stealth technology as he flirts with Iranian airspace. By the end of that day, Wedge will be an Iranian prisoner, and Sarah Hunt's destroyer will lie at the bottom of the sea, sunk by the Chinese Navy. Iran and China have clearly coordinated their moves, which involve the use of powerful new forms of cyber weaponry that render US ships and planes defenseless. In a single day, America's faith in its military's strategic pre-eminence is in tatters. A new, terrifying era is at hand. So begins a disturbingly plausible work of speculative fiction, co-authored by an award-winning novelist and decorated Marine veteran and the former commander of NATO, a legendary admiral who has spent much of his career strategically outmaneuvering America's most tenacious adversaries. Written with a powerful blend of geopolitical sophistication and human empathy, 2034 takes us inside the minds of a global cast of characters--Americans, Chinese, Iranians, Russians, Indians--as a series of arrogant miscalculations on all sides leads the world into an intensifying international storm. In the end, China and the United States will have paid a staggering cost, one that forever alters the global balance of power. Everything in 2034 is an imaginative extrapolation from present-day facts on the ground combined with the authors' years working at the highest and most classified levels of national security. Sometimes it takes a brilliant work of fiction to illuminate the most dire of warnings: 2034 is all too close at hand, and this cautionary tale

Despite wars with Iraq and Afghanistan, as well as 9/11, the United States' dependence on foreign oil has kept the nation tied to the Middle East. A scientist has developed a cure for America's addiction—a slow-acting virus that feeds on petroleum, turning it solid. But he didn't consider that his contagion of an Iraqi oil field would spread to infect the fuel supply of the entire world... In Los Angeles, screenwriter Dave Marshall heard this scenario from a retired U.S. Marine and government insider who acted as a consultant on Dave's last film. It sounded as implausible as many of his scripts, but the reality is much more frightening than anything he can envision. An ordinary guy armed with extraordinary information, Dave hopes his survivor's instinct will kick in so he can protect his wife and daughter from the coming apocalypse that will alter the future of Earth—and humanity...

A finalist for the 2020 Thurber Prize for American Humor! "The Secret Life of Pets meets The Walking Dead" in this big-hearted, boundlessly beautiful romp through the Apocalypse, where a foul-mouthed crow is humanity's only chance to survive Seattle's zombie problem (Karen Joy Fowler, PEN/Faulkner Award-winning author). S.T., a domesticated crow, is a bird of simple pleasures: hanging out with his owner Big Jim, trading insults with Seattle's wild crows (i.e. "those idiots"), and enjoying the finest food humankind has to offer: Cheetos. But when Big Jim's eyeball falls out of his head, S.T. starts to think something's not quite right. His tried-and-true remedies—from beak-delivered beer to the slobbering affection of Big Jim's loyal but dim-witted dog, Dennis—fail to cure Big Jim's debilitating malady. S.T. is left with no choice but to abandon his old life and venture out into a wild and frightening new world with his trusty steed Dennis, where he suddenly discovers that the neighbors are devouring one another. Local wildlife is abuzz with rumors of Seattle's dangerous new predators. Humanity's extinction has seemingly arrived, and the only one determined to save it is a cowardly crow whose only knowledge of the world comes from TV. What could possibly go wrong? Includes a Reading Group Guide.

"Shawn Chesser is a master of the zombie genre." Mark Tufo - Best-selling author of the Zombie Fallout series "Through a combination of tight, well-structured plots and fully realized characters, Chesser has emerged as one of the top indie writers in the business." Joe McKinney - Two-time Bram Stoker Award winner and best-selling author of the Dead World series Riker's Apocalypse: The Promise Edited by Monique Happy Editorial Services 107,000 words Army veteran Lee Riker is staying in an Atlanta shelter and supporting himself

with the odd carpentry job when his sister, Tara, summons him home to Middletown, Indiana for the reading of their mother's will. Hopeful that the unknown sum of money included in his portion of the inheritance will be sufficient to bring an end to his latest run of bad luck and trouble, Riker boards a Greyhound bus in Atlanta with his duffel bag, less than two hundred dollars to his name, and a secret he must protect at all costs. Riker makes it to Middletown only to learn his sister has recently witnessed a gruesome death. Insisting she saw the victim rise from a pool of his own blood to attack the Samaritan rendering aid, Tara floats the idea that the man may have been a zombie. While the siblings are comparing what Tara thinks she saw to the conflicting stories about the event being reported on the news, the emergency broadcast system is activated and they find themselves under order to report to one of three newly established quarantine centers. With this unexpected turn of events looming over their heads, and as a result the reading of the will likely postponed indefinitely, Riker informs Tara of the promise he made to their mother on her deathbed months ago. A promise whose details leave Tara nearly as confused as those of the grisly attack haunting her every thought. A promise that Riker insists is worth ignoring the government edict in order to fulfill. A promise that requires the Rikers to leave town even as shadowy forces seek to seal it off from the rest of the country-a tall order they soon learn will be easier said than done.

BOOK TWO of the Plague Wars series. What trumps everything else, to turn a government against its people? Fear. So when American sniper Alan "Skull" Denham selects his own mission to fight against the ever-growing evil of the fascist Unionist movement, he sets himself against the entire Federal establishment, which wants to see him dead. Can Skull win through while keeping his soul, showing mercy only to children, dogs and the genuinely innocent? Skull's Shadows is sci-fi technothriller, which can be read alone or as an introduction to the Plague Wars series. All of the books in the Plague Wars Series are coming soon to Google Play over the next few weeks and months.
