The Big Book of the UK

Music is rooted in the heart of Western culture. The absence of music from the usual publications of medieval history and history of art of the Middle Ages is understandable, considering the rarity of sources. And yet, throughout the last decades, an intense activity of historico-musicological research has been carried out internationally by a select group of specialized scholars. The ambitious goal of this work is to set medieval music within its historical and cultural context and to provide readers interested in different disciplines with an overall picture of music in the Middle Ages; multi-faceted, enjoyable, yet scientifically rigorous. To achieve this goal, the most prominent scholars of medieval musicology were invited to participate, along with archaeologists, experts of acoustics and architecture, historians and philosophers of medieval thought. The volume offers exceptional iconography and several maps, to accompany the reader in a fascinating journey through a network of places, cultural influences, rituals and themes.

Corografia fisica, storica e statistica dell' Italia corredata di un Atlante

Examining the urban and architectural developments in Rome during the Pontificate of Julius II (1503–13) this book focuses on the political, religious and artistic motives behind the changes. Each chapter focuses on a particular project, from the Palazzo dei Tribunali to the Stanza della Segnatura, and examines their topographical and symbolic contexts in relationship to the broader vision of Julian Rome. This original work explores not just historical sources relating to buildings but also humanist/antiquarian texts, papal sermons/eulogies, inscriptions, frescoes and contemporary maps. An important contribution to current scholarship of early sixteenth century Rome, its urban design and architecture.
