**"Elegant prose at the hand of an experienced story-teller."  
-Rhys Bowen, New York Times best-selling author of the Royal Spyness and Molly Murphy Mysteries as well as the #1 Kindle bestsellers "In Farleigh Field" and "The Tuscan Child." THE RUSSIAN GIRL is based on the true story of a woman who escapes from a high security nursing home during the hottest day of the year. The thermometer reads 115 degrees and she is dehydrated, lost, slogging through the burning sands of a New Mexico desert, constantly craving an ice cold Coke. Her delirium reveals a harrowing story of a young immigrant Russian girl forced to come to America in the early 1900s. Her turbulent life is filled with upheaval, lost love, and activism in a crushing, brutal 20th century journey. Minna Goldmich's mind wanders, remembering her childhood as a peasant girl in Russia-the youngest in a line of Jewish healers. Her family only survived being butchered by marauding Cossacks because of her and her mother's unique ability to heal cows. The twelve-year-old Russian girl's life is forever changed when she is almost raped. While defending herself, she**

accidentally kills her Jew-hating attacker and is forced to flee from the only life she's ever known. Alone and traumatized, her mother sends her to America to live. There, she not only joins the great melting pot of people from all over the world, she meets the love of her life and becomes a visiting nurse on the streets of Harlem. But her chaotic life is always overtaken by violent historical events that continue to reshape not only her life, but the world around her. **REVIEWS** "Intense, harrowing and oh so real, Bette Lamb's family history is brought vividly to life in elegant prose at the hand of an experienced storyteller." -Rhys Bowen, New York Times best-selling author of the Royal Spyness and Molly Murphy Mysteries as well as the #1 Kindle bestsellers "In Farleigh Field" and "The Tuscan Child." "A sweeping, soaring saga of history, family, the magic of healing, and the mysteries of love, all wrapped up in a page-turning thriller ranging from the Russian Revolution to the 1980s. Fair warning: you won't be able to stop reading 'The Russian Girl' " -Kelli Stanley, author of "City Of Sharks" "The history of a turbulent century across two continents is set inside an exquisite depiction of the end of one small life. And the brutal, sometimes harrowing, realities of that life are touched by magic in a way that feels utterly believable and satisfying. The Russian Girl combines a sharp eye, a big heart, and an irresistible page-turner of a story. Thoroughly recommended." -Catriona McPherson, bestselling and multi-award-winning author of the Dandy Gilver series and "Go To My Grave" "A beautiful, very thoughtful piece of writing, from the heart." -Rita Lakin, author of "The Only Woman In The Room" **FROM THE AUTHOR:** I am an RN, and yes, an ex-Bronxite. So listening to me talk (hands flying) can be a funny experience. I love to write crime novels and multi-task because I'm also an artist that plays with clay in my studio in my little home in the West (Marin County, CA.). My sculptures and other artistic creations appear in many juried national and local exhibitions, and I sell my work through galleries, associations, and retail stores. Being an RN is a huge clue as to why I like to write gritty medical thrillers with my husband J. J. Lamb.

*wisdom in a most unlikely place In this beautifully written and frequently funny memoir, Catherine Goldhammer, newly separated, along with her twelve-year-old daughter, starts life anew in a cottage by the sea, in a rustic town where live bait is sold from vending machines. Partly to please her daughter and partly for reasons not clear to her at the time, she begins this year of transition by purchasing six baby chickens—whose job, she comes to suspect, is to pull her and her daughter forward out of one life and into another. An unforgettable story filled with hope and grace, Still Life with Chickens shows how transcendent wisdom can be found in the most unlikely of places.*

This is the first complete English translation of Geminus's Introduction to the Phenomena--one of the most important and interesting astronomical works of its type to have survived from Greek antiquity. Gracefully and charmingly written, Geminus's first-century BC textbook for beginning students of astronomy can

now be read straight through with understanding and enjoyment by a wider audience than ever before. James Evans and Lennart Berggren's accurate and readable translation is accompanied by a thorough introduction and commentary that set Geminus's work in its historical, scientific, and philosophical context. This book is generously illustrated with diagrams from medieval manuscripts of Geminus's text, as well as drawings and photographs of ancient astronomical instruments. It will be of great interest to students of the history of science, to classicists, and to professional and amateur astronomers who seek to learn more about the origins of their science. Geminus provides a clear view of Greek astronomy in the period between Hipparchos and Ptolemy, treating such subjects as the zodiac, the constellations, the theory of the celestial sphere, lunar cycles, and eclipses. Most significantly, Geminus gives us the earliest detailed discussion of Babylonian astronomy by a Greek writer, thus offering valuable insight into the cross-cultural transmission of astronomical knowledge in antiquity. Between 1860 and 1897 Charles Lutwidge Dodgson, known to the ages as Lewis Carroll, produced over 180 booklets, leaflets, pamphlets, and instruction manuals. Varying radically in length and subject matter, they testify to Dodgson's unparalleled creativity and eclecticism. This volume, second in a series, concentrates on Dodgson's career as mathematical lecturer of Christ Church, Oxford. Most of the material collected here has not appeared in print since the author's lifetime. Appearing in chronological order by mathematical subject, each section is preceded by an introductory essay providing background information to assist both the general reader and the specialist. Several aspects of Dodgson's personality as well as important events in the Victorian period that influenced his views and the mathematical topics he chose to write about are discussed in the general introduction.

In San Francisco, it's RN Gina Mazzio's wedding eve. But when she takes the week's final Ob/Gyn telephone advice call, a deadly serious male voice says, "She's all cut up." She gets a second call, at home, and starts to link the calls and caller to a series of nurse disappearances. Instead of marriage and a honeymoon, Gina is drawn into the dangerous, illicit trade in human body parts.

"The war of 2020 was quite bloodless, but its aftermath was plenty grisly. The victor? A monster corporation now wasting the planet's resources with abandon -- but controlling the people with precision. Using industrial-scale organ harvesting. Using wholesale euthanasia. Using squadrons of armed guards whose bulletproof visors hide any expression in their eyes ... And now a deadly virus is spreading fast. [Dr. Zoe Hidalgo's] beloved husband has already been carried off by it. At that, the corporation forced their young daughter Laya into an orphanage. The corporation is intent on eradicating the virus by liquidating everyone infected. Now Zoe herself has fallen ill. More than half of her dwindling energy is spent trying to hide that fact ... In this heartless technocratic dystopian

future, normal emotions constitute treason. Acting on them is a capital crime. Can a mother's passion defy this totalitarian system? Will a promised cure arrive in time to save Zoe -- and can she get her hands on it? And if she regains her health, is there a chance she can ever find freedom...and even new love? In the midst of deciding whether to elope with detective Ed Kiffin, she's forced to investigate suspected foul play from disgruntled home-owners, mortgage bankers, and family members spiraling downward into homicidal madness that puts other lives in danger, as well.

Gina Mazzio and Harry Lucke get more than they bargained for when they accept a traveling nurse assignment at a rehab facility for Alzheimer's patients in the desolate wilderness on the outskirts of Virginia City, NV. On their first day, driving down a long, creepy private road, ominous sentry-like boulders block the sun; when they arrive, steel bars on the second story windows give them second thoughts. What have they gotten themselves into?

The essays analyze the intersection of fairy tale, fantasy and reality in postmodern artistic texts using cutting-edge trends, showing fairy-tale and fantasy to be omnipresent. Also, the authors note the transformation of both the reader-writer relationship and epistemological and ontological considerations by new technologies and emerging subgenres.

In this visually thrilling installment of the inner-workings of Gabbie's mind, we're taken on a journey of self-loathing, self-reflection, and ultimately, self-acceptance through deeply metaphorical imagery, chilling twists on child-like rhymes, and popular turns of phrase turned on their heads. Through raw, provocative tidbits, *Dandelion* explores what it means to struggle with a declining mental health in a world where mental health is both stigmatized and trivialized. The poems range from topics of rage and despair to downright silliness, so if you don't know whether to laugh or cry, just laugh until you cry.**
