*An exciting sing-along board book features a fun-filled rhythmic text and charming full-color illustrations for toddlers. A young boy and his animal friends shake their sillies, clap their crazies, and yawn their sleepies out before settling down for the night. Includes unaccompanied melody.*

*There is a critical need to reform social media, especially for young users. Most people have little sense of InfoTech's dark side—they are at risk for privacy loss and tech addiction. Lightweb Darkweb argues that society can optimize the benefits of the Internet only by acting to reduce its shadow of social, ecological and health hazards. Raffi highlights children's developmental needs as a key consideration in the digital age. Book jacket.*

The philosophy of Child Honouring is captured in this anthology of essays by leading child advocacy proponents. The introduction by Raffi and foreword by the Dalai Lama focus on the importance of looking at the world and the future through the lens of "what's best for kids is what's best for us all." Contributors from across many disciplines include renowned child development author Penelope Leach, Nobel Prize nominee Lloyd Axworthy, celebrated cultural historian Riane Eisler, bestselling author Barbara Kingsolver, and ecological economist Ron Colman.

"Read and sing along with Raffi's most popular and beloved song, about the "little white whale on the go," in a sturdy board book edition—just the right size for the littlest whales. Singing supports even the youngest child's speech and listening skills. With its delightful illustrations, this is the ideal sing-aloud for a whole new generation." --Page 4 of cover.

Students respond, in rhyming text, to their teacher's question about what each calls his or her grandmother, offering examples of things they like to do together.

Presents the illustrated text to the song about the curious spider.

A simple housecat named Simon encounters some bigger cats: Lion, Puma, Panther, Tiger, and Cheetah. Each of the big cats has something to say about Simon not being "cat" enough. According to them, he just doesn't measure up. He doesn't have Lion's mane or Cheetah's spots. He doesn't sleep in trees like Panther or climb mountains like Puma. He's small and fuzzy, not big and strong.

But ultimately, Simon shows the big cats that he's just like them . . . only smaller. A celebration of both individuality and community, I Am a Cat is a strong debut that shows we're all more alike than we think . . . if we look closely enough.

An exuberant infant is lifted high in the air by Mommy, kissed on the tummy by Daddy, and snuggled by a puppy.

*Sonichu #0 is the first issue of Christian Weston Chandler's magnum opus. At this initial stage, the comic was almost entirely about Sonichu and Rosechu, although bits of Chris's life still managed to find their way in. The "hand-drawn premiere issue" is a special zero issue. In the comics industry, zero issues are used as either a sales-enhancing gimmick (Image Comics is a notable user of this) or a special preview of work that will not truly begin until issue #1. Given that it previews nothing, which one Chris was going for is probably the former, though given that it's not legally able to be sold, it fails even that. The comic consists of Sonichu's first three adventures. In "Sonichu's Origin", the core cast of the series is introduced as Sonichu and Rosechu are created. Then, in "Genesis of the Lovehogs", the two protagonists meet and immediately fall in love. Finally, in "Sonichu vs. Naitshhc", our yellow hero does battle with his first real villain, who but foreshadows the challenges awaiting the hedgehogs in the following issue. Bonus material in Sonichu #0 includes various advertisements for imaginary Sonichu products, "classic" Sonichu comic strips drawn outside of the narrative of the main comic book, and the first "Sub-Episode".*

*52% of parents admit they never read to their child. Toddlers watch 4.5 hrs of TV daily. More children are obese, enter school developmentally delayed and need special education. So Sally Goddard Blythe draws on neuroscience to unpack the wisdom of nursery rhymes, playing traditional games and fairy stories for healthy child development. She explains why movement matters and how games develop children's skills at different stages of development. She offers a starter kit of stories, action games, songs and rhymes.*
