*This Baby Log Book was created because I needed one. As a mother I can tell you that the first weeks with a newborn are crazy. I surely was lost. I was not sure when was the last time my daughter ate, how much she ate, etc.... The problem was she didn't want to drink breast milk. We had huge difficulties, so I needed to give her formula as well. This is why I started to take notes - just to make sure she's got everything she needs. My notebook is simple because, as a mother, time is definitely not on your side. I am convinced that writing down meal breaks, the amount of milk your baby had and the number of dirty diapers you changed is enough. This is the most important data at the very beginning - if the baby eats and digests, you can be sure they are fine. Each page provides you the ability to record: date and indication of which day of the week for each page time of feeding with space to indicate breast feeding time/amount (if you're using breast pump) and amount of formula diaper change with space to indicate whether it was a wet or dirty diaper I would share this log book with every couple expecting a baby. It will be a good gift - reasonable, useful and helpful. As a mother I wish you all the best on your difficult but even more beautiful journey with your baby. Specifications: Interior & paper type: Black & white interior Paperback cover finish: Matte White paper Trim Size: 6 x 9 in Page Count: 100*

Baby log book tracker for Newborns Raising a baby is one of the most unpredictable things a person will go through in their lives. For that reason, many doctors suggest keeping a logbook of your child, to learn about the best care schedule for them. Each child will require different care methods, and different scheduling. This logbook has been designed for parents with newborn children, all the way up until they are toddlers, who are looking to discover patterns in their child's day to day routine, and to adapt their parental care towards them. It will also be vital in understanding causes of ill health, tiredness, mood swings and any other positive or negative reactions from your child. This book is also extremely useful for babysitters or childminders, or children who are in dual care. By handing over this book with your child, those taking over care will know exactly what your child has done for the day, and will be able to provide this information back to you when you take back your child. This book makes a great baby shower gift for expecting mothers, and will become an important part of their lives. It will come in even more handy if the mother is expecting twins, which makes the process twice as confusing.
