Create beautiful macramé projects that invoke the sacred elements of Earth, Air, Water, Fire and Spirit. The idea of classical 'elements' is common to many belief systems including Ancient Greek, Egyptian, Babylonian, Hinduism and Buddhism, as well as Chinese and Japanese philosophies. The five elements of the Pagan religion Wicca represent the five points of the pentagram, a powerful sacred symbol. No matter what your beliefs, paying attention to the forces of nature can bring a greater sense of spirituality and calm to your life, which is equally true of the craft of macramé, which like all handicrafts has proven benefits for wellbeing. This unique and beautiful book celebrates each of the Earth's sacred elements with projects that even beginners to macramé can tackle with ease. In nature, each element has its own specific properties, colours and stones associated with it, which these projects incorporate to dramatic effect. The 20 projects include dreamcatchers, wall hangings, home accessories and jewellery, which all draw their inspiration from nature and the elements. Many of the projects have crystals incorporated into them, for the good vibrations and healing energy they bring. You'll also learn how to dip-dye macrame for wonderful ombre effects and work with a variety of different coloured cords to bring beauty and interest to your pieces. Make a tree of life hoop to connect with the earth, a dreamcatcher to protect you during sleep, a hanging fruit bowl to feed and nourish you, and a plant hanger to purify your air. Make a necklace to bring out your inner goddess, a crystal suncatcher to capture your fire, or some coasters for your altar candles to sit on. With 20 projects to choose from you will find a whole host of ways to enjoy macramé in a new intentional, spiritual light. Author Rebecca Millar is best known as the creator of Vanir Creations, who has amassed a huge online following for her dreamy macramé hoops and moon catchers. Learn How To Make Micro-Macramé Jewelry! Volume 3 Intermediate / Advanced Designs Learn to create Micro-Macramé beaded jewelry with these 7 fun projects. My previous book, "Learn How To Make Micro-Macrame Jewelry! Volume 1," explained how to create the necessary padded work surface which will allowed you to embark on your micro-macramé journey. Then we continued with a straightforward bracelet, enabling you to familiarize yourself with the feel of the cord giving you time to practice tension as you tie the most commonly used knot in micro-macramé. Each successive pattern introduced you to a new knot or two, culminating in a final project using several knots. If you are new to Micro-Macrame, I would suggest starting with my first book before you move onto these patterns. In the second book, I wanted to move forward into some more advanced techniques and knots. I added some new knots and increased the complexity of the designs which really dug into what I enjoy the most about the craft. That being the intricate details and delicate beading which sets apart this style from other forms of jewelry making. My approach is even different from many other knotting trends as I lean towards the Margarete Lace (or Margareten spitze) technique. In this third book, I am excited to introduce to you a bracelet design made softer by adding ribbon to it. Pearls also help elevate the "Relevé" composition to a higher level. This romantic feel is carried on with a long necklace that is subtly steampunk, incorporating beads and key charms. "All Keyed Up" was created for my college age daughters, who are thoroughly enjoying wearing this style. Changing things up is the "MoonDance Pendant." It is a unique design inspired by wire wrapped jewelry. Now you can have that look without learning wire wrapping techniques. For a more casual offering, I have created a "Wrap Bracelet" pattern which looks like four bracelets but is really one. I love the versatility of this one and have made several to wear out and about. Another enchanting bracelet pattern and two dazzling new earring patterns round out this book. An abundance of pictures and clear instructions are given to speed you on your way to successful jewelry creation!
