Bravo Two Zero The True Story Of An SAS Patrol Behind Enemy Lines In Iraq

"If he hadn't needed the cash so badly, Nick Stone would never have messed with the Russian mafia. But the lucrative offer was one he couldn't refuse. The job seemed simple enough for a man of his particular talents: kidnap a ruthless, money-laundering mob boss from his fortified Helsinki hotel room and deliver him to St. Petersburg. But as the plan begins to unfold, Stone soon realizes that by no means has he been told the full story. Catapulted into the bleak underworld of the former Soviet republic of Estonia, where unknown aggressors stalk the arctic landscape, Stone finds that the mob may now turn out to be the least of his problems. Russia has embarked on a new Cold War offensive -- hacking into the West's computer systems and stealing their most coveted military secrets. As one bloody double cross leads to another, Stone finds himself caught between the suicidal schemes of the British and American intelligence agencies and the ruthless Russians who want to silence him. "

SOLDIER FIVE is an elite soldier's memoir of his time within the Special Air Service (SAS) and, in particular, his experiences during the Gulf War. As a member of the Special Forces patrol now famously known by its call sign Bravo Two Zero, he and seven others were inserted hundreds of kilometres behind enemy lines. Their mission was to reconnoitre targets, undertake surveillance of Scud missile sites and sabotage Iraqi communications links, but was to end in desperate failure. From the outset the patrol was dogged by problems that contributed both directly and indirectly to the demise of the mission. The patrol's compromise, and

subsequent attempts to evade Iraqi troops, resulted in four members of Bravo Two Zero being captured and a further three killed. One escaped. But the story goes further than the Gulf War itself. Despite numerous books, films and articles on the same subject, the British Government has done its utmost to thwart the release of Soldier Five, at one stage claiming the book in its entirety was confidential. A campaign of harassment that took some four-and-a-half years of litigation to resolve has now resulted in this explosive publication. SOLDIER FIVE is a gripping and suspenseful account of one man's experiences as a Special Forces soldier. Revealing his conflicts, loyalties and relationships forged, it is the resolution of a soldier's determined fight to see his story told.

Based on Evan Wright's National Magazine Award-winning story in Rolling Stone, this is the raw, firsthand account of the 2003 Iraq invasion that inspired the HBO® original mini-series. Within hours of 9/11, America's war on terrorism fell to those like the twenty-three Marines of the First Recon Battalion, the first generation dispatched into open-ended combat since Vietnam. They were a new pop-culture breed of American warrior unrecognizable to their forebears—soldiers raised on hip hop, video games and The Real World. Cocky, brave, headstrong, wary and mostly unprepared for the physical, emotional and moral horrors ahead, the “First Suicide Battalion” would spearhead the blitzkrieg on Iraq, and fight against the hardest resistance Saddam had to offer. Hailed as “one of the best books to come out of the Iraq war”(Financial Times), Generation Kill is the funny, frightening, and profane firsthand account of these remarkable men, of the personal toll of victory, and of the randomness, brutality and camaraderie of a new American War.

"A fascinating account of the enthusiastic effort to establish a home for the fledgling United Nations at the end of World War II. Mires creates a powerful sense of suspense as she describes the intense competition among boosters from New York, Boston, Philadelphia, and even the Black Hills of South Dakota. In lively and elegant prose, from the first sentence to the last, she captures the contradictory visions of the 'Capital of the World' that persisted from beginning to end." —Allan M. Winkler, Distinguished Professor of History, Miami University From 1944 to 1946, as the world pivoted from the Second World War to an unsteady peace, Americans in more than two hundred cities and towns mobilized to chase an implausible dream. The newly-created United Nations needed a meeting place, a central place for global diplomacy—a Capital of the World. But what would it look like, and where would it be? Without invitation, civic boosters in every region of the United States leapt at the

prospect of transforming their hometowns into the Capital of the World. The idea stirred in big cities—Chicago, San Francisco, St. Louis, New Orleans, Denver, and more. It fired imaginations in the Black Hills of South Dakota and in small towns from coast to coast. Meanwhile, within the United Nations the search for a headquarters site became a debacle that threatened to undermine the organization in its earliest days. At times it seemed the world's diplomats could agree on only one thing: under no circumstances did they want the United Nations to be based in New York. And for its part, New York worked mightily just to stay in the race it would eventually win. With a sweeping view of the United States' place in the world at the end of World War II, Capital of the World tells the dramatic, surprising, and at times comic story of hometown promoters in pursuit of an extraordinary prize and the diplomats who struggled with the balance of power at a pivotal moment in history. 1991 a squad of eight men went behind the Iraqi lines on a top secret mission. It was called Bravo Two Zero. On command was Sergeant Andy McNab. "They are the true unsung heroes of the war." -- Lt. Col. Steven Turner, American F-15E commander. Dropped into "scud alley" carrying 210-pound packs, McNab and his men found themselves surrounded by Saddam's army. Their radios didn't work. The weather turned cold enough to freeze diesel fuel. And they had been spotted. Their only chance at survival was to fight their way to the Syrian border seventy-five miles to the northwest and swim the Euphrates river to freedom. Eight set out. Five came back. "I'll tell you who destroyed the scuds -- it was the British SAS. They were fabulous." -- John Major, British Prime Minister. This is their story. Filled with no-holds-barred detail about McNab's capture and excruciating torture, it tells of men tested beyond the limits of human endurance... and of the war you didn't see on CNN. were hunting for Scud missiles and disrupting Iraqi communications. The SAS forces inside Iraq comprised two half-squadrons (30 men each with vehicles) and three much smaller foot patrols, one of which had the call sign, "Bravo Two Zero".; Corporal Terence Clayton, known as "Yorky", was a member of one of the half-squadrons. His group played a crucial role by destroying microwave communications lines, Scud missiles, weapons dumps and Iraqi soldiers. His 42-day story ricochets between stunning successes and extraordinary cock-ups, moving from corpse-strewn battlefields to stealthy operations at the dead of night.

months after the dropping of the atomic bombs on Hiroshima and Nagasaki, the American scientific establishment, the American government, and the American public all wrestled with what was called the "problem of secrecy," wondering not only whether secrecy was appropriate and effective as a means of controlling this new technology but also whether it was compatible with the country's core values. Out of a messy context of propaganda, confusion, spy scares, and the grave counsel of competing groups of scientists, what historian Alex Wellerstein calls a "new regime of secrecy" was put into place. It was unlike any other previous or since. Nuclear secrets were given their own unique legal designation in American law ("restricted data"), one that operates differently than all other forms of national security classification and exists to this day. Drawing on massive amounts of declassified files, including records released by the government for the first time at the author's request, *Restricted Data* is a narrative account of nuclear secrecy and the tensions and uncertainty that built as the Cold War continued. In the US, both science and democracy are pitted against nuclear secrecy, and this makes its history uniquely compelling and timely"--

As Michael Asher reveals, the stories in BRAVO TWO ZERO and THE ONE THAT GOT AWAY grew considerably in the telling. Their heroic

The fourth in a series of Nick Stone thrillers, Last Light gets off to an exciting start as the ex-special agent has been assigned to carry out an officially-sanctioned assassination. His life is in pieces, but things only get worse when he finds himself caught at the centre of a lethal conspiracy involving Columbian guerrillas. Hundreds of innocent lives are at stake, and their only chance of rescue is Stone.
