service? The answer is that, with your own privately registered domain and hosting account, YOU own and control the website, not anybody else. You can put whatever you like on your site and no one can tell you otherwise. You can make your site look and behave how you like. You're the boss. And, with your own website, you can build your own distinctive 'brand', whether you are a business or a community group, an individual, or whatever... Your domain becomes your own exclusive web address, your own piece of online virtual 'real estate' that plays its part in publicizing your mission or message. Creating a website on your own domain gives you identity, visibility and, indeed, status. But don't you need a professional web designer to make a good job building a website? No, definitely not! WordPress was originally designed as a blogging platform and this ebook shows you just how to build a blog using the same techniques as designing a website.
