Tilt and shift lenses offer tremendous creative possibilities for users of digital SLR and mirrorless cameras. This practical book explains the techniques that will help you take better photos - photos that don't distort or lose focus. Assessing the benefits and pitfalls of a range of lenses, adapters, software and editing techniques, it guides you through the practicalities of working with these lenses and gives you the skills to use them to best effect. With stunning examples throughout, this book gives an overview of the different lenses available, and tips on how adapters can give tilt/shift options when using old medium-format lenses. It gives advice on how simple lens shift can change the entire look of your photos, and techniques for using lens tilt for focus control and close-up working. Stunning examples show the use of tilt and shift lenses across a range of available focal lengths, both tripod-mounted and handheld.

The Ninth Edition of PERSONALITY THEORIES continues to provide thorough coverage enhanced with helpful learning aids, opportunities for honing critical thinking skills, and integration of multicultural and gender-related issues. Each chapter focuses on one theory or group of theories and includes brief biographies that shed light on how the theories were formed. The author also provides criteria for evaluating each theory and cites current relevant research. A final chapter on Zen Buddhism covers a major non-Western theory of personality and serves to distinguish this program in the field.

In the last few years, digital SLR cameras have taken the astrophotography world by storm. It is now easier to photograph the stars than ever before! They are compact and portable, flexible to adapt with different lenses and for telescope use, and above all DSLR cameras are easy and enjoyable to use. In this concise guide, experienced astrophotography expert Michael Covington outlines the simple, enduring basics that will enable you to get started, and help you get the most from your equipment. He covers a wide selection of equipment, simple and advanced projects, technical considerations and image processing techniques. Unlike other astrophotography books, this one focuses specifically on DSLR cameras, not astronomical CCDs, non-DSLR digital cameras, or film. This guide is ideal for astrophotographers who wish to develop their skills using DSLR cameras and as a friendly introduction to amateur astronomers or photographers curious about photographing the night sky.

And now, they're totally redesigned, in full colour and looking better than ever!

The Canon EOS Rebel X line of consumer-oriented D-SLR cameras has made its indelible mark on the market. Canon sells tons of these models--and that's why the Magic Lantern Guides and DVDs that explain how to use them are bestsellers too. The Rebel XSi (the EOS 450D outside of North America) is the most recent update, and it's bound to be a hit with its 12.2 MP sensor, fast-focusing 9-point AF system, and large 3.0-inch LCD monitor with Live View function. Released right alongside this fabulous camera, Magic Lantern's book and DVD will be a must for every XSi owner.

In this more than 1-hour long DVD featuring the Digital Rebel XS/1000, Rick Sammon will show viewers all of the basic steps to taking great images. From camera basics such as exposure and lenses to sport shooting, photographing in low light, close-up photography, people and portraits, animals and pets, Rick breaks down complex topics into fun and interesting lessons. While other videos in this market feature an actor standing next to a camera on a tripod, Rick is on location at exciting sites throughout New York that offer numerous subjects to shoot. He will entertain, educate, and inspire viewers to become better photographers. Go to any Rick Sammon workshop or seminar and it will be standing-room only. The popular speaker and Canon Explorer of Light travels the teaching amateur photographers how to shoot better pictures. He has hosted shows on the DIY network as well as on ESPN and the Outdoor Life Network.

Canon's newest digital camera is going to be hot, hot, hot! It's high quality, reasonably priced, lightweight, and constructed to feel comfortable in the hand. And the many avid amateurs snatching up this great equipment will want to understand how to get the most of every one of its state-of-the-art features, from its superb resolution to its super-fast speed. This Magic Lantern Guide has the answer to all their questions, because it explains in detail how to use all the wonderful enhancements: its ability to save large and fine resolution images direct to the CompactFlash Card, its user-selectable metering; and its single plate, high sensitivity, high resolution color CMOS imaging sensor technology.

In this landmark volume, Rosenblum (A World History of Photography) examines sympathetically the achievements of women in photography since its invention in 1839, and highlights society's failure to give them appropriate recognition. One research obstacle the author encountered was the 19th-century practice of men taking credit for work done by women. Here is work from 250 female camera artists, from Julia Margaret Cameron (b. 1815) to Annie Leibovitz (b. 1949), who, despite strong cultural resistance, mastered everything from early wet-plate views and portraits to 35 millimeter photojournalism, often initiating aesthetic and commercial improvements. Her chronicle of women's part in each era's artistic movements and media transitions, plus capsule biographies with an in-depth bibliography and index, make this a seminal reference work. The author's choice of 263 photographs seems to favor the esoteric, bringing to light a largely unknown world in vivid originality and broad archival conception.
