Crafty Cat and the Great Butterfly Battle

Many people believe that they have a special pet - one that is clever, caring, and... very "human". From a young age, Jenny Smedley had the ability to empathise and communicate with animals. She became aware that every life on the planet is connected and that animals have a vital purpose on the earth. In this book, Jenny shows how dogs and cats are more than just pets - they have a special reason for being in our lives, one that is more important to us than we could imagine. Through hundreds of stories, Jenny shows the powerful bonds humans have with their pets, and reveals the unexpected, surprising, and sometimes unbelievable role they play in our lives. Discover stories of:

- pets who have appeared in time to warn of danger or protect their owners
- dogs and cats who revisit their

owners after death to bring comfort •pets who have brought healing to their owners •telepathic and psychic pets If you love animals or have a special connection with your cat or dog, this book will show you that your intuitions are correct - your beloved pet does communicate with you, understand you, and care for you. Your pet does have a soul! Cartoonist B. Kliban (1935-1990) loved cats (no surprise there) and usually had several living with him. One day in the early 1970s, Kliban was hard at work doodling and thinking up ideas for cartoons when four striped kitties began demanding his attention. It could have been a catastrophe, but instead of getting angry with his furry friends, Kliban started drawing doodles of them. That moment turned out to be a catalyst for success. Kliban's editor saw these cat cartoons, loved them, and convinced Kliban to show them to a book publisher. The frisky felines captured the publisher's heart (and funny bone), and Cat was born to the world. The first book (simply called Cat) was published in 1975 and catapulted Kliban to fame. Lots of colorful Cats followed, until Cat became the ultimate cat to collect a trusted friend, and a guaranteed source of smiles. Cats reign of

zany fun continues to this day, as you can see in the 150 stickers in this Sticker Book.

Whether theyre skating, surfing, or just being silly, these are the coolest cats youve ever seen! 8 page softcover book with 150 reusable paper stickers (50 different designs) featuring artwork by B. Kliban.

Amino acids (AAs) are not only building blocks of protein, but are also signalling molecules as well as regulators of gene expression and the protein phosphorylation

cascade. Additionally, AAs are key precursors for syntheses of hormones and low-molecular weight nitrogenous substances with each having enormous biological importance. For example, physiological concentrations of AA metabolites (e.g., nitric oxide, polyamines, glutathione, taurine, thyroid hormones, and serotonin) are required for cell functions. Growing evidence shows that humans and animals have dietary requirements for all proteinogenic AAs. Mammals, birds and fish also have species- and age-dependent needs for some AA-related substances. However, elevated levels of other products (e.g., ammonia, homocysteine, H₂S, and asymmetric dimethylarginine) are pathogenic factors for neurological disorders, oxidative stress, and cardiovascular disease. Thus, optimal amounts of AAs and their ratios in diets and circulation are crucial for whole body homeostasis and health. Adequate provision of one or a mixture of functional AAs or metabolites may be beneficial for ameliorating health problems at various stages of the life cycle (e.g., fetal growth restriction, neonatal morbidity and mortality, weaning-associated intestinal dysfunction and wasting syndrome, obesity, diabetes, cardiovascular disease, the metabolic

syndrome, and infertility). Dietary supplementation of these nutrients can also optimize the efficiency of metabolic transformations to enhance muscle growth, milk production, and athletic performance, while preventing excess fat deposition and reducing adiposity. Therefore, functional AAs hold great promise in improving the growth, health and well-being of individuals. Do cats worry about retirement? Nope. Do cats do things they don't want to do? Definitely not. Do cats rush around at all hours of the day when they'd rather be licking their paws and looking out a window? Please. Calm, free, charismatic, wise, elegant, self-assured—our beloved feline pets strut those traits that we humans spend a lifetime aspiring to. No wonder everybody wants to be more like a cat. After observing his own cat, Ziggy, for years, bestselling French author Stéphane Garnier decided that he would be much happier if he could just live more like Ziggy. Closer study only confirmed his suspicion that cats have that je ne sais quoi, and he set out to share Ziggy's innate wisdom with the world. Whether at work, at home, or in your social life, your cat can teach you how to manage stress, cultivate independence, and live life on your terms. Peppered with humorous yet inspiring tips for living a day in the life of a cat, cat secrets from Ziggy, and a quiz to assess your "cat quotient," How to Think Like a Cat is an inspiring, humorous, and remarkably insightful guide to the subtle art of living like a feline.
