Company Law (Butterworths Student Statutes)

This manual has been specifically designed and written for use on a company law elective on the Bar Vocational Course. The pragmatic approach adopted by the manual through the use of a worked example containing examples of typical letters, statements, opinions and a statement of case, ensures that the junior practitioner has an opportunity to practice and refine all of the necessary professional legal skills they will require to be successful in practice. Company Law in Practice provides a detailed

Read Book Company Law (Butterworths Student Statutes)

overview of the salient topics in company law which the junior practitioner is most likely to encounter in the first years of practice. Such key topics covered include the constitution of companies, share and loan capital, directors' and shareholder meetings, the role and duties of directors, shareholder protection, insolvency and compulsory winding up. All topics contained in the manual have been fully revised in light of the Companies Act 2006. Many students and first-time practitioners may know of certain legal textbooks which cover a certain area, but do not know where to look to update the knowledge these books provide. Similarly, a

Read Book Company Law (Butterworths Student Statutes)

legal problem may arise which is not generally covered by such books. This work deals with how to find the answers, how to update an answer, how to discover if those cases have been applied since judgement was given, how to find statutes and regulators, and how to research and understand the law. The IBSS is the essential tool for librarians, university departments, research institutions and any public or private institution whose work requires access to up-to-date and comprehensive knowledge of the social sciences.

experience myself, I thought a book like this would be helpful to students around the world. I have tried to keep it concise, succinct, and as brief as much as possible; the last thing a student need is reading a lengthy guide on how to write their onerous project. Most of the chapters cover topics every student will find useful regardless of their course of study. This book covers essential policies, guidelines and procedures set out in the

When comparing the laws of different jurisdictions, one often sees only the forest or the trees. This is particularly problematic in comparative company law, where students hope both to understand the overall framework of the law and grasp its practical application. This text's structure, now in its second edition, solves that dilemma. Chapters open with discursive analyses of the law in each of Germany, the UK and the US (Delaware, the ABA Model Business Corporation Act, and federal securities laws) and set out the high-level governing

Read Book Company Law (Butterworths Student Statutes)

framework, particularly for the EU and its member states. This analysis is succinct and pointed, with numerous references to both the law and leading scholarship. The whole text is arranged to highlight comparative aspects. Diagrams are used where helpful. Chapters close with edited judicial decisions from at least two of the jurisdictions discussed, which allows fresh exploration of comparison in more detail, and pointed questions to guide class discussion.

unauthorised registered office address and the removal of details of falsely appointed directors along with filing information and statutory fees submitted to the Registrar of Companies. In addition, changes have been made to implement EU audit legislation, in particular concerning the rotation and retendering for statutory auditors of public interest entities. The preparation of annual accounts of limited liability partnerships and related matters has also been changed. The edition further covers changes to the Financial Services and Markets Act 2000, including by the Bank of England and Financial Services Act 2016, along with new legislation

This book is designed especially for use in Hong Kong to teach the basic skills of finding legal materials, both printed and computer-based ones. Its objective is to help students explore the range of materials which they will use in the course
