

Criminal Law (Core Text) (Core Texts Series)

This volume is one of the few books to explain in-depth the international crimes behind the scenes of substantive or procedural law. The contributors place a particular focus on what motivates participation in international crime, how perpetrators, witnesses and victims see their predicament and how international crimes should be investigated at local and international level, with an emphasis on context. The book engages these questions with a broad interdisciplinary approach that is accessible to both lawyers and non-lawyers alike. It discusses international crime through the lens of anthropology, neuroscience, psychology, state crime theory and information systems theory and draws upon relevant investigative experience from experts in international and domestic law prosecutions.

Provides a key textbook on the nature of international and transnational crimes and the delivery of justice for crime control and prevention.

A comprehensive and invaluable reference work for practitioners, academics and students of international criminal law, this series critically examines a complex and important legal area. Volume I considers the criminal responsibility of individuals for the commission of war crimes, crimes against humanity, and genocide; Volume II focuses on these core international crimes and discusses their interaction with the forms of responsibility; and Volume III provides an evaluation of international criminal procedure and the rules and practices designed to ensure effective investigations and fair trials.

Presents theories, practices and critiques alongside each other to engage students, scholars and professionals from multiple fields. This title is also available as Open Access on Cambridge Core.

1.1 Opening Remarks and Objectives Crimes against international law are committed by men, not by abstract entities, and only by punishing individuals who commit such crimes can the provisions of international law be enforced. This is, perhaps, the most renowned citation from the judgment of the International Military Tribunal at Nuremberg (" IMT "). In the six decades which have passed since the IMT judgment was handed down, the recognition of the concept of individual criminal responsibility for core international crimes has been significantly reinforced and developed, particularly since the establishment of the International Criminal Tribunal for the Former Yugoslavia (" ICTY ") and the International Criminal Tribunal for Rwanda (" ICTR ") in the 1990 ' s and most recently the International Criminal Court (" ICC "). The media has, of course, played a crucial role in increasing awareness of this concept, especially amongst the general populace. Indeed, the concept has, arguably, a much higher profile today, than ever before in its history. However, the concept of individual criminal responsibility for core international crimes is neither as straightforward nor as single-faceted, as might appear on first glance. While the general principle behind the concept does not generate too many difficulties, it is in its practical application that the more challenging aspects of the concept are brought to the fore. Each of these ' challenging - pects ' can also be described as a ' pertinent issue ' of the concept of individual criminal responsibility for core international crimes.

This book deals with the prosecution of core crimes and constitutes the first comprehensive analysis of the horizontal and vertical systems of enforcement of international criminal law and of their inter-relationship. It provides a global jurisprudential exposition in assessing the grounds for refusal of surrender to the International Criminal Court and of extradition to another State. It also offers insights into legal perspectives which improve the prevailing enforcement regimes of various models of criminal justice, including hybrid criminal tribunals, special criminal courts, judicial panels and partnerships, and other budding sui generis judicial and/or prosecutorial institutions. The book espouses a human rights law-oriented critique to the enforcement of domestic, regional and international criminal justice and is aimed at legal practitioners (prosecutors, defence lawyers, magistrates and judges), jurists, criminal justice experts, penologists, legal researchers, human rights activists and law students. Christopher Soler lectures Maltese criminal law, international criminal law and public international law at the University of Malta. He obtained his Ph.D. from the University of Amsterdam in The Netherlands.

Drawing upon a wide range of sources of empirical evidence, historical analysis and theoretical argument, this book shows beyond any doubt that the private, profit-making, corporation is a habitual and routine offender. The book dissects the myth that the corporation can be a rational, responsible, 'citizen'. It shows how in its present form, the corporation is permitted, licensed and encouraged to systematically kill, maim and steal for profit. Corporations are constructed through law and politics in ways that impel them to cause harm to people and the environment. In other words, criminality is part of the DNA of the modern corporation. Therefore, the authors argue, the corporation cannot be easily reformed. The only feasible solution to this 'crime' problem is to abolish

the legal and political privileges that enable the corporation to act with impunity.
