A collection of the author's photographs of North American Indians.

In 1906 J.P. Morgan commissioned Edward S. Curtis to produce a series of books depicting Native American life. Curtis' goal was to not just photograph but to document as much of traditional Native life as possible before it disappeared. During his project, Curtis made over 10,000 wax cylinder recordings of Native languages and music, and took over 40,000 photographs of peoples from over eighty tribes. He recorded tribal lore and history, and he described traditional foods, housing, garments, recreation, ceremonies, and funeral customs. He wrote biographical sketches of tribal leaders, and his material, in most cases, is the only recorded history of these amazing peoples. Curtis had a remarkable knack for portraiture. His skill at capturing the intensity of his subjects, the grim reality of their surroundings, and the unquenchable spirit of the people was second to none. From Alaska to Mexico, Edward S. Curtis Portraits: The Many Face of the Native American features over 250 portraits in a compact volume.

Before the turn of the twentieth century, Edward S. Curtis (1868–1952) embarked on a monumental project to document the traditions, music, and legends of Native Americans before they were lost forever. He took more than 40,000 photographs for his twenty-volume work, *The North American Indian*. The twelve reproductions in this calendar, accompanied by information about tribal culture and history, are from first-generation photoprints and the original volumes of photogravures held by the Library of Congress. Important events in Native American history are noted throughout. The first collection of Edward S. Curtis' stunning, evocative and hugely popular portraits of Native American Women—with never-before-published images. Portraits from *North American Indian Life Early Photos* by Edward S. Curtis. *The Probability Of God* *North American Indians* *Native Nations* *Native Family*

A narrative account of the pioneering photographer's life-risking effort to document a disappearing North American Indian nation offers insight into the danger and resolve behind his venture, his elevation to an impassioned advocate and the posthumous discovery of his considerable achievements. By the Pulitzer Prize-winning author of *The*

Big Burn. 75,000 first printing.

Bold, sometimes abrasive, forever passionate, Edward Curtis was the quintessential romantic visionary. Curtis struggled through an impoverished boyhood in Minnesota to become a successful society photographer in Seattle. But he soon moved far beyond weddings and studio portraits to his life's work: a multi-volume photographic and ethnographic work on the vanishing world of the North American Indian. Initially, Teddy Roosevelt and J.P. Morgan backed the ambitious project. But as the work stretched over years, Curtis found himself alone with his vision, struggling to finance himself and his crews. The 20-volume *North American Indians*, finally completed in 1930, cost Curtis his marriage, his friendships, his home, and his health. By the time he died in 1952, he and his monumental work had lapsed into obscurity. In this richly designed book, Anne Makepeace, creator of an award-winning documentary on Curtis's life, reexamines the lasting impact of his work. Curtis's photographs, once ignored, now serve as a link between the romantic past and contemporary Native American communities, who have used his images to reclaim and resurrect their traditions.

Chronicles the creation of Meredith Willson's *The Music Man*—reprinted now as the Broadway Edition *Composer Meredith Willson* described *The Music Man* as “an Iowan’s attempt to pay tribute to his home state.” Now featuring a new foreword by noted singer and educator Michael Feinstein, this book presents Willson’s reflections on the ups and downs, surprises and disappointments, and finally successes of making one of America’s most popular musicals. Willson’s whimsical, personable writing style brings readers back in time with him to the 1950s to experience firsthand the exciting trials and tribulations of creating a Broadway masterpiece. Fresh admiration of the musical—and the man behind the music—is sure to result.

From 1900 to 1930, Edward S. Curtis created a massive photographic and ethnographic record of 80 American Indian tribes. This collection of 240 sepia-tone images presents the best and most striking pictures from Curtis's documentation of a traditional culture on the verge of extinction.

Photographs include striking portraits of Geronimo, Chief Joseph, Red Cloud, and other prominent individuals.

1930 - With almost no fanfare Curtis published the final two volumes of "The North American Indian." It has been estimated that during the project Curtis took over 40,000 photographs and made 10,000 wax cylinder sound recordings of Indian speech and music. About 200 sets of the works were printed and Curtis delivered 25 sets to J.P. Morgan as promised for partially financing the project. The Morgan Company later sold 19 of those sets. The Library of Congress has a set. October 19, 1952 - Edward Sheriff Curtis died of a heart attack at the age of 84, in the home of his daughter Beth. A seventy-six word obituary in the New York Times mentions simply that Curtis had been an authority on Indian history and that he had also been known as a photographer.

Native Family presents some of the finest examples of Edward Sheriff Curtis's portraiture, especially of women and children, as well as images that portray the traditional costumes, rites, and character of the individuals who made up the native nations of North America. Photographs of a wide variety of tribal groups from the Pacific Northwest to the Desert Southwest to the Great Plains are included. The images, selected by Curtis expert Christopher Cardozo, are from Curtis's landmark publication, *The North American Indian*. This twenty-volume, twenty-portfolio magnum opus contains thousands of photogravures and accompanying historical and descriptive text, some of which has been excerpted here to bring the pictures to life and provide information on family structure, marriage customs, living conditions,

child-rearing, relationships, and other components of these native peoples' often difficult existence. Compiled over thirty years beginning in 1898, Curtis's study of more than eighty tribal cultures on the brink of extinction captured the essence of the Native American way of life. Historic Emergence of 100 unpublished Edward S. Curtis photographs and personal journal from Alaska! Join Edward Curtis on his harrowing journey on the Bering Sea in the summer of 1927. His first-hand accounts, as written in his personal journal, bring to life his final field season to complete The North American Indian project. This Alaska voyage is truly an example of the tenacity it took for Curtis to complete his grand opus. Between the towering gale-driven seas breaking over the deck, the blizzard snow conditions, the falling barometers, and the hole in the boat, it is a miracle he and his crew lived to tell this story. Included with Curtis' historic journal are 100 previously unpublished photographs. Occasionally unseen Curtis prints surface, but never 100 at once. Be the first to experience these images and make this book a part of your personal library. "How I managed to keep that log during all the stress is beyond my present understanding, yet on reading it twenty years after it was written, it brought the day by day incidents, locations and storm conditions vividly to mind. Frankly, it's reading gave me the shivers, and I constantly marveled that at any time in my life I had the strength and endurance to do such a season's work." ~ Edward Curtis

A Book of Postcards

Early 1900's photography of North American Indians.

For almost three decades, Edward Curtis photographed the First Peoples of the North American West and studied their cultures. As part of his fieldwork, he cruised the Pacific Northwest coast and ventured into the lands of the Blackfoot Confederacy, both north and south of the Medicine Line. Alarmed that the traditional Aboriginal ways of life seemed in danger of disappearing forever, Curtis made an incredible effort to capture the daily routines, character and dignity of First Peoples through photography and audio recordings. Against seemingly insurmountable odds and at substantial personal and financial sacrifice, he completed the 20-volume masterpiece The North American Indian, deemed "the most gigantic undertaking in the making of books since the King James edition of the Bible" by the New York Herald.

With more than 150 photographs, Edward S. Curtis' *Above the Medicine Line* is both a compelling narrative that sheds new light on the Curtis mystique and a fascinating overview of many of the First Peoples he studied a century ago.

"The forty-eight reproductions in this deck of Knowledge Cards have been selected from approximately 1,700 first-generation Curtis photoprints in the collections of the Library of Congress. The cards also supply text about the customs, ceremonies, life-styles, arts, and crafts of various tribes of North American Indian." -- Back of box.

The book includes many regions, tribes and ages of people, and in some ways even some of the more negative aspects of his photographs are invaluable because they informed much of the mainstream American (worldwide, really) mythology that surrounds First Nations peoples of North America.

The photos are somewhere between documentary and romanticism. Where he could have taken straight documentary photos of poverty and tattered Western/white clothing, he instead staged warrior meetings on horseback and the like.

mainstream American culture. They have inspired countless books, articles, and photographic exhibitions, and they continue to appear on posters, postcards, and other souvenirs. Accompanying the remarkable array of images in this book are essays by leading scholars that place the photographs within their proper critical, cultural, and historical contexts. The scholars contributing to this work are Martha H. Kennedy, Martha A. Sandweiss, Mick Gidley, and Duane Niatum.

Legendary for his massive photographic undertaking *The North American Indian*, Edward Sheriff Curtis (1868–1952) recorded much more than portraits of Native American tribespeople. Among his huge body of work are numerous images of all manner of native dwellings: tipis, hogans, huts, cliff houses, adobes, and many more that are far less familiar to the public eye. Though people are largely absent from these photographs, each image speaks volumes about the lives and lifestyles of the tribes to which they belonged. Other structures such as tombs, religious buildings, granaries, and totem poles are also featured prominently, further glimpses into ways of life that were in the process of disappearing. Taken from the Dan and Mary Solomon collection, *Sites & Structures: The Architectural Photographs of Edward S. Curtis* is the first book of Curtis photographs to explore these dwellings and structures, faithfully reproduced from the

Edward S. Curtis: Visions of the First Americans is a tribute to the photographer, his work, but above all to the Native Americans he photographed. Chapters on many different Native American tribes make this collection unique. Edward Curtis's recognizable style, saturated with sepia, is immediately recognizable. He captures not only the striking faces of his subjects, but also a glimpse into the lifestyle of each Native American tribe he photographed. Women grind corn, and communities gather outside their traditional living areas. Atop horses, Native Americans ride on the prairie. Papooses are bundled in woven carrying packs, and men are dressed in full feathered regalia. These images paint a picture, known to us now only as a historical memory. Many tribes are featured in this volume, from the familiar Apache and Navaho to lesser-known tribes. This book will draw in readers who are interested in world cultures,

"Curtis spent the best part of his life-nearly thirty years-documenting what he considered to be the traditional way of life for Indians living in the trans-Mississippi West. He took more than 40,000 photographs, collected more than 350 traditional Indian tales, and made more than 10,000 sound recordings of Indian speeches and music His magnum opus was *The North American Indian*." (Pritzker, Edward S. Curtis, 6).

Edward S. Curtis's *The North American Indian* is the most ambitious photographic and ethnographic record of Native American cultures ever produced. Published between 1907 and 1930 as a series of twenty volumes and portfolios, the work contains more than two thousand photographs intended to document the traditional culture of every Native American tribe west of the Mississippi. Many critics have claimed that Curtis's images present Native peoples as a "vanishing race," hiding both their engagement with modernity and the history of colonial violence. But in this major reappraisal of Curtis's

work, Shamoan Zamir argues instead that Curtis's photography engages meaningfully with the crisis of culture and selfhood brought on by the dramatic transformations of Native societies. This crisis is captured profoundly, and with remarkable empathy, in Curtis's images of the human face. Zamir also contends that we can fully understand this achievement only if we think of Curtis's Native subjects as coauthors of his project. This radical reassessment is presented as a series of close readings that explore the relationship of aesthetics and ethics in photography. Zamir's richly illustrated study resituates Curtis's work in Native American studies and in the histories of photography and visual anthropology.

What is American Indian photography? At the turn of the twentieth century, Edward Curtis began creating romantic images of American Indians, and his works—along with pictures by other non-Native photographers—came to define the field. Yet beginning in the second half of the nineteenth century, American Indians themselves started using cameras to record their daily activities and to memorialize tribal members. Through a Native Lens offers a refreshing, new perspective by highlighting the active contributions of North American Indians, both as patrons who commissioned portraits and as photographers who created collections. In this richly illustrated volume, Nicole Dawn Strathman explores how indigenous peoples throughout the United States and Canada appropriated the art of photography and integrated it into their lifeways. The photographs she analyzes date to the first one hundred years of the medium, between 1840 and 1940. To account for Native activity both in front of and behind the camera, the author divides her survey into two parts. Part I focuses on Native participants, including such public figures as Sarah Winnemucca and Red Cloud, who fashioned themselves in deliberate ways for their portraits. Part II examines Native professional, semiprofessional, and amateur photographers. Drawing from tribal and state archives, libraries, museums, and individual collections, Through a Native Lens features photographs—including some never before published—that range from formal portraits to casual snapshots. The images represent multiple tribal communities across Native North
