

DK Pocket Eyewitness Dinosaurs: Facts At Your Fingertips

Profiling nearly 200 types of rocks and minerals from volcanic rocks and granite to sparkling diamonds and explosive sulfur, DK’s Pocket Genius: Rocks and Minerals digs deep beneath the surface, informing young readers what each rock is made of, how they are formed and what they are used for, how to be a rock collector, and how to identify rocks and minerals. Also highlighting landmarks such as Devils Tower, Giant’s Causeway, and Shiprock Pinnacle, this Pocket Genius title shows how rocks and minerals play a part in the formation of each. Catalog entries include facts provided at-a-glance information, while locator icons offer immediately recognizable references to aid navigation and understanding, and fact files round off the book with fun facts such as record breakers and timelines. Each mini-encyclopedia is filled with facts on subjects ranging from animals to history, cars to dogs, and Earth to space and combines a child-friendly layout with engaging photography and bite-size chunks of text that will encourage and inform even the most reluctant readers. Get ready to roar with this updated edition of DK’s beloved Big Book of Dinosaurs Dinosaurs fascinate young children, and this colorful catalog of those mysterious creatures from the past will keep even toddlers entertained for hours. Children will love spotting and learning to name all the different dinosaurs—from the fierce, meat-eating Tyrannosaurus and the long-necked, plant-eating Diplodocus to the armor-plated Stegosaurus and the tiny, hen-sized Compsognathus.

The Periodic Table Book is the perfect visual guide to the chemical elements that make up our world. This eye-catching encyclopedia takes children on a visual tour of the 118 chemical elements of the periodic table, from argon to zinc. It explores the naturally occurring elements, as well as the man-made ones, and explains their properties and atomic structures. Using more than 1,000 full-colour photographs, The Periodic Table Book shows the many natural forms of each element, as well as a wide range of both everyday and unexpected objects in which it is found, making each element relevant for the child’s world. Journey back in time and find out where the dinosaurs roamed. This unique children’s atlas explores each continent, revealing fossil sites and stories on every map. Part of the best-selling What’s Where on Earth series, this atlas is packed with maps of early Earth and more than 40 profiles of dinosaurs and other prehistoric animals. Stare down a T Rex in North America. Watch out for Velociraptors’ slashing claws in the Gobi Desert. Trek across the Siberian tundra and discover a woolly mammoth. This stunning book makes every animal come to life using breathtaking computer-generated imagery. Using specially-commissioned maps, this dinosaur atlas shows you what the world looked like millions of years ago. A modern 3D globe next to each map helps you understand the arrangement of the continents over time and why we find fossils where we do. You can see what palaeontologists have dug up over the centuries in each continent and learn how they put together a picture of the past from a puzzle of ancient clues. Where on Earth Dinosaurs and Other Prehistoric Life reveals the prehistoric world as never before. An essential read for every young dinosaur expert.

"A well-illustrated overview of the science and (literal) impact of these space rocks." - Science News, on the first edition
Leading experts in the field provide a compelling introduction to the space rocks that enter Earth's atmosphere at speeds ranging from 25,000 mph to 160,000 mph. Scientists estimate that about 48.5 tons of meteoric material falls on the Earth each day. These messengers from space give us a unique insight into the nature of the material that was present when our solar system formed. Many of the specimen meteorites in this second edition were re-photographed to improve quality, and the optical microscopy shots were updated. There is also much new information on discoveries and developments in the study of meteorites, including: Meteorite falls and craters, and new information on ones previously covered
Use of weather radar to detect and analyze meteorites, such as the 28,000 mph January 18, 2018, Michigan "fireball"
How astrophysicists determine if a meteorite comes from Mars, and information about the Martian meteorites found to date
Updated information on the results of the European Space Agency's Rosetta Mission in which a controlled impact was successfully completed into Comet 67P after investigating it with a probe for more than two years.
Co-author Sara Russell, who is part of NASA's Mars program, provides the latest news about NASA's Mars programs, including the Mars Rover, which landed in 2016.
