

## Da Animali A Dei Breve Storia Dell'umanità

The imposition of strict liability in tort law is controversial, and its theoretical foundations are the object of vigorous debate. Why do or should we impose strict liability on employers for the torts committed by their employees, or on a person for the harm caused by their children, animals, activities, or things? In responding to this type of questions, legal actors rely on a wide variety of justifications. Justifying Strict Liability explores, in a comparative perspective, the most significant arguments that are put forward to justify the imposition of strict liability in four legal systems, two common law, England and the United States, and two civil law, France and Italy. These justifications include: risk, accident avoidance, the 'deep pockets' argument, loss-spreading, victim protection, reduction in administrative costs, and individual responsibility. By looking at how these arguments are used across the four legal systems, this book considers a variety of patterns which characterise the reasoning on strict liability. The book also assesses the justificatory weight of the arguments, showing that these can assume varying significance in the four jurisdictions and that such variations reflect different views as to the values and goals which inspire strict liability and tort law more generally. Overall, the book seeks to improve our understanding of strict liability, to shed light on the justifications for its imposition, and to enhance our understanding of the different tort cultures featuring in the four legal systems studied.

The ebook is designed to be read on devices with large color displays The Kindle edition is incompatible with iOS. See below for a list of supported devices. This second volume of Sapiens: A Graphic History, the full-color graphic adaptation of Yuval Noah Harari's #1 New York Times bestseller, focuses on the Agricultural Revolution—when humans fell into a trap we've yet to escape: working harder and harder with diminishing returns. What if humanity's major woes—war, plague, famine and inequality—originated 12,000 years ago, when Homo sapiens converted from nomads to settlers, in pursuit of the fantasy of productivity and efficiency? What if by seeking to control plants and animals, humans ended up being controlled by kings, priests, and Kafkaesque bureaucracy? Volume 2 of Sapiens: A Graphic History–The Pillars of Civilization explores a crucial chapter in human development: the Agricultural Revolution. This is the story of how wheat took over the world; how an unlikely marriage between a god and a bureaucrat created the first empires; and how war, plague, famine, and inequality became an intractable feature of the human condition. But it's not all doom and gloom with this book's cast of entertaining characters and colorful humorous scenes. Yuval, Zoe, Prof. Saraswati, Cindy and Bill (now farmers), Detective Lopez, and Dr. Fiction, all introduced in Volume 1, once again travel the length and breadth of human history, this time investigating the impact the Agricultural Revolution has had on our species. The cunning Mephisto shows them how to ensnare humans. King Hammurabi lays down the law, and Confucius explains harmonious society. The origins of modern farming are introduced through Elizabethan tragedy, the changing fortunes of domesticated plants and animals are tracked in the columns of the Daily Business News, the story of urbanization is portrayed as a travel brochure, offering discount journeys to ancient Babylon and China; and the history of inequality unfolds in a superhero detective story, with guest appearances by historical and cultural personalities throughout such as Thomas Jefferson, Scarlett O'Hara, Margaret Thatcher, and John Lennon. Sapiens: A Graphic History, Volume 2 is a radical, witty and colorful retelling of the story of humankind for adults and young adults, and can be read on its own or in sequence with Volume 1.

In un mondo invaso da informazioni irrillevanti, la lucidità è potere. La censura non opera bloccando il flusso di informazioni, ma inondando le persone di disinformazione e distrazioni. 21 lezioni per il XXI secolo si fa largo in queste acque torbide e affronta alcune delle questioni più urgenti dell'agenda globale contemporanea. Perché la democrazia liberale è in crisi? Dio è tornato? Si prospetta una nuova guerra mondiale? Che cosa significa l'ascesa di Donald Trump? Che cosa si può fare per contrastare l'epidemia di notizie false? Quale civiltà domina il mondo. l'Occidente, la Cina o l'Islam? L'Europa deve tenere le porte aperte ai migranti? I nazionalismi possono risolvere i problemi legati all'ineguaglianza e ai cambiamenti climatici? Che fare per arginare il terrorismo? Che cosa dobbiamo insegnare ai nostri figli? Miliardi di persone possono a stento permettersi il lusso di approfondire simili questioni, perché pressate da ben altre urgenze: andare al lavoro, prendersi cura dei figli o dei genitori anziani. Purtroppo la storia non fa sconti. Se il futuro dell'umanità viene deciso in vostra assenza, perché siete troppo occupati a dar da mangiare e a vestire i vostri bambini, voi e loro ne subirete comunque le conseguenze. Certo è molto ingiusto, ma chi ha mai detto che la storia sia giusta? Un libro non dà alle persone cibo o vestiti, però può offrire un po' di chiarezza, contribuendo ad appianare le differenze a livello globale. Se questo libro riuscirà a far sì che anche solo una manciata di persone si unisca al dibattito sul futuro della nostra specie, allora avrà fatto il suo dovere.

Justifying Strict Liability

Sapiens. La nascita dell'umanità

*The book that inspired the Academy Award-winning short film, from New York Times bestselling author and beloved visionary William Joyce. Morris Lessmore loved words. He loved stories. He loved books. But every story has its upsets. Everything in Morris Lessmore's life, including his own story, is scattered to the winds. But the power of story will save the day. Stunningly brought to life by William Joyce, one of the preminent creators in children's literature, The Fantastic Flying Books of Mr. Morris Lessmore is a modern masterpiece, showing that in today's world of traditional books, eBooks, and apps, it's story that we truly celebrate—and this story, no matter how you tell it, begs to be read again and again.*

*Paul Shapiro gives you a front-row seat for the wild story of the race to create and commercialize cleaner, safer, sustainable meat—real meat—without the animals. From the entrepreneurial visionaries to the scientists' workshops to the big business boardrooms—Shapiro details that quest for clean meat and other animal products and examines the debate raging around it. Since the dawn of Homo sapiens some quarter million years ago, animals have satiated our species' desire for meat. But with a growing global population and demand for meat, eggs, dairy, leather, and more, raising such massive numbers of farm animals is woefully inefficient and takes an enormous toll on the planet, public health, and certainly the animals themselves. But what if we could have our meat and eat it, too? The next great scientific revolution is underway—discovering new ways to create enough food for the world's ever-growing, ever-hungry population. Enter clean meat—real, actual meat grown (or brewed!) from animal cells—as well as other clean foods that ditch animal cells altogether and are simply built from the molecule up. Whereas our ancestors domesticated wild animals into livestock, today we're beginning to domesticate their cells, leaving the animals out of the equation. From one single cell of a cow, you could feed an entire village. And the story of this coming "second domestication" is anything but tame.*

New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity’s creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.
 **? THANK YOU FOR A REVIEW! I WISH YOU EVERY SUCCESS!**
? Welcome to the magical world where kids color and have fun while learning about animals at the same time. Give them a great activity that sparks their creativity and keeps them busy and entertained for hours. With the help of 100 ready-to-color illustrations, children will meet a pony, lamb, bunny, rabbit, hen, rooster, calf, duck, baby chick, turkey, cow, pig, and many more. But that's only half the fun. Kids will also be able to color each animal they meet along the way! Have your child color in these adorable baby animals along with their amazing environments.

This shocking expose dispels the negative image of animal rights advocates portrayed by the media, unmasks the fraudulent rhetoric of human treatment favored by animal exploiters, and explain why exisiting laws function to legitimize institutional cruelty.

The ebook is designed to be read on devices with large color displays The Kindle edition is incompatible with iOS. See below for a list of supported devices. New York Times Bestseller The first volume of the graphic adaptation of Yuval Noah Harari's smash #1 New York Times and international bestseller recommended by President Barack Obama and Bill Gates, with gorgeous full-color illustrations and concise, easy to comprehend text for adult and young adult readers alike. One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? In this first volume of the full-color illustrated adaptation of his groundbreaking book, renowned historian Yuval Harari tells the story of humankind’s creation and evolution, exploring the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, Sapiens challenges us to reconsider accepted beliefs, connect past developments with contemporary concerns, and view specific events within the context of larger ideas. Featuring 256 pages of full-color illustrations and easy-to-understand text covering the first part of the full-length original edition, this adaptation of the mind-expanding book furthers the ongoing conversation as it introduces Harari’s ideas to a wide new readership.

Award-winning author Temple Grandin is famous for her groundbreaking approach to decoding animal behavior. Now she extends her expert guidance to small-scale farming operations. Grandin’s fascinating explanations of how herd animals think – describing their senses, fears, instincts, and memories – and how to analyze their behavior, will help you handle your livestock more safely and effectively. You'll learn to become a skilled observer of animal movement and behavior, and detailed illustrations will help you set up simple and efficient facilities for managing a small herd of 3 to 25 cattle or pigs, or 5 to 100 goats or sheep.

Facing the Challenge of Animal Rights

A Brief History of Humankind

Centomila anni fa almeno sei specie di umani abitavano la Terra. Erano animali insignificanti, il cui impatto sul pianeta non era superiore a quello di gorilla, lucciocle o meduse. Oggi sulla terra c'è una sola specie di umani. Noi: Homo sapiens. E siamo i signori del pianeta. Il segreto del nostro successo è l'immaginazione. Siamo gli unici animali capaci di parlare di cose che esistono solo nelle nostre fantasie: come le divinità, le nazioni, le leggi e i soldi. Sapiens. Da animali a deì spaga come ci siamo associati per creare città, regni e imperi; come abbiamo costruito la fiducia nei soldii, nei libri e nelle leggi; come ci siamo ritrovati schiavi della burocrazia, del consumismo e della ricerca della felicità.

IL SECONDO VOLUME DELLA VERSIONE ILLUSTRATA DEL BESTSELLER INTERNAZIONALE SULLA STORIA DELL'UOMO. Quando Homo sapiens addomesticò alcuni animali e certe piante, poté abbandonare lo stile di vita nomade per adottarne uno sedentario. Vivere insieme agli altri simbolò la nascita di credenze e miti condivisi. Grazie a un immaginario comune i gruppi umani, nel frattempo accresciuti di numero, si lanciarono in progetti sempre più ambiziosi come la fondazione di città e regni, dando vita alle prime civiltà della storia. Questo secondo volume del graphic novel tratto dal bestseller Sapiens. Da animali a deì continua la narrazione là dove Yuval Noah Harari l'aveva lasciata: Homo sapiens è l'unico a essere sopravvissuto all'estinzione delle altre specie umane e di gran parte dei grandi mammiferi, ed è pronto a conquistare il mondo. Ma si trattò davvero di una marcia trionfale? A questa domanda risponderà un gruppo assai eterogeneo di personaggi, tra cui lo stesso prof. Harari, che con autonomia interpreta se stesso, Doctor Fiction, con una passione a tratti pericolosa per le finzioni e i miti collettivi, il diabolico Mefistofele, che nei panni di un'umile spiga di grano cambierà il destino dell'uomo, la rigorosa ma non sempre equa Lady Justice, e infine l'acuto e gentile avvocato praghese Franz K. che ci aiuterà a vedere al di là del labirinto di regole in cui ci muoviamo – o rimaniamo intrappolati. Con Sapiens, I pilastri della civiltà l'analisi storica di Harari trova nel brtio narrativo del racconto a fumetti un adattamento divertente e intelligente che non mancherà di entusiasmare tutti gli appassionati del cammino dell'uomo dall'antichità ai giorni nostri.

Come abbiamo fatto ad arrivare a questo punto? Noi, l'Homo sapiens, governiamo il mondo perché siamo gli unici animali che credono nel potere dell'immaginazione. Il libro del dott. Yuval Noah Harari sui sapiens è un capolavoro, unico nel suo genere. Mentre altri libri si concentrano sulla parte storica o su quella biologica del nostro essere umani, "Sapiens" si concentra sulle tre grandi rivoluzioni della storia dell'uomo: quella cognitiva, quella agricola e quella scientifica. "Non c'è una sola cosa vera. Tutto è vero" - Yuval Noah Harari Il dott. Harari ora ci suggerisce di guardare avanti, perché le cose cambieranno. L'uomo ha rivoluzionato non solo il nostro mondo, ma anche noi stessi. Siamo cresciuti, siamo migliorati e ci siamo trasformati. E questa trasformazione non si fermerà. Dove ci porterà? Dove arriveremo, e cosa siamo diventando? (Nota: Questo riassunto è stato completamente scritto e pubblicato da readtrepreneur.com e non è affiliato in alcun modo con l'autore originario) P.S. A Brief History of Tomorrow

A study of the Burgess Shale, a sea bed 530 million years old, and attempts to tackle what the findings are and what it means

Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon Sapiens, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—through, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? Homo Deus explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is Homo Deus. With the same insight and clarity that made Sapiens an international hit and a New York Times bestseller, Harari maps out our future.

IL PRIMO VOLUME DELLA VERSIONE ILLUSTRATA DEL BESTSELLER INTERNAZIONALE SULLA STORIA DELL'UOMO. In un mondo alluvionato da informazioni irrilevanti la lucidit     potere. Wild Animals

Sapiens. Da animali a de i. Breve storia dell'umanit  

Many Japanese once revered the wolf as Oguchi no Magami, or Large-Mouthed Pure God, but as Japan began its modern transformation wolves lost their otherworldly status and became noxious animals that needed to be killed. By 1905 they had disappeared from the country. In this spirited and absorbing narrative, Brett Walker takes a deep look at the scientific, cultural, and environmental dimensions of wolf extinction in Japan and tracks changing attitudes toward nature through worshiped wolves at shrines and left food offerings near their dens, beseeching the elusive canine to protect their crops from the sharp hooves and voracious appetites of wild boars and deer. Talismans and charms adorned with images of wolves protected against fire, disease, and other calamities and brought fertility to agrarian communities and to couples hoping to have children. The Ainu people believed that they were born from the union of a wolflike creature and a goddess, rabid man-killers in many parts of Japan. Highly ritualized wolf hunts were instigated to cleanse the landscape of what many considered as demons. By the nineteenth century, however, the destruction of wolves had become decidedly unceremonious, as seen on the island of Hokkaido. Through poisoning, hired hunters, and a bounty system, one of the archpelago's largest carnivores was systematically erased. The story of wolf extinction exposes the underside of Japan's modernization. Japan to listen for any trace of the elusive canines. The quiet they experience reminds us of the profound silence that awaits all humanity when, as the Japanese priest Kenko taught almost seven centuries ago, we "look on fellow sentient creatures without feeling compassion."

Archeologia dei relitti postmedievali / Archaeology of Post-Medieval Shipwrecks, a cura di Carlo Beltrame Il volume, che raccoglie undici contributi di archeologi marittimi di molti paesi, ha l'obiettivo di accendere i riflettori sulle enormi potenzialit   dei relitti di et   storica, mettendo a confronto, da un lato, approcci diversi (di ambito mediterraneo ma anche statunitense, australiano e nord europeo), dall'altro, contesti archeologici con caratteristiche altrettanto diverse per l'ambiente di imbarcazione. Gli studi, diacronici ma incentrati sul Cinquecento e sull'Ottocento, coprono le varie sfaccettature dell'indagine storica dei relitti di et   postmedievale quali la costruzione navale, il commercio e la vita di bordo, ma anche aspetti di tipo squisitamente metodologico quali l'archeologia sperimentale navale. Si tratta di una novit   assoluta per l'editoria scientifica italiana in cui questo particolare, ma molto promettente, ambito della ricerca archeologica non aveva ancora trovato spazio. Here, the author examines gossip as a form of 'verbal grooming', and as a means of strengthening relationships. He challenges the idea that language developed during male activities such as hunting, and that it was actually amongst women that it evolved.

The Pillars of Civilization

**#1 NEW YORK TIMES BESTSELLER** • *In Sapiens, he explored our past. In Homo Deus, he looked to our future. Now, one of the most innovative thinkers on the planet turns to the present to make sense of today's most pressing issues. "Fascinating . . . a crucial global conversation about how to take on the problems of the twenty-first century."*—Bill Gates, *The New York Times Book Review*
**NAMED ONE OF THE BEST BOOKS OF THE YEAR BY FINANCIAL TIMES AND PAMELA PAUL, KQED**
*How do computers and robots change the meaning of being human? How do we deal with the epidemic of fake news? Are nations and religions still relevant? What should we teach our children?*
*Yuval Noah Harari's 21 Lessons for the 21st Century is a probing and visionary investigation into today's most urgent issues as we move into the uncharted territory of the future. As technology advances faster than our understanding of it, hacking becomes a tactic of war, and the world feels more polarized than ever, Harari addresses the challenge of navigating life in the face of constant and disorienting change and raises the important questions we need to ask ourselves in order to survive. In twenty-one accessible chapters that are both provocative and profound, Harari builds on the ideas explored in his previous books, untangling political, technological, social, and existential issues and offering advice on how to prepare for a very different future from the world we now live in: How can we retain freedom of choice when Big Data is watching us? What will the future workforce look like, and how should we ready ourselves for it? How should we deal with the threat of terrorism? Why is liberal democracy in crisis? Harari's unique ability to make sense of where we have come from and where we are going has captured the imaginations of millions of readers. Here he invites us to consider values, meaning, and personal engagement in a world full of noise and uncertainty. When we are deluged with irrelevant information, clarity is power. Presenting complex contemporary challenges clearly and accessibly, 21 Lessons for the 21st Century is essential reading. "If there were such a thing as a required instruction manual for politicians and thought leaders, Israeli historian Yuval Noah Harari's 21 Lessons would deserve serious consideration. In this collection of provocative essays, Harari . . . tackles a daunting array of issues, endeavoring to answer a persistent question: "What is happening in the world today, and what is the deep meaning of these events?"—BookPage (top pick)*
